From a review in the Australian Law Journal:"This book is a delightful surprise, for within its bare title the authors have covered the law concerning powers of attorney on both sides of the Tasman. The text is written in a clear and lucid fashion. It is well laid out, and provides in convenient form the texts of the relevant legislation applying throughout Australia and in New Zealand. It provides an accurate summary of the law as applying at the end of 1992. The index is unusually comprehensive, and the coverage of this area of law is thoroughly professional. It should prove to be a most useful text for practitioners in areas of company law, probate, and family law who will appreciate the specimen forms and clauses offered. It is so wide in its potential utility that (given its sensible price) it should be on every solicitor's bookshelf."

Make introductory psychology modern and accessible! Strike a balance between classic and contemporary topics and theory. The new edition of this text engages students with local ideas and examples, within the context of psychology as an international discipline. Rich cultural and indigenous coverage is integrated throughout the text, as well as new chapters, 'Indigenous psychology', and 'Culture and psychology'. There is also the continued, and unique focus throughout the text on graduate attributes for accreditation, careers in psychology and the professional discipline of psychology. Linkages features in the text knit together student

understanding of psychology's sub-disciplines, and the research sections show the how and why of research. World class learning technology available with Bernstein includes CourseMate Express, and a new MindTap.

The History of Philosophy in Australia and New Zealand is a comprehensive account of the historical development of philosophy in Australia and New Zealand, from the establishment of the first Philosophy Chair in Australasia in 1886 at the University of Melbourne to the current burgeoning of Australasian philosophy. The work is divided into two broad sections, the first providing an account of significant developments and events during various periods in the history of Australasian philosophy, and the second focusing on ideas and theories that have been influential in various disciplines within Australasian philosophy. The work consists of chapters contributed by various philosophers, on specific fields of inquiry or historical periods within Australasian philosophy.

Using a production function method, this paper assesses the impact of the global crisis on the potential growth of Australia and New Zealand. The two countries have not been hit hard by the global crisis, but have large net external liabilities. The paper finds that the main negative impact of the global crisis is likely to come through higher costs of capital, offset partly by a higher return to capital from strong demand for commodities by emerging Asia. It estimates medium-term potential growth of about 3 percent for Australia and 2. percent for New Zealand, higher than that of many other advanced

economies.

The beach houses featured in this book are as diverse as the architects and the climates around both of these countries.

This first edition of Sport Business Management in New Zealand and Australia builds on the previous texts which solely focused on New Zealand, and reflects the significant changes that have taken place within the sport industry in New Zealand and Australia since 2006. The goal of this book is to provide students of sport management with a clear understanding of sport within the New Zealand and Australian context, to establish a grounding in the key management concepts applicable to managing sport, and provide some practical knowledge to assist them once they leave their course of study.

This book features current research on human development, as well as a focus on the cultural diversity that exists around the world, with particular attention to Australia and New Zealand.

It is often asserted that the ruling elite in Western capitalist economies now consists of liberal intellectuals and their media sympathisers. By contrast, this book looks at the real elite in Australian and New Zealand society and shows that there is still a ruling class based upon economic dominance. From an analysis of corporate and public records, interviews, and other primary and secondary data, it develops a picture of networks of power that are changing but are as real as any network in the past.

Disasters in Australia and New Zealand brings together a collection of essays on the history of disasters in both countries. Leading experts provide a timely interrogation of long-held assumptions about the impacts of bushfires, floods, cyclones and earthquakes, exploring the blurred line between nature and culture, asking what are the anthropogenic causes of 'natural' disasters? How have disasters been remembered or forgotten? And how have societies over generations responded to or understood disaster? As climate change escalates disaster risk in Australia, New Zealand and around the world, these questions have assumed greater urgency. This unique collection poses a challenge to learn from past experiences and to implement behavioural and policy change. Rich in oral history and archival research, Disasters in Australia and New Zealand offers practical and illuminating insights that will appeal to historians and disaster scholars across multiple disciplines.

Australia and New Zealand from Whale Rider to The Piano to Wolf Creek. This book provides an up-to-date and well-grounded analysis of education in Australia, New Zealand and the Pacific, including the Cook Islands, Federated States of Micronesia, Fiji, Kiribati, the Marshall Islands, Papua New Guinea, Samoa, the Solomon Islands, Tonga, Tuvalu, and Vanuatu. Leading writers from throughout this region identify contemporary educational challenges, issues, and priorities while drawing upon their own ongoing empirical research. Key themes include the impact of international trends and developments; educational reform and the quality of education; indigenous learning; inclusivity; aid and development co-operation; and the changing role and place of tertiary education. Detailed studies of specific educational systems and developments are considered in the light of broader analyses that run throughout the volume.

In the late nineteenth century on the eve of the formation of Australia as a nation-state in 1902, the Australian medical system could be best described as a pluralistic one in the sense that while regular medicine constituted the predominant medical system, it was not clearly the dominant one in that regular physicians faced competition from a wide array of alternative practitioners. As regular medicine increasingly assumed the

guise of being scientific, it evolved into biomedicine and developed a link with corporate and state interests in the early twentieth century in Australia, as in other capitalist developed societies. Relying upon state support, Australian biomedicine has achieved dominance over alternative medical system, such as homeopathy, herbal medicine, osteopathy, chiropractic, and naturopathy. Various social forces, particularly the development of the holistic health movement, have served to challenge biomedical dominance in Australia, like elsewhere. What started out as a popular health movement in the early 1970s has evolved into the professionalized entity that is generally referred to as 'complementary medicine' in Australia (as opposed to 'complementary and alternative medicine' in the US and UK). Complementary medicine in Australia encompasses many medical systems and therapies. Since the 1980s certain heterodox medical systems, particularly chiropractic, osteopathy, acupuncture and Chinese medicine, naturopathy, Western herbalism, and homeopathy, have achieved considerable recognition from the Australian state, either at the federal level or at the state and territorial levels. Indeed, the Australian state appears to have gone further than any other Anglophone country in terms of providing public funding for complementary medicine education. Conversely, it has committed a limited amount of funding for complementary medicine research compared to the United States. From The Story of the Kelly Gang in 1906 to the Lord of the Rings trilogy, Australia and New Zealand have made a unique impact on international cinema. This book celebrates the

commercially successful narrative feature films produced by these cultures as well as key documentaries, shorts, and independent films. It also invokes issues involving national identity, race, history, and the ability of two small film cultures to survive the economic and cultural threat of Hollywood. Chapters on well known films and directors, such as *The Year of Living Dangerously* (Peter Weir, 1982), *The Piano* (Jane Campion, 1993), *Fellowship of the Ring* (Peter Jackson, 2001), and *Rabbit Proof Fence* (Philip Noyce, 2002), are included with less popular but equally important films and filmmakers, such as *Jedda* (Charles Chauvel, 1955), *They're a Weird Mob* (Michael Powell, 1966), *Vigil* (Vincent Ward, 1984), and *The Goddess of 1967* (Clara Law, 2000).
