Profound changes were taking place in American society during the period of the 1960s and 1970s when legislation for the National Foundation for the Arts and the Humanities was enacted and the agencies went into operation. It was a period of soul-searching by the American public when the cherished prejudices and civil inequities of the past decades were wiped out and old wounds began to heal; at the same time, however, the Vietnam War was creating new fissures and antagonisms. Into this newly healing, newly questioning society, congressional action thrust the National Council on the Arts in 1964, and the National Endowment for the Arts in 1965. Their mission was to encourage and support the arts, and the men and women charged with this responsibility went about their work with the zeal and enthusiasm of religious converts. The idea of even a minute amount of federal financial assistance to the country's chronically beleaguered and often impoverished artists and arts organizations seemed strange to a segment of the population that had existed in forgot ten independence from government intervention. Many of the nation's artists and arts leaders were wary, partly because of the uncertainties and constraints of previous patterns of governmental support. Open-ended art is defined as art activity where children are free to use their imagination as they explore a variety of materials without a planned outcome. When teachers embrace open-ended art, they emphasize the process of

creating, and observe the developmental growth being experienced by the children. Open-ended art provides children an important opportunity to think about, feel, and express ideas. It helps teachers slow down the pace of the activity in order to observe and feel the environment all around. There are many books available to educators that include art ideas and projects, but *Open-Ended Art for Young Children* goes beyond the basics to highlight why the field of early childhood education advocates for open-ended art, and explain how to adapt to new ways of thinking about art. Authors Dr. Tracy Galuski and Dr. Mary Ellen Bardsley present, chapter by chapter, the challenges teachers encounter when faced with best practices and expectations related art process and product. Each chapter begins with a classroom vignette that describes the challenge, followed by a plethora of solutions, grounded in research and illustrated through practical examples. Each chapter includes full color pictures and photos, and ends with an activity or investigation for reflection.

glue, scissors, and paint will allow young illustrators to blossom while learning to love reading with a new awareness of art, illustration and technique.

Culture is not simply an explanation of last resort, but is itself a rich, multifaceted and contested concept and set of practices that needs to be expanded, appreciated and applied in fresh ways if it is to be both valued in itself and to be of use in practical development. This innovative book places culture, specifically in the form of the arts, back at the centre of debates in development studies by introducing new ways of conceptualizing art in relation to development. The book shows how the arts and development are related in very practical ways – as means to achieve development goals through visual, dramatic, filmic and craft-inspired ways. It advocates not so much culture and development, but rather for the development of culture. Without a cultural content to economic and social transformation the problems found in much development – up-rooting of cultures, loss of art forms, languages and modes of expression and performance – may only accelerate. Paying attention to the development of the arts as the content of development helps to amend this culturally destructive process. Finally, the book argues for the value of the arts in attaining sustainable cultures, promoting poverty alleviation, encouraging self-empowerment, stimulating creativity and the social imagination, which in turn flow back into wider processes of social transformation. Discussion questions at the end of each chapter make this book ideal to help foster further thinking and debate. This book is an inspiring read for postgraduate students

This volume presents a collection of interdisciplinary collaborations between contemporary art, heritage, anthropological, and archaeological practitioners. Departing from the proceedings of the Sixth World Archaeological Congress's 'Archaeologies of Art' theme and Ábhar agus Meon exhibitions, it includes papers by seminal figures as well as experimental work by those who are exploring the application of artistic methods and theory to the practice of archaeology. Art and archaeology: collaborations, conversations, criticisms encourages the creative interplay of various approaches to 'art' and 'archaeology' so these new modes of expression can contribute to how we understand the world. Established topics such as cave art, monumental architecture and land art will be discussed alongside contemporary video art, performance art and relational arts practices. Here, the parallel roles of artists as makers of new worlds and archaeologists as makers of pasts worlds are brought together to understand the influences of human creativity.

technologies that make up the smart city infrastructure can be harnessed to incorporate more playfulness into the day-to-day activities that take place within smart cities, making them not only more efficient but also more enjoyable for the people who live and work within their confines. The book addresses various topics that will be of interest to playable cities stakeholders, including the human-computer interaction and game designer communities, computer scientists researching sensor and actuator technology in public spaces, urban designers, and (hopefully) urban policymakers. This is a follow-up to another book on Playable Cities edited by Anton Nijholt and published in 2017 in the same book series, Gaming Media and Social Effects.

Drawing on contributions from practicing artists, writers, curators and academics, *Searching for Art's New Publics* explores the ways in which artists seek to involve, create and engage with new and diverse audiences: from passers-by encountering and participating in the work unexpectedly, to professionals from other disciplines and members of particular communities who bring their own agendas to the work. Bridging the gap between practice and theory, this exciting book touches on issues of relational aesthetics, but also offers an illustrated artist-based approach. *Searching for Art's New Publics* will appeal to students studying fine art (especially those with an interest in

I highly recommend it!" ~ Edward James Olmos, film and stage actor, and head of latino reading programs in Los Angeles. William Cumming began as a self-taught artist who grew up in Tukwila, a small town outside Seattle. In 1937, at the age of twenty, he met Morris Graves, who was at that time working in Seattle for the Federal Art project of the Works Progress Administration. Through Graves he soon became part of the circle of friends who came to be known as the Northwest School of artists: Mark Tobey, then nearing fifty, the patriarchal leader of the group; Kenneth Callahan and his wife Margaret, a writer and critic who became Cumming's particular mentor; Guy Anderson, Lubin Petric, and others. He has

taught for many years at the Art Institute of Seattle and Cornish College of the Arts. "Bill Cumming is at once an exceptional and successful regional artist and one of the most erudite, perceptive, and entertainingly cantankerous characters in this part of the world. [He] tells what it was like to be an artist in the Great Depression, tells tales out of school about such international luminaries as Mark Tobey and Morris Graves, tells how the Northwest School (of which he was the youngest member) developed, tells about the early success -- and ultimate failure -- of the Communist movement in the Far West, and shows how the political, economic, and cultural events of a half-century affected the life of a region and of its creative minority. Cumming is a natural raconteur, equipped with more literary wit and charm than most professional writers." -- Tom Robbins

"Besides being one of the Northwest's best painters, Bill Cumming has certainly had a knack for being, historically speaking, in the right place at the right time. Beyond being good local history, his Sketchbook is a moving, sometimes chillingly perceptive, and certainly fascinating glimpse into the nature of artists themselves." -- Wesley Wehr
