Sports betting: Earn with 10.00 stakes more than 5,000.00 per year! The ROI is over 50%
The Betting Exchange is a new investment opportunity for traders and advanced bettors who want to do sports trading and scalping or simply place classic bets, but with the opportunity to drop out at any time through the cash out option. This book explains in a simple but in-depth and exhaustive way all you need to know about the Betting Exchange world-wide, allowing anyone, novices and experts, after careful reading, to start operating successfully in this field. There are chapters dedicated to money management, psychology, sports trading, scalping and the most profitable strategies. There are examples of real bets and practical explanations of the most effective tools such as Betpractice, the tool for calculating the real odds. This book also protects copyright and the "continuous theft of material" on the sites of www.bettingexchange.net network. The preface is by Massimiliano Bancora, former Country Manager at Betfair Italia.

A value trading system that really works: Steady and continuous bank builder
Grab the best odds - don't just take the first offers
Level your winnings across all possible results
Set and forget - once desired stake is matched
Extremely mild recovery process on losing trades - where value can be recovered
Real trades explained in detail
Images to demonstrate every step
Completed spreadsheets
Results, adjustments and re-investment
Just a little bit of math
Trade like a pro - multiple matches at the same time
Set and forget with days in advance
No need to waste time on watching the match
We will use Betfair Exchange for demonstration purposes. There are other Sports Exchange sites - Smarkets, Matchbook, BetDaq - but Betfair is far ahead on number of users and amounts of money coming into play - liquidity. If you do not know how a Sports Betting Exchange works compared to usual Bookmakers - now is the time to do some research and learn. This Guide is not about that. Focus on: better odds, difference between Backing and Laying, Matched and Un-Matched bet, keeping an offer until matched, levelling profits across all results, how Double Chance works... We will keep this short and relevant, not to miss on any of the important details. No need to know the history of sports exchanges but only how they work - odds movement and value turning in your favour or not. When to go in and when to get out for a profit. Images at every step with real trades - also spreadsheets with how to keep track of your winnings and small recovery strategy on losing trades. See trading football Double Chance as any value trading: Stock, Forex, Cryptocurrencies, Gold... only that values change a lot faster - pre and during match duration. Nothing to do with betting, finding winners or losers - only "playing" the value/odds. This is a way of doing business and money management.

The one Strategy everyone is talking about but very few apply correctly. Profits between 8-35% on every trade: Steady and continuous bank builder - all ends covered
Grab the best odds with Bookie and Exchange - don't just take the first offers
Level your winnings across all possible results
Set and forget - once desired fixtures and stakes are matched
Extremely mild recovery process on non-profit ACCAs or Exchange trades - where value can be recovered
Real Accumulators and trades explained in detail
Images to demonstrate every step
Completed spreadsheets
Results, adjustment and re-investment
Just a little bit of math
Trade like a pro - multiple Accumulators and matches at the same time
Set and forget with days in advance
No need to waste time on watching football matches
We will go with Bet365 and Betfair Exchange as our weapons of choice. Bet365 is a Worldwide leading online Bookmaker, and their odds are quite decent. But any Bookie that offers Football / Soccer Accumulator bets at good odds can be used without any problems. There are other Sports Exchange sites but Betfair is far ahead on number of users and amounts of money coming into play - liquidity. Trading the Betfair and sporting markets in-play is rapidly growing in popularity thanks to the increased sporting coverage available on many different satellite and cable channels. Many people start by just using Betfair to obtain better odds than those available at the traditional bookmakers. They then perhaps do a little more research and learn to trade the markets, but to make a regular profit a serious, disciplined and planned approach needs to be employed in order to not only win but keep on winning. 'Mastering Betfair' will take the reader through many of the low-risk strategies developed by the author over the past 3 years. The book also aims to highlight to the Betfair user the importance of employing disciplines - such as managing risk - that are normally associated with the financial markets, and indeed it is hoped that the book will also highlight to the financial trader the unique opportunities that are available on Betfair. This is the first book in the series - Betfair Trading Books (This is the extended version). This is the extended version of our first book. Both are available and you are free to buy any of them. The only difference is that this extended version goes into more details with more examples. Let us say this one will be more beneficial to those new to Football trading. This book is one of the best book written on the popular Lay the Draw Trading at Betfair. Lay the draw trading - often abbreviated to LTD - has been around since the early days of Betfair. For many years it was one of the best football trading strategies you could find, but LTD has faced a few problems due to its growth in popularity. A situation where you have everyone doing the same in a perfect market as Betfair, problems were bound to occur. This is why some think the method no longer works. No it still works! But you have got to do it differently from what all the people are doing in order to make it work for you. This is why this book was written. In this book by a full-time Sport Trader, you will learn the right way to use the LTD method in 2018 and going forward. You will learn all the necessary twist and facts to put this method in your favor. You can make money with this book daily trading on the Football matches that are available round the world. Inside the book, you will learn the kind of matches to select to profit highly from the LTD strategy. Not every football match is suitable for the method. Also there are certain things that can go wrong with your trade. The book explains the different scenarios and what you must do if faced by any of such situations. This alone will be a great weapon in your armory as you navigate the landscape as a Trader at Betfair. This must be one of the best book written on how to trade the Draw at Betfair. Get a copy now. Nothing to loose. You get a full refund if you are not satisfied.

Betfair is the world's leading online betting exchange. Launched in 2000, its annual revenues reached £145m in 2006. In the last year, Betfair has more than doubled its number of registered users. Since the first edition of the book was published, the total number of Betfair websites has risen to 18, and an Australian exchange has launched. The services Betfair offer have also expanded, including a telephone betting operation and new games including poker, blackjack and baccarat. This is the definitive insider's guide to playing – and winning – on Betfair. Written by Betfair insiders it gives you the

full picture of how Betfair works; it explains the terms and jargon, helps you get started on the site, introduces every type of play – including poker and the Betfair Casino - and offers tips and insider know-how that both newcomers seasoned Betfair punters can use to maximise returns.

A low risk trading system for medium to high returns: Steady and continuous bank builder with repetitive "entries" and "level-out" pre-set / manually adjusted odds Grab the best odds - don't just take the first offers Level your winnings across all possible results Set and forget - once desired odds and stakes have been matched Extremely mild recovery process on losing trades - where value can be recovered Real trades explained in detail Images to demonstrate every step Completed spreadsheets Results, adjustments and re-investment Just a little bit of math Trade like a pro - multiple matches at the same time Set and forget with days in advance No need to waste time on watching football / soccer matches We live in a heavily digitalised world. In the years to come it will become even more so, no doubt about that. Successful Sports Exchange value traders will remain successful as long as they adapt to new trading environments, behaviours, other traders (or simple punters) habits and the BIG one - how sports markets are influenced by new trading techniques and technologies. And yes, that refers to certain traders using Bots / Software / Programs or Apps - or whatever else you want to call them - to automatically place their in and out trades, to almost always secure a profit. People that are "playing" at a very high level, paying thousands of Pounds / Dollars / Euros in annual subscriptions for Software / Apps and always prepared with finances, available liquidity - very high banks, to enter and exit the markets with thousands if not tens of thousands of Pounds / Dollars / Euros in very swift and strategic movements. Traders that can significantly and sufficiently "influence" a market with their own high liquidity trades, enough to very quickly gain a couple "ticks" in odds movement and get out for a guaranteed substantial profit. Known as Automated Scalping. This is old news and hopefully you will not be surprised to hear about lifelong Stock market traders re-training in operating Sports Exchanges - principles are extremely similar and odds movement happens a lot faster. How can we compete against someone like that? You can think about it in awe, but it might be too soon. Some bookmakers are also covering their markets on Exchanges or level their un-covered value taken on bets from normal punters. Same concept as Matched Betting, they accept bets from people at smaller odds and Hedge against better odds on Exchange, to always make a profit. To give you an even bigger example, whole businesses are now created around Sports Exchanges. Firms employing people to do just that, Sports Value Trading at a commercial level. Imagine a dozen people inside an office, working for an employer, but only doing this, day in - day out. And they will all be traders, trained at using specialised, extremely performant software, with extremely high liquidities available at any point to secure fast interventions and guaranteed profits. So, the next time you will see millions of Pounds / Dollars / Euros matched on just one market of a popular sporting event, you will know why. How can we compete against something like this? The reality is, everyone has a chance, no matter how big or small the amounts you have to invest. But you really, really need to know what you are doing, that specific sport and more importantly - how that specific market works. Yes, odds will shift when a large influx of liquidity is poured into the market as existing odds will be matched between Back and Lay; and you might discover odds are moving against you. We've

only mentioned the above to build momentum on a very important conclusion: markets to eventually settle indifferent of the amounts in play and markets do also become saturated or over-saturated with a realisation that a given outcome was Backed to an exaggerated extent.

Beyer on Speed shows the way, explaining how to relate the numbers to such factors as pace, track bias, and track conditions. It reveals optimal uses of the figures based on computer analysis of more than 10,000 races. Beyer on Speed presents a revolutionary way to play the horses and win. Blending colorful anecdotes with incisive instruction, this is a landmark book by a master handicapper.

For years now the authors of this book have made a full time living from betting on football matches on betting exchanges, the primary one of these sites being Betfair. In this book the authors show how a complete beginner can start from scratch and make consistent profits from using a number of trading systems and betting strategies. Primarily aimed at those new to football trading and to betting exchanges, the book starts with an overview of how betting exchanges work and the mechanics of placing trades on Betfair. This then moves into a

Based on an array of published and hitherto unpublished evidence, the author pinpoints techniques that will aid the bettor in formulating a successful and consistent betting strategy. The whole is presented in an informative but entertaining way, which should appeal to all those interested in betting as a hobby or as a way of earning a second income. Betting to Win covers: * The various forums that are available to UK residents for betting on the myriad of sports events, financial and specialist markets that are currently available. * Covers the wide variety of fixed-odds markets across the world, but also spread betting, pari-mutuel and Tote betting, and focuses also on the recent explosion of interest in person-to-person betting exchanges. It also identifies other novel betting mediums. * The latest academic and professional research on the operation and analysis of horseracing, greyhound racing, football betting and numerous other sports betting markets is collated, summarized and made accessible in a non-technical form. * Explores betting opportunities in less traditional markets. It explains how the lines are made and the factors that go into the making of the line, so that by analyzing the hidden factors presented here the reader can find the creases.

Imagine if you had an Almanac with tomorrow's sports results and events? Imagine what you could do if you knew the outcome before it actually happened. Impossible? This book teaches you how sports investing works and how you can win consistently from sports betting. Sports has been my life since childhood. I was trying to crunch the code to predict tomorrow's games. In fact, this may sound a little bit like a back to the future fairytale, but I've come as close as I can to the results of Tomorrow's Almanac. During the last 13 years, I've been gathering sports data for Major League sports like Major League Baseball, Nhl

Hockey, the NFL football and NBA basketball. I'm crunching the numbers and I'm comparing the stats. I'm analyzing and back testing everything for years and years to crack the sports code and to find those repeating patterns and trends. This makes me understand what makes teams win and what makes teams lose. And you know what I found? I found that history always repeats itself. This is true, especially in sports where the rules are strictly defined. The outcomes in these situations are very predictable. Of course there are lucky strikes and conditions that are impossible to put into perspective. However, those are very small percentages. If you know the past outcome of an event, you can predict the results for the game in similar circumstances with a high degree of probability. As I said before, the past is never a full indication of what will happen in the future and there is always room for surprises, but again, this is what makes sports fun to watch. Am I right? However, what is the chance that a team with similar power and player statistics will produce a similar outcome in a similar game in similar circumstances? What's that percentage? 86.5% that's right. An 86.5% of the cases there will be no surprises and the prediction will come absolutely. The Zcode investing software is the best system in the market because it keeps making investors consistent gains each and every month. Truth is we love sports, but we hate to gamble and that's why we call this sports investing, which is similar to any other trading like stocks, stock options, and forex trades. This is just way more predictable than today's flawed economic models with crisis's and bankruptcy events. Every day the software is gathering thousands and thousands of sports data and results: every single event, every single detail, every single player and every single team. I start the simulation with over 80 parameters in the zcode formula to come up with a precise and easy to use prediction and not only tell you who is going to win, but also and most importantly, where the value is, which means more money can be made guessing.
