How Eskimos Keep Their Babies Warm is the perfect read for fans of bestselling parenting book French Children Don't Throw Food. 'A captivating book, filled with some genuinely useful (and jaw-dropping) child-rearing tips from all over the world' Amy Chua, author of Battle Hymn of the Tiger Mother For any parent weary of the so-called 'expert advice' peddled in books and on TV, How Eskimos Keep Their Babies Warm lifts the lid on how other cultures parent their children, with some interesting - and surprising - insights. Mei-Ling Hopgood explores how mums and dads in other countries approach such issues as bedtime, potty training, healthy eating and playtime squabbles and offers some fascinating new perspectives on how to do things. This inspiring, engaging and fun read proves that there are many ways to be a good parent - and more than one way to raise a child.

babies." What are the ethical concerns in this practice? Is it wrong for parents to pick and choose the traits they want in their baby? Is there ever a good reason to do it? Meticulously researched and warmly presented, the most authoritative and persuasive guide to attachment parenting When it comes to early parenting, scientific evidence points time and again to the bond between parent and child as a critical factor in a baby's health and wellbeing. Backed by more than 1,200 trusted sources, this breakthrough guide reveals the many little-known advantages that only a responsive, nurturing parenting style can provide: Surprising evidence on the benefits of breastfeeding How attentiveness and touch impacts permanent brain development in infants Under-reported facts about how to reduce colic, food allergies, and illness Why sharing sleep is both safe and natural How to reduce future teen-year stress by bonding with your young child early At the forefront of a passionate, growing movement called "attachment parenting," this warmly presented guide is a rare overview of information too often missing from parenting circles, pediatric offices, and financially motivated product promotions. Why Attachment Parenting? Cultures around the world that practice more natural forms of parenting have healthier infants who cry much less, toddlers who do not exhibit "terrible twos," generally respectful teenagers, and independent adults who participate in family matters. A well-controlled study found sleeping outside of the parents' room brought 10.5 times the risk of SIDS as sleeping in the parents' room. Studies have shown that infants who receive frequent physical

affection have lower overall levels of stress. In the United States and other industrialized countries, the infant death rate for formula-fed infants is twice that of exclusively breastfed babies. — Excerpt from *The Baby Bond* — Most would agree that children probably do not consciously remember the way they were treated during early infancy. Many recount this observation as support or comfort for their ideas about ignoring babies' cries for attention and providing minimal stimulation. Yet, it can be shown that while the specifics may be lost, unconscious memories are developed on the neurological and biochemical level from birth—a baby's brain develops from day one according to its environment. Childhood, adolescence, and adulthood are all affected by this early programming. And, as far as the coveted independence goes, it has been shown that those who receive the most affection early on display the highest levels of independence as adults. —Praise for *The Baby Bond* — "Babies would tell you to buy this book!" Jan Hunt, MSc | Author of *The Natural Child: Parenting from the Heart* "An instant classic. A must-read for all parents. Dr. Palmer's book is the best book on the hard science behind attachment parenting that I've ever read. I wish I had read this book before I became a mother." Katie Allison | Author of *Attachment Parenting* "Well researched and hard hitting...unabashedly tells the truth about so many very important issues." In the late 1990s, Egypt experienced a boom period in in vitro fertilization (IVF) technology and now boasts more IVF clinics than neighboring Israel. In this book, Marcia Inhorn writes of her fieldwork among affluent, elite couples who sought in vitro fertilization in Egypt, a country which is not only at the forefront of IVF technology in the Middle East, but also a center of Islamic education in the region. Inhorn examines the gender, scientific, religious and cultural ramifications of the transfer of IVF technology from Euro-American points of origin to Egypt - showing how cultural ideas reshape the use of this technology and in turn, how the technology is reshaping cultural ideas in Egypt.

explored in detail. Written in an accessible and frequently humorous way, Dr Chilton explains the fundamentals of parenting based on science and his forty years' experience as a neonatologist. He also explores the fascinating subject of how babies evolved over the millennia, what they perceive and how they are programmed for survival. This expanded edition has new chapters on the introduction of solids, how to play with your baby, and the essential drivers of baby sleep and how to enhance them. Many other chapters have been revised and updated. Dr Chilton's daughter, Georgina Dowden, with whom he collaborates professionally, has extensively rewritten the breastfeeding chapter. She has also contributed many useful additions, with her influence evident throughout the book.
