Abstract: In this paper I argue that corporate finance theory, empirical research, practical applications, and policy recommendations are deeply rooted in an underlying theory of the firm. I also argue that while the existing theories have delivered very important and useful insights, they seem to be quite ineffective in helping us cope with the new type of firms that are emerging. I outline the characteristics that a new theory of the firm should satisfy and how such a theory could change the way we do corporate finance, both theoretically and empirically.

The study of kinship is a fundamental part of the study and the practice of social anthropology. This volume examines the work of three distinguished anthropologists that bear on kinship.

"The array of contributions offered in this volume on the growth of economics, is comprehensive. There are sufficient number of ideas and perspectives about economic theories to whet the appetite of the most scholars or readers. Others, more inclined to welcome efforts to explain economic phenomena, will find a diversity of interpretations of events which should be sufficient to stimulate the imagination as well as the understanding of policy choices." "The book offers insights about developments in economic theory and modes of analysis during the twentieth century and earlier." --Book Jacket.
