Sexed (Sex'd) - Hardwired by Nature –Evolving by Choice is a first of a kind book, about the sexual hardwiring of the heterosexual male. While shining a spotlight on some of the predicaments of heterosexual male sexuality, it takes a deep archeological dive into the meeting place of sex, consciousness, biology and intimacy .In so doing it offers a granular look at the impact of our sexual hardwiring on our lived experience as men, far beyond comedy and caricature or the superficial conversations society has thus far offered us. Sexed – offered both as a reference for therapists and a personal study guide for the curious and evolving, and brings the reader closer to a more crystalized sense of sexual self-agency, access to intimacy and the opportunity to continue to bring the best possible version of himself to his relationship and the world. Of course women readers can benefit too by gaining insight into the development and inner workings of the heterosexual man’s mind and a broader understanding as to why the hardwiring and its impact has proven to be somewhat trans historical and transcultural .

Buku ini menjabarkan dengan ringkas dan sederhana mengenai konsep pola pikir dan keahlian geospasial serta domain sistem informasi dan teknologi komputer yang menjadi pondasi dari kajian geoinformatika. Beberapa contoh kasus dan implementasi dari studi geoinformatika juga disajikan dengan ilustrasi gambar yang membuat pembaca menjadi lebih mudah dalam memahami issue yang ada.

Jeden Tag erreichen uns Bilder, Fotos und Videos über Konflikte und Krisen, die unsere Vorstellung und unser (vermeintliches) Wissen über Weltpolitik prägen. Die sprichwörtliche „Macht der Bilder“ und die Bedeutung von Visualität sind unter den Bedingungen moderner, globalisierter Kommunikation unzweifelhaft gestiegen. Die Flut an visuellen Daten stellt die Politikwissenschaft allgemein und insbesondere die Disziplin der Internationalen Beziehungen jedoch vor grundlegende theoretische, methodologische und forschungspraktische Herausforderungen. Die Beiträge des Sammelbandes adressieren diese Herausforderungen aus unterschiedlichen Perspektiven und bieten Leser*innen Einblicke in die Theorie und Praxis der Analyse von Visualität und Weltpolitik.

Thinking with Maps takes readers on a journey through both traditional and modern mapping in order to learn how to conceive of mapping as fundamental to cognition and, thus, to what it means to be human. Each chapter considers an aspect of how we use maps. Examples from around the world show how learning can be made more relevant.

This book provides information literacy practitioners with a thorough exploration of how threshold concepts can be applied to information literacy, identifying the important elements and connections between each concept and relating theory to practical methods that can transform how librarians teach. • Provides an essential, foundational text on the theory behind the new ACRL Framework for Information Literacy • Supplies librarians with the context to frame the work they do with information literacy in the same manner as faculty • Demonstrates how librarians sharing pedagogical approaches with faculty enable more cooperative projects, better faculty-librarian communication, and truly integrated librarian instruction
Differential geometry of curves and surfaces
Geographisches Denken hat zu jeder Zeit die Vorstellungen der Menschen von der Welt geprägt. Im weiten Spektrum von Landschafts- und Länderkunde, Regional-, Stadt-, Wirtschafts- und Sozialgeographie sind die Zeitebenen allerdings ineinander verschlungen und beeinflussen sich gegenseitig. "Weltbildwechsel" ist eine zeitgemäße Einführung in diese spannende Geschichte des Fachs Geographie.

This book is the first to undertake a gendered analysis of geoengineering and alternative energy sources. Are either of these technologies sufficiently attendant to gender issues? Do they incorporate feminist values as articulated by the renowned social philosopher Helen Longino, such as empirical adequacy, novelty, heterogeneity, complexity and applicability to human needs? The overarching argument in this book contends that, while mitigation strategies like solar and wind energy go much further to meet feminist objectives and virtues, geoengineering is not consistent with the values of justice as articulated in Longino's feminist approach to science. This book provides a novel, feminist argument in support of pursuing alternative energy in the place of geoengineering. It provides an invaluable contribution for academics and students working in the areas of gender, science and climate change as well as policy makers interested in innovative ways of taking up climate change mitigation and gender.

All leaders are constrained by geography. Their choices are limited by mountains, rivers, seas and concrete. Yes, to understand world events you need to understand people, ideas and movements - but if you don't know geography, you'll never have the full picture. To understand Putin's actions, for example, it is essential to consider that, to be a world power, Russia must have a navy. And if its ports freeze for six months each year then it must have access to a warm water port - hence, the annexation of Crimea was the only option for Putin. To understand the Middle East, it is crucial to know that geography is the reason why countries have logically been shaped as they are - and this is why invented countries (e.g. Syria, Iraq, Libya) will not survive as nation states. Spread over ten chapters (covering Russia; China; the USA; Latin America; the Middle East; Africa; India and Pakistan; Europe; Japan and Korea; and Greenland and the Arctic), using maps, essays and occasionally the personal experiences of the widely traveled author, Prisoners of Geography looks at the past, present and future to offer an essential guide to one of the major determining factors in world history.

How can we think more deeply about our travels? This was the question that inspired Emily Thomas' journey into the philosophy of travel. Part philosophical ramble, part travelogue, The Meaning of Travel begins in the Age of Discovery, when philosophers first started taking travel seriously. It meanders forward to consider Montaigne on otherness, John Locke on cannibals, and Henry Thoreau on wilderness. On our travels with Thomas, we discover the dark side of maps, how the philosophy of space fuelled mountain tourism, and why you should wash underwear in woodland cabins... We also confront profound issues, such as the ethics of 'doom tourism' (travel to 'doomed' glaciers and coral reefs), and the effect of space travel on human significance in a leviathan universe. The first ever exploration of the places where history and philosophy meet, this book will reshape your understanding of travel.
