Proceedings of a hearing concerning the Environmental Protection Agency's (EPA's) administration of the Asbestos in School Program are presented in this report.

Specifically, the hearing's purpose was to examine the EPA's progress in implementing the Asbestos Hazardous Emergency Response Act (AHERA), wherein the agency was responsible for providing guidance regarding the removal of asbestos from public schools. The report contains statements, letters, and testimonies of EPA and AFL-CIO representatives, and Hall-Kimbrell Environment Services, a company fined by the EPA for failure to consider sheetrock and hard plaster wall systems as potential containers of asbestos. Details are provided about the passage of AHERA and its requirements, the Canadian wallboard issue, and the EPA's "100 Questions" document released to schools. (LMI)

Many countries have already taken action at a national level to prohibit the use of all forms of

asbestos to limit exposure and so control prevent and ultimately eliminate asbestos-related diseases from which at least 107 000 people die each year globally. However there are other countries that for a range of reasons have yet to act in the same manner. With that in mind the prime intent of this publication is to assist Member States of the World Health Organization (WHO) in making informed decisions about management of the health risks attached to exposure to chrysotile asbestos. The document is divided into three parts. The first part reproduces a WHO short information document for decision-makers on the elimination of asbestos-related diseases updated in March 2014. The second part addresses questions commonly raised in policy discussions specifically to assist decision-makers in coming to a view. The third part is a technical summary of the health effects of chrysotile which brings together and summarizes for the first time the most recent authoritative WHO evaluations performed by its International Agency for Research on Cancer and its International Programme on Chemical Safety. The technical summary also reviews results from key studies published after those evaluations and then briefly the conclusions drawn from WHO assessments of alternatives. This publication will be useful to ministers government officials and others who may wish or need to take decisions on or provide advice related to asbestos and in particular chrysotile asbestos and the health consequences of exposure.

Asbestos and Disease provides a much-needed comprehensive compendium and presentation of accumulated information on asbestos and disease. Organized into five parts, this book begins with the nature, occurrence, properties, mining, milling, manufacturing, and use of asbestos minerals. Some chapters follow on the identification, quantification, and environmental distribution of asbestos fibers. This book also tackles the asbestotic and
