

## Basu And Das Cost Accounting Books

Knowledge about the magnitude of the cost of capital invested in an asset and its determinants is essential for analysis of corporate investment decisions and profitability. This book provides a clear conceptual understanding of the cost of capital and a critical, comprehensive, and up-to-date evaluation of the practical means available to estimate its magnitude. In-depth discussions of the theoretical and empirical basis for the frequently-used DCF and CAPM methods, and practical advice for their implementation are included. The book is intended primarily for professional managers, but will also be useful for future managers in advanced capital budgeting courses.

Since 1957, Malaysia’s economic development has been an account of growth, transformation, and of structural change. More than 75 per cent of its gross domestic product (GDP) comes from the manufacturing and services sectors. However, Malaysia is stuck in a middle-income trap and is facing challenges on the economic and political front. In June 2010, Prime Minister Najib Razak unveiled the 10th Malaysian Plan (2011-15) to chart the development of Malaysia from a middle- to high-income nation. This publication represents a policy-oriented stocktake and evaluation by academics, policy-makers, and business people on Malaysia’s achievements, present work-in-progress endeavours, and some of the future challenges facing the nation in its pursuit to achieve a developed high-income country status.

This compact and concise textbook, in its second edition, gives clear analyses of the principles and practices of management control systems being practised by the companies all over the world. Divided into seven sections, the book explains various approaches and designs of management control system. It then moves on to give a detailed description of key success variables as control indicators and explains goals, strategies and organization for adaptive control, divisional autonomy and responsibility. While describing the management tools and processes, the book explains in detail, the strategic planning and programming processes, budgeting and budgetary control, standard costing and variance analysis, transfer pricing, reward system and management control of operations. The new edition is thoroughly updated and a new chapter on Managerial Decision-Making is added to it. The chapter is added to demonstrate with examples how managerial decisions are taken by the organizations as a part of management control exercise by the application of marginal costing techniques. Primarily intended for the postgraduate students of management, the book can be equally beneficial for the commerce students, researchers, accounts professionals, and corporate policy and decision makers.
