Thailand's position during the Cold War was ambiguous: the country's political leadership was very keen to maintain the country's independence on the world stage, yet at the same time was anxious to establish the country's credentials as staunchly anti-communist. However, as this book argues, Thailand, though never formally a client state of the United States, was very closely embedded in the Western camp through the commitment of Thailand's cosmopolitan urban communities to developing a modern, consumerist lifestyle. Considering popular culture, including film, literature, fashion, tourism and attitudes towards Buddhism, the book shows how an ideology of consumerism and integration into a "free world" culture centred in the United States gradually took hold and became firmly established, and how this popular culture and ideology was fundamental in determining Thailand's international political alignment. Written by an established expert on Thailand, this is one of the first books to fully investigate the Thai media's role during the Thaksin government's first term. Incorporating political economy and media theory, the book provides a unique insight into globalization in Southeast Asia, analyzing the role of communications and media in regional cultural politics. Examining the period from the mid 1990s, Lewis makes a sustained comparison between Thailand and its neighbouring countries in relation to the media, business, politics and popular culture. Covering issues including business development, tourism, the Thai movie industry and the war on terror, the book argues that globalization as it relates to media, can be patterned on Thai experiences.

The ethnic Chinese in Indonesia, numbering more than six millions, constitute the

largest single group of ethnic Chinese in Southeast Asia. They are economically strong, culturally diversified, and socially active. This book presents the profiles of leading figures in the Indonesian Chinese community in the twentieth century in the economic, political, religious, cultural, academic, and social fields. This is the first systematic and comprehensive book of its kind. It is useful for scholars interested in research on Indonesia or Chinese minorities in Southeast Asia generally. First published in 1971, it was revised and developed into the present format in 1978 and has since been revised several times. This is the third and most up-to-date version.

Why are there so few Muslim terrorists? With more than a billion Muslims in the world-many of whom supposedly hate the West and ardently desire martyrdom-why don't we see terrorist attacks every day? Where are the missing martyrs? These questions may seem counterintuitive, in light of the death and devastation that terrorists have wrought around the world. But the scale of violence, outside of civil war zones, has been far lower than the waves of attacks that the world feared in the wake of 9/11. Terrorists' own publications complain about Muslims' failure to join their cause. *The Missing Martyrs* draws on government sources and revolutionary publications, public opinion surveys and election results, historical documents and in-depth interviews with Muslims in the Middle East and around the world to examine barriers to terrorist recruitment, including liberal Islam, revolutionary rivalries, and an inelastic demand for U.S. foreign policy. This revised edition, updated to include the self-proclaimed "Islamic State," concludes that fear of terrorism should be brought into alignment with the actual level of threat, and that government policies and public opinion should be based on evidence rather than alarmist hyperbole.

In *Human Rights and Participatory Politics in Southeast Asia*, Catherine Renshaw recounts an extraordinary period of human rights institution-building in Southeast Asia. She begins her account in 2007, when the ten members of the Association of Southeast Asian Nations (ASEAN) signed the ASEAN charter, committing members for the first time to principles of human rights, democracy, and the rule of law. In 2009, the ASEAN Intergovernmental Commission on Human Rights was established with a mandate to uphold internationally recognized human rights standards. In 2013, the ASEAN Human Rights Declaration was adopted as a framework for human rights cooperation in the region and a mechanism for ASEAN community building. Renshaw explains why these developments emerged when they did and assesses the impact of these institutions in the first decade of their existence. In her examination of ASEAN, Renshaw asks how human rights can be implemented in and between states that are politically diverse—Vietnam and Laos are Communist; Brunei Darussalam is an Islamic sultanate; Myanmar is in transition from a military dictatorship; the Philippines and Indonesia are established multiparty democracies; while the remaining members are less easily defined. Renshaw cautions that ASEAN is limited in its ability to shape the practices of its members because it lacks a preponderance of democratic states. However, she concludes that, in the absence of a global legalized human rights order, the most significant practical advancements in the promotion of human rights have emerged from regional institutions such as the ASEAN.

This interdisciplinary book offers a critical analysis of Thai education and its evolution, providing diverse perspectives and theoretical frameworks. In the past five decades Thailand has seen impressive economic success and it is now a middle-income country that provides development assistance to poorer countries. However, educational and social development have lagged considerably behind its globally recognized economic success. This comprehensive book covers each

level of education, such as higher and vocational/technical education, and such topics as internationalization, inequalities and disparities, alternative education, non-formal and informal education, multilingual education, educational policy and planning, and educational assessment. The 25 Thai and 8 international contributors to the volume include well-known academics and practitioners. Thai education involves numerous paradoxes, which are identified and explained. While Thailand has impressively expanded its educational system quantitatively with much massification, quality problems persist at all levels. As such, the final policy-oriented summary chapter suggests strategies to enable Thailand to escape “the middle income trap” and enhance the quality of its education to ensure its long-term developmental success.
