Adapted from a modular undergraduate course on computational mathematics, Concise Computer Mathematics delivers an easily accessible, self-contained introduction to the basic notions of mathematics necessary for a computer science degree. The text reflects the need to quickly introduce students from a variety of educational backgrounds to a number of essential mathematical concepts. The material is divided into four units: discrete mathematics (sets, relations, functions), logic (Boolean types, truth tables, proofs), linear algebra (vectors, matrices and graphics), and special topics (graph theory, number theory, basic elements of calculus). The chapters contain a brief theoretical presentation of the topic, followed by a selection of problems (which are direct applications of the theory) and additional supplementary problems (which may require a bit more work). Each chapter ends with answers or worked solutions for all of the problems.

Keeping the Essence in Sight is an invitation to become a better teacher. To remember the essence of teaching, why we go into the classroom in the first place: To teach our students to communicate in the English language. We don't become teachers so that we can grade tests, or fulfill national educational plans, or deal with difficult students, although teachers do all those things and more. We become teachers

because we love teaching and we love our students. The book is based on Sharon Hartle's renowned blog comprised of reflections on her teaching experience, and organized into four sections: Learning, Teaching, Testing, and Professional Development. Within each section she addresses key questions in ELT, such as: How can we motivate learners to want to learn and develop learner autonomy? What are the best ways to integrate technology into my lessons? Should we think about blended teaching instead of blended learning? Can we improve our teaching and our assessment if we change our model of English? What are some easy and accessible ways to do professional development? And most importantly, how can we be better teachers.
