Published in Cooperation with the William P. Clements Center for Southwest Studies, Southern Methodist University. The U.S.-Mexico borderlands have long supported a web of relationships that transcend the U.S. and Mexican nations. Yet national histories usually overlook these complex connections. Continental Crossroads rediscovers this forgotten terrain, laying the foundations for a new borderlands history at the crossroads of Chicano/a, Latin American, and U.S. history. Drawing on the historiographies and archives of both the U.S. and Mexico, the authors chronicle the transnational processes that bound both nations together between the early nineteenth century and the 1940s, the formative era of borderlands history. A new generation of borderlands historians examines a wide range of topics in frontier and post-frontier contexts. The contributors explore how ethnic, racial, and gender relations shifted as a former frontier became the borderlands. They look at the rise of new imagined communities and border literary traditions through the eyes of Mexicans, Anglo-Americans, and Indians, and recover transnational border narratives and experiences of African Americans, Chinese, and Europeans. They also show how surveillance and resistance in the borderlands inflected the “body politics” of gender, race, and nation. Native heroine Bárbara Gandiaga, Mexican traveler Ignacio Martínez, Kiowa warrior Sloping Hair, African

This monograph mainly focuses on the idea that language teaching in higher education involves making use of new approaches and technology. It identifies the key determinants of the materials needed to improve language teaching on the basis of the actual experimental research included in the respective contributions. Thanks to its unique perspective, the book offers a distinctive approach to addressing empirical research on second language teaching, translator training and technology. As universities are some of the best arenas for analyzing teaching techniques for various subjects, higher education teachers can use this book to thoroughly prepare for the application of pilot studies and learn more about students' responses to new teaching and translation techniques. An enlightening guide for scholars and students with an academic interest in acquiring the basic principles of language teaching and translation, this book mainly provides actual cases in which the implementation of technology was useful to second language teachers and translation trainers. As the authors are experienced scholars, readers will not only come to understand how to use new teaching strategies, but also discover that the proposals described in each chapter can be useful to any level of second language training for teachers and translators.
