

Ariel Atom

Best Life magazine empowers men to continually improve their physical, emotional and financial well-being to better enjoy the most rewarding years of their life.

DRIVEN is John Aston's hugely entertaining motoring autobiography. This ambitious and far-ranging book begins with his early days as a teenage car enthusiast and race marshal in the late Sixties before covering the wide range of subjects close to his heart. These include the best and worst of Formula One, the icon that is Ferrari, the writer's NASCAR adventure, and the delights of long road trips in his beloved Caterham Seven. But that's not all, as you can read about why the NSU Ro80 was a prophet without honour, as well as what the writer thinks about the changing face of motoring journalism. Yes, one J Clarkson is mentioned ... And there's more still, as a major part of the book is a first-hand account of a year in British motorsport. The writer's love of the lesser known categories of motorsport illuminates the text, as does his insight into the places, people and machinery making up the sport's diversity. He describes the mood music of events ranging from a round of the British Touring Car Championship to historic race meetings for Cortinas and Minis, before venturing further from the mainstream with drag racing at Santa Pod, speed hillclimbs, autograss and rallying. Oh - he also doubled the average age at a Time Attack meeting. Don't expect objective reporting, as he holds strong opinions, but they are leavened by a tongue firmly lodged in his cheek. Any reader, enthusiast or not, is guaranteed to enjoy reading about these adventures as much as the writer enjoyed having them.

Television studies must now address a complex environment where change has been vigorous but uneven, and where local and national conditions vary significantly. Globalizing media industries, deregulatory policy regimes, the multiplication, convergence and trade in media formats, the emergence of new content production industries outside the US/UK umbrella, and the fragmentation of media audiences are all changing the nature of television today: its content, its industrial structure and how it is consumed. Television Studies after TV leads the way in developing new ways of understanding television in the post-broadcast era. With contributions from leading international scholars, it considers the full range of convergent media now implicated in understanding television, and also focuses on large non-Anglophone markets – such as Asia and Latin America — in order to accurately reflect the wide variety of structures, forms and content which now organise television around the world.

Features some 45 of the world's exciting road cars, ranging from Alfa Romeo 8C Spider to the Pagani Zonda Roadster and the Ariel Atom V8.

From humble beginnings as a 1970s motoring show, Top Gear has gone on to achieve diesel-powered world domination. After Clarkson and producer Andy Wilman successfully pitched a new format to BBC bosses, Top Gear returned to become the irreverent, funny and often controversial show we now know and love. The Star in a Reasonably Priced Car, the Cool Wall and Power Laps by the mysterious Stig have all become staples of Britain's favourite Sunday evening entertainment. Recent series have been defined by their madcap challenges such as driving across Africa in clapped-out bangers - with predictably hilarious results. However, the show's most shocking moment came in 2006, when Hammond suffered serious head injuries while driving a Vampire turbojet drag racing car at over 300mph. Clarkson, Hammond and May; they are the politically-incorrect-joking, stone-washed-denim-wearing, bloke-hero trio for the modern(ish) age. This brilliant, detailed book is fitting tribute to the show, its presenters and its most memorable moments.

People have never been more broadly aware of design as a concept, or as something that fits into their everyday lives. Even the simplest of consumer products compete to offer something that will better catch the public's eye and reflect the taste and perceived lifestyle of each individual. Like all design, car design is complex subject. It's one in which many people have an interest--and not just gearheads. Every part of a car represents myriad decisions by the design team ruled by engineering, aesthetics, human interface, and emotion. Speed Read: Car Design helps the reader to understand the hows and whys of that design process, offering an engaging review of history, theory, key concepts, and key designers. It's a book for car enthusiasts, design fans, and anyone with a desire to better understand why our wheeled world looks the way it does.

Share in the trials and tribulations of turning a bare frame and wrecked Miata into a racetrack demon, and learn how to build a sports car of your own along the way. This book provides specific answers to common questions and covers the entire building process, including the post-build fine-tuning of the car that is necessary to extract the car's full performance (and fun) potential.

Top Gear's Richard Hammond is in the driving seat for this turbo-charged tour through the nuts and bolts of car technology. Underneath the bonnet of every car there's a lot of fast, furious, and spectacular science going on. G-force, combustion, power, you name it, a car's got it. Help your child discover all about the science of cars in this explosive tour. Find out how cars revolutionised the world, see how a car functions with jaw-dropping diagrams, cutaway drawings and cool graphics. Steer to the fundamental science behind the mechanics and then sit back for an exciting look into the future of minimal emissions, maximum fun. PLUS, find great things your child will love to make and do!

INCLUDES FREE APP WITH EXCLUSIVE DIGITAL CONTENT Living The Supercar Dream is the ultimate supercar book created by Tim Burton - owner and creator of the hugely popular YouTube channel Shmee150. Engaging millions of followers through his infectious excitement, exclusive access and unparalleled knowledge of the supercar industry, Tim has created one of the biggest automotive channels in the world, sharing his adventures on a daily basis and filming the most amazing luxury cars in existence. In Living The Supercar Dream, he takes readers on a road trip across the globe, experiencing the most incredible locations and the cars that have defined their landscapes. From driving the high-speed

Bugatti Veyron 16.4 Grand Sport Vitesse across the German countryside to twisting down the mountain roads of the Alps in his Porsche Cayman GT4, driving Italian designer cars through the streets of Mediterranean cities to testing the limits of his McLaren 675LT on track in Portugal, Tim takes readers through the unique features of each car against the spectacular backdrops they were made for. Capturing Tim's honest and personal touch, this is the ultimate guide to the world's greatest high performance and luxury cars.

Collection Editions present "Top Gear"... The world's most watched factual television program. With over 160 car reviews and manufacturer information, presenter biographies from the original 1977 series through to today's modern masterpiece. History of the UK, Russian, Korean, US & Australian series, Track reviews, Power laps, all the present 'Star' timings, and so much more. This huge book is the ultimate authoritative and comprehensive guide to the world's most loved television series for the most dedicated of fans.

Last night Tennant Truman got drunk and fell asleep in Tokyo. This morning he awoke in Los Angeles with a terrible hangover... and no memory of the last five years of his life. Not a good day to be pursued by a Chinese assassin... Fans of *The Bourne Identity* and *The Girl With the Dragon Tattoo* won't want to miss this thrilling novel of suspense spanning two continents! His every memory of the last five years is gone. The girl he loved replaced by a woman he doesn't recognize. Where before he could only speak English, now he's fluent in Chinese, Japanese and Russian. A briefcase of enormous value has been left with his ex-girlfriend for safekeeping. And he is pursued by Zhang—a Chinese assassin, who wants to use him as a pawn in a game of international dominance. What happened to Tennant Truman? The only way he can find out... is to stay alive. From *Inside The Novel...* There was a coldness to her voice. It kind of freaked me out. "Well," I said, trying to be helpful, "why don't you move into—" "We'll just get stuck in that lane, instead." It had been like this since she arrived that morning, and her mood seemed to be blackening. Now that she saw me back in normal clothing, maybe the situation was beginning to sink in. "Listen," I said, trying to be diplomatic, "maybe we got off to a bad start." All I got was silence from her. I looked around. Such a nice dash. And those controls, so well designed. And a flappy-paddle gearbox. What technology! "It's a nice set of wheels you got here," I said. "You have real good taste in automobiles." Vivian looked over. "You brought it home without telling me. I wanted a Prius."

Years I looked for a book that had pictures of all the great cars I admired from modern megacars to favorite old classic to rare one-of-a-kind show pieces. I found one book with maybe a third of my dream cars. With help of some friends I decided to create *CARS THAT MATTER*, a handy photographic guide with lots of descriptions and historical notes about the most interesting, rare, and fun cars produced over the last century. Every car collector and wannabe collector I knew found something they'd not heard of in this first edition but I kept adding cars. Finally at 333 pages of brilliant images I

comprehensive illustration to Top Gear yet with dozens of episode reviews and illustrations including some never before seen, presenter biographies right from the original 1977 series through to today's modern masterpiece... History of the series, guides and behind the scenes to every Top Gear "Special" including the latest and final Patagonia adventure. Find out about all the spin-off shows across the world, Track reviews, Every single Power Lap time, Every single Star in a Reasonably Priced Car, Cars of the Year, Car of the Decade, The Stig's of past and present, And absolutely tons more... Top Gear: 1977-2015 provides the biggest, most authoritative and comprehensive guide to the Top Gear series for only the most dedicated of fans"

In *Build Your Own Kit Car*, renowned kit car expert Steve Hole presents a comprehensive guide to planning, managing and executing a kit car build. The first part of the book covers the history of kit cars; detailing the innovations the kit car industry has made in car building technology, and how companies like Westfield and Caterham have become household names. The second half of the book takes you through a full build project, from chassis, brakes, suspension and engine through to trimming and interiors. Other topics include: Types of kit cars, including the differences between kits, replicas and one-off builds; Choosing the right car for you; Budgeting for your build; Setting up your workspace, tools needed and workshop safety; Building techniques; List of useful contacts to help find the best resources for your kit car build. Whether you are planning on building a blisteringly quick trackday car, classic roadster or eccentric road car, *Build Your Own Kit Car* has all the resources and information you need to build and enjoy your own unique automotive creation. A comprehensive and instructional guide to planning, managing and executing a kit car build, superbly illustrated with 300 colour photographs. Steve Hole is one of the UK's leading authorities on the world of kit cars and is editor of *tkc* magazine.

Sports cars are about the joy of driving and *365 Sports Cars You Must Drive: Fast, Faster, Fastest* is a celebration of that pleasure. All the greats are included, from Alfa Romeo to Ferrari to MG to Triumph to Zenvo and just about every make model in between!

Driven by the Standards for Technological Literacy, this National Science Foundation-sponsored book is written by national leaders in engineering and technology education and addresses the most contemporary technological content using engaging, pedagogically sound "informed design" activities. This unique approach encourages students to develop a thorough understanding of engineering and technology before they ever attempt to develop detailed design solutions. The activities present students with a design problem, and prompt students to begin the solution-finding process with research, inquiry, and analysis. Only after this important step can students begin to discuss specifications and constraints, propose alternatives, and select an optimal design. This process fosters a strong student-teacher discourse
