

## Be Quiet

In 1836, Irving published "Astoria ; or, Anecdotes of an Enterprise beyond the Rocky Mountains ;" a somewhat curious example of literary skill. A voluminous commercial correspondence was the dull ore of the earth which he refined and wrought into symmetry and splendor. Irving reduced to a regular narrative the events to which it referred, bringing out the picturesque whenever he found it, and enlivening the whole with touches of his native humor. His nephew, Pierre M. Irving, lightened his labor materially by examining and collating the letters and making memoranda of their contents. The author has had over forty years' experience handling stock in the Australian outback and has frequently appeared on ABC television. Contains many illustrations, a bibliography and an index.

Experts from all over the world take a critical, highly international and often controversial perspective on the ADHD phenomenon – a condition that has reached global proportions, significantly affecting the lives of children, parents and teachers worldwide. This book raises a number of concerns often not covered by the material currently available to parents and practitioners. Critical New Perspectives on ADHD unpicks the myths surrounding the development of this phenomenon and leaves no stone unturned in its search for answers. An in-depth exploration into the reasons for the emergence and maintenance of ADHD lead to suggested explanations of the dominance of US psychiatric models and the need for new markets for major pharmaceutical companies, as well as the functions that ADHD diagnoses fulfil in families, classrooms and communities. In a world where moves to educational inclusion are paradoxically paralleled by the ever-increasing use of medication to control children's behaviour, this book scrutinises current accepted practice and offers alternative perspectives and strategies for teachers and other education professionals. This is an invaluable resource for anyone with a serious interest in ADHD and other behavioural
