The sixteen essays assembled in this volume, four of them co-authored, chart the successive phases of a professional life lived in the interstices of Bible and "theory." Engaging such texts as the Song of Songs, 4 Maccabees, Mark, Luke-Acts, John, and Romans, and such themes as the quest for the historical Jesus, the essays simultaneously traverse postmodernism, deconstruction, New Historicism, autobiographical criticism, cultural studies, postcolonial studies, masculinity studies, queer theory, and "posttheory." Individual essay introductions and periodic annotated bibliographies make the volume an advanced introduction to biblical literary criticism.

This book explores the relationship between the Bible and the world of music, an association that is recorded from ancient times in the Old Testament, and one that has continued to characterize the cultural self-expression of Western Civilization ever since. The study surveys the emergence of this close relationship in the era following the end of the Roman Empire and through the Middle Ages, taking particular note of the role of Gregorian chant, folk music and the popularity of mystery, morality and passion plays in reflection of the Sacred Scripture and its themes during those times. With the emergence of polyphony and the advent of the Reformation in the sixteenth century, the interaction between the Bible and music increased dramatically, culminating in the

evolution of opera and oratorio as specific genres during the Renaissance and the Early Baroque period. Both these genres have proved essential to the interplay between sacred revelation and the various types of music that have come to determine cultural expression in the history of Europe. The book initially provides an overview of how the various themes and types of Biblical literature have been explored in the story of Western music. It then looks closely at the role of oratorio and opera over four centuries, considering the most famous and striking examples and considering how the music has responded in different ages to the sacred text and narrative. The last chapter examines how biblical theology has been used to dramatic purpose in a particular operatic genre – that of French Grand Opera. The academic apparatus includes an iconography, a detailed bibliography and an index of biblical and musical references, themes and subjects.

In Depth Psychology, Interpretation, and the Bible Brayton Polka shows that the ideas central to Freud's major texts can be truly understood only in light of a theory of interpretation whose ontology is consistent with biblical values. Polka argues that only this hermeneutic frees Freud's insight into the phenomenology of the unconscious from his contradictory metapsychology.
