Paying tribute to the late Native American scholar Vine Deloria Jr., *Destroying Dogma* follows the ripples of thought set in motion by Deloria's visionary words. This collection of essays by prominent writers and intellectuals demonstrates the breadth and influence of Deloria's life work. While covering a diverse array of topics, such as religious freedom, evolution, and the direction of leadership in Native communities, the essays all share Deloria's enduring notion that dogma is the enemy of critical thinking. Steve Pavlik teaches science at Tucson Preparatory School and is an adjunct faculty member in geography for Pima Community College. He has published extensively in the field of American Indian studies and is the editor of *A Good Cherokee*, *A Good Anthropologist: Papers in Honor of Robert K. Thomas*.

The new text updates ID initiatives in Kansas and Ohio and the movement's shifting strategies in an attempt to remain viable after its legal undoing in federal court. Anyone who values science and the benefits of life in an enlightened society should know about the Wedge's political, cultural, and religious ambitions. With a new foreword by Barry Lynn, this updated edition is an essential guide to ID's continuing threat to public education and the separation of church and state. It is the book to turn to for an inside look at the claims and operations of the ID movement, the most recent manifestation of American creationism.
