Instant Notes Sport and Exercise Biomechanics provides a comprehensive overview of the key concepts in exercise and sport biomechanics. The kinematics of motion are reviewed in detail, outlining the physics of motion. Mechanical characteristics of motion, the mechanisms of injury, and the analysis of the sport technique provides a source of valuable information.

Instant Notes in Physiological Psychology provides a succinct overview of the key topics in physiological psychology, providing easy access to the core information in the field. Although physiological psychology is a required component of most degrees, the authors recognise that many students come from non-scientific backgrounds and may find the subject daunting. This book covers all of the essential topics in a format that is ideal for learning and rapid revision for students from all backgrounds. It can serve as a core text, supplemented by readings in the original literature, as a reference guide for students and lecturers alike, or as an ideal revision guide prior to exams. Instant Notes in Physiological Psychology is primarily intended for students taking a first course in the subject, but can also be used as an introduction to the field for undergraduates and graduates from other subject areas.

Instant Notes in Analytical Chemistry provides students with a thorough comprehension of analytical chemistry and its applications. It supports the learning of principles and practice of analytical procedures and also covers the analytical techniques commonly used in laboratories today.

Instant Notes in Cognitive Psychology is a concise summary of the key theoretical and empirical topics in cognitive psychology, providing easy access to the core information in the field. The book can serve as a core text, supplemented by readings in the original literature, as a reference guide for students and lecturers alike, or as an ideal revision guide prior to exams. Instant Notes in Cognitive Psychology is intended primarily for students taking a first course in the subject, but can also be used as an introduction to the field for undergraduates and graduates from other subject areas.

This volume focuses on genetics. Topics covered include molecular genetics, DNA structure, genes, genetic code, RNA transcription, translation, DNA replication, chromosomes, organization of genomic DNA, and cell division.

Instant Notes in Organic Chemistry, Second Edition, is the perfect text for undergraduates looking for a concise introduction to the subject, or a study guide to use before examinations. Each topic begins with a summary of essential facts—an ideal revision checklist—followed by a description of the subject that focuses on core information, with clear, simple diagrams that are easy for students to understand and recall in essays and exams.

The second edition of Instant Notes in Neuroscience covers neuroanatomy, cellular and molecular neuroscience, systems neuroscience, behavior, development of the nervous system, learning, memory, and common brain disorders. It gives rapid and easy access to the core of the subject in an affordable and manageable-sized text.

BIOS Instant Notes in Immunology, Third Edition, is the perfect text for undergraduates looking for a concise introduction to the subject, or a study guide to use before examinations. Each topic begins with a summary of essential facts—an ideal revision checklist—followed by a description of the subject that focuses on core information, with clear,

Instant Notes in Molecular Biology, Fourth Edition is the perfect text for undergraduates looking for a concise introduction to the subject, or a study guide to use before examinations. Each topic begins with a summary of essential facts—an ideal revision checklist—followed by a description of the subject that focuses on core information, with clear, simple diagrams that are easy for students to understand and recall in essays and exams.

BIOS Instant Notes Chemistry for Biologists, Third Edition, is the perfect text for undergraduates looking for a concise introduction to the subject, or a study guide to use before examinations. Each topic begins with a summary of essential facts—an ideal revision checklist—followed by a description of the subject that focuses on core information, with clear, simple diagrams that are easy for students to understand and recall in essays and exams. BIOS Instant Notes Chemistry for Biologists, Third Edition, is fully up-to-date and covers: The elements Chemical bonds and molecular shape Water- the biological solvent Carbon, the basis for life on Earth 3D-molecular structure of organic compounds Small inorganic molecules of biological importance Some metals in biology Molecular interactions Common reaction types of carbon based compounds Organic compounds by chemical class Aromatic compounds Chemical synthesis of biological molecules Important biological macromolecules by class Aqueous behaviour Elementary thermodynamics Kinetics Spectroscopy Units and calculations

Instant Notes in Physical Chemistry introduces the various aspects of physical chemistry in an order that gives the opportunity for continuous reading from front to back. The background to a range of important techniques is incorporated to reflect the wide application of the subject matter. This book provides the key to the understanding and learning of physical chemistry.

Instant Notes in Sport and Exercise Psychology provides concise coverage of sport and exercise psychology at the undergraduate level, and also covers the crucial basic psychology that underpins the subject. It has four main themes: theoretical approaches and research methods sport psychology at both the individual and group level of analysis exercise psychology practical applications including performance enhancement and ethics. Suitable for students in sport and exercise science, sport psychology, sport studies and sports management, it will be useful for coaches and athletes who wish to gain an up-to-date understanding of the key concepts, theories and research in this area.

BIOS Instant Notes in Neuroscience, Third Edition, is the perfect text for undergraduates looking for a concise introduction to the subject, or a study guide to use before examinations. Each topic begins with a summary of essential facts-an ideal revision checklist-followed by a description of the subject that focuses on core information, with clear, simple diagrams that are easy for students to understand and recall in essays and exams. ? BIOS Instant Notes in Neuroscience, Third Edition, is fully up-to-date and covers: Organization of the Nervous System Neuron Excitation Synapses Neurotransmitters Elements of Neural Computing Somatosensory Systems Vision Hearing Smell and Taste Motor Function: Spinal Cord and Brainstem Movement: Cortex, Cerebellum and Basal Ganglia Neuroendocrinology and Autonomic Functions Brain and Behaviour Learning and Memory Neuroscience Methods

The second edition of Instant Notes in Bioinformatics introduced the readers to the themes and terminology of bioinformatics. It is divided into three parts: the first being an introduction to bioinformatics in biology; the second covering the physical, mathematical, statistical and computational basis of bioinformatics, using biological examples wherever possible; the third describing applications, giving specific detail and including data standards. The applications covered are sequence analysis and annotation, transcriptomics, proteomics, metabolite study, supramolecular organization, systems biology and the integration of-omic data, physiology, image analysis, and text analysis.

Instant Notes in Developmental Biology provides concise yet comprehensive coverage of developmental biology at an undergraduate level, as well as easy access to the core information in the field. It presents 70-80 topics covering the fundamental information in both animals and plants that every student needs to know. Straightforward diagrams present important concepts, which are easy to remember and reproduce. A "Key Notes" section at the start of each topic highlights the important facts, and also acts as a memory prompt for examinations. It also features multiple choice questions and answers to test understanding. Aimed at students in the life sciences taking courses in developmental biology, Instant Notes in Developmental Biology covers all important areas in the field in a format that is ideal for learning and rapid revision

This new edition will be an even more tightly constructed overview of the subject than the first edition that will enable easy access to core information making it an ideal resource for learning and studying before exams. New topics include emotion, language, schizophrenia and depression.

This book is designed to give students rapid and easy access to key ecological material to assist learning and revision. Key topics such as populations and interactions, ecosystems, population genetics, community patterns and many more are structured into manageable sections, each cross-referenced, to allow easy navigation through the information.

Instant Notes in Psychology contains the fundamental topics that are essential to the student. Each topic begins with a Key Notes panel containing concise summaries of the key points covered, which are expanded in the main text of the topic. Although each topic stands alone, it is the nature of the psychology that topics are interrelated. To help the student see these interrelationships the text provides numerous cross-references between topics.

BIOS Instant Notes in Microbiology, Fourth Edition, is the perfect text for undergraduates looking for a concise introduction to the subject, or a study guide to use before examinations. Instant Notes in Biochemistry, 2/e provides an easy access to the fundamentals in this field. The book is a major update on the very successful first edition with expanded coverage of transcription, RNA processing and protein synthesis and many additional new topics. New illustrations have been added and much of the artwork has been enlarged or redrawn to aid comprehension.

Instant Notes in Human Physiology will be valuable to students in whatever context they are studying physiology. It explains fundamental concepts and the major physiological systems, showing how they are integrated, without overloading the reader with information.

Instant Notes in Developmental Biology Springer

Instant Notes in Mathematics and Statistics for Life Scientists is aimed at undergraduate life science students who need to improve or brush-up their mathematical and statistical skills to a level which will make the quantitative components of most undergraduate biological courses accessible.

Instant Notes in Motor Control, Learning and Development provides an overview of how the brain and nervous system control movement, and how new movements are learned and improved. The early chapters set the scene by defining the field and discussing the measurement of movement. This leads to chapters that explain how we control movement and learn to control movement. The final section considers the development of motor skills. The topics covered in this text provide foundation knowledge that is vital for any individual who is working in the movement context as a teacher, coach, or therapist. Each chapter can be read in isolation but links are made and related topics highlighted. Due to the wide range of information contained in the book, it will be relevant to students studying all sports-related courses, including sport coaching courses.

The new edition of Instant Notes in Molecular Biology has been revised and updated to include information on micro RNAs, RNA inhibition, functional genomics, proteomics, imaging, stem cells and bioinformatics. Written in an accessible style, the book will be a highly useful tool for studying molecular biology.

Instant Notes in Animal Biology, 2/e is a student-friendly compendium of the essentials of animal biology. In four well-organised sections, the book reviews the Animal Kingdom, phylum by phylum; covers key co-ordinating principles; describes aspects of comparative physiology; and reviews reproductive physiology and developmental biology from birth through ageing. The new edition has been reviewed and updated and remains a concise, comprehensive overview of the field designed to provide accessible information in a format which is ideal for both ease of learning and rapid revision.

Instant Notes in Medicinal Chemistry provides concise coverage for undergraduates studying medicinal chemistry as part of a science, pharmacy or medical course. It is a truly

multidisciplinary subject involving such subject specialities as organic chemistry, pharmacology, biochemistry, physiology, microbiology, toxicology, genetics and computer mod  
This book revisits classic studies in Developmental Psychology with a view to showing not only how they shaped the field, but also how the field has itself moved on through engagement with the issues these studies raise. It engages critically with the studies in order to reveal new ways of thinking both about them and about the ideas they explore. In effect, it shows how Developmental Psychology can be - and has been - taken forward in exciting ways through a careful re-examination of the core studies that lie at its heart.

Instant Notes in Medical Microbiology covers medical microbiology from the molecular biology of infectious agents right through to the clinical management of the infected patient, including disease pathogenesis, diagnosis, and the use of antimicrobial therapy. The first section covers how micro-organisms spread and cause disease in humans, and how the human body responds to infection in general. The next three sections give a broad outline of the important properties of human infectious pathogens; split into viruses, bacteria, and eukaryotic organisms. The final sections cover laboratory diagnosis, antimicrobial chemotherapy, prevention strategies, and infection from the point of view of the patient.

"Instant Notes in Immunology provides a concise yet comprehensive introduction to immunology, providing easy access to the core information in the field. The book covers all important areas in immunology in a format which is ideal for learning and rapid revision. It also features MCQs and answers to test understanding." "If you are studying immunology and need an easy to understand text, Instant Notes in Immunology is the lifeline you need to help you understand the subject and pass the course."--BOOK JACKET. This is a student-friendly compendium of the essentials of animal biology, including the Animal Kingdom, comparative physiology, reproductive physiology and developmental biology. A major update of the highly popular second edition, with changes in the content and organisation that reflect advances in the subject. New and expanded topics include cytoskeleton, molecular motors, bioimaging, biomembranes, cell signalling, protein structure, and enzyme regulation. As with the first two editions, the third edition of Instant Notes in Biochemistry provides the essential facts of biochemistry with detailed explanations and clear illustrations.

Providing researchers and students with easy access to the key facts in a format specially designed for ease of use and rapid revision, this book in the acclaimed "Instant Notes" series covers studying cells and macromolecules, protein structure, nucleic acids composition properties and structures, and gene manipulation, and bacteriophage and viruses, tumor viruses and oncogenes, and applications. 220 illus.

The second edition of Instant Notes in Plant Biology, has been both updated and reorganized and gives an insight into the whole of plant science, integrating structure, function and physiology. A major addition is the section on understanding plants which introduces the major techniques in plant science and shows how advances are made. Molecular techniques are used in all areas of plant science and are included throughout.
