The Tenth Edition of Auditing continues to provide students a balanced presentation of auditing concepts and procedures. The text reflects the challenges inherent in accounting and auditing practice, particularly in public accounting firms. The text is designed to

provide flexibility for instructors; the thirteen chapters focus on the Auditing Process while the eight modules provide additional topics. There are three main approaches to teaching auditing, which you need to understand to match customer needs with our texts: 1. The Balance Sheet Approach-smallest market segment and more traditional, which teaches the audit procedures by using the individual balance sheet (and related income statement) accounts. Our Whittington/ Pany text is the only one left in this segment. 2. The Audit Risk Model. This is an emerging area in auditing that considers audit risk, which is the probability that an auditor will give an inappropriate opinion on financial statements. 3. The Cycles Approach, which was first introduced by the market-leading textbook written by Arens/Loebbecke (Prentice Hall). Cycles are sets of accounts and business activities that go together in an accounting system. This is where Robertson fits in the market.

Designed for courses in auditing, this easy-to-understand text provides the core auditing concepts (but in a concise edition) of Arens, Elder and Beasley's Auditing and Assurance Services. It offers complete step-by-step coverage of the entire audit process. An integrated and modern approach to auditing. Auditing, Assurance Services and Ethics by Arens presents an integrated concepts approach that shows students the auditing process from start to finish and encourages critical thinking. Engaging, integrated case studies, extended coverage of key issues and fresh four-colour internals ensure that Arens is the most relevant and comprehensive resource for auditing students available today. The new 9th edition incorporates recently issued auditing standards and developments in legislation.

Auditing, Assurance Services and Ethics in Australia is a confidence-building way of learning the roles and legal responsibilities of a professional auditor. This book and software package perfectly is suited to a 12 week course Designed for undergraduate or postgraduate students seeking professional recognition from associations such as CPA, ICAA, IPA and ACAA. Covers essential theory and best practices in auditing in 19 chapters, with up to date references to all recently issued auditing standards and relevant legislation Experience planning and completing an audit through stimulating integrated case studies with financial statements included Practice realistic computer-assisted auditing techniques with the ACL software provided with each new copy of the text. Auditing, Assurance Services and Ethics in Australia is the most authentic and practical resource for auditing students available today.

We do not believe students must memorize 800 pages of review to pass a college-level Auditing course. And, given fewer pages, we find that students have greater retention. Our book is intended as a substitute for the following: Auditing and Assurance Services, Arens & Elder Auditing and Assurance Services, Sinason & Blay Auditing and Assurance Services, Louwers Auditing and Assurance Services: A Systematic Approach, Messier & Glover Principles of Auditing and Other Assurance Services, Whittington & Pany Note: Our book will prepare you for the final exam, but you may still have to purchase the textbook to fulfill course requirements. To lighten our books, we use wider page margins, decrease font, and eliminate redundancy. We use tables because they structure and compare information efficiently. We teach with examples. And we improve the quality of our writing. The result is Auditing and Assurance in 28 pages.
