Companies that want results need to ensure that every task an employee performs adds value to the organization. That requires a close examination of why expectations aren't being met in order to improve processes. It's time to take a head-on approach to issues that prevent companies from hitting performance targets. You'll take a fresh look at the most common issues that hurt companies and learn how to • properly incorporate planning into the work process • track the costs of defects and repairs when determining project costs • form teams with a clear mission and the authority to complete tasks • work toward a common goal instead of working against each other Break down complex project methodology into principles that are easy to understand and that actually work. Multiple exercises reinforce principles and best practices that can be applied to diverse situations. Examine the important factors that are hurting results at your organization, and start focusing on adding value with A Fresh Look at Improving Your Work Environment.

No further information has been provided for this title. Today's mathematics classrooms increasingly include students for whom English is a second language. Teaching Mathematics to English Language Learners provides readers a comprehensive understanding of both the challenges that face English language learners (ELLs) and ways in which educators might address them in the secondary mathematics classroom. Framed by a research perspective, Teaching Mathematics to English Language Learners presents practical instructional strategies for engaging learners that can be incorporated as a regular part of instruction. The authors offer context-specific strategies for everything from facilitating classroom discussions with all students, to reading and

interpreting math textbooks, to tackling word problems. A fully annotated list of math web and print resources completes the volume, making this a valuable reference to help mathematics teachers meet the challenges of including all learners in effective instruction. Features and updates to this new edition include: An updated and streamlined Part 1 provides an essential overview of ELL theory in a mathematics specific context. Additional practical examples of mathematics problems and exercises make turning theory into practice easy when teaching ELLs New pedagogical elements in Part 3 include tips on harnessing new technologies, discussion questions and reflection points. New coverage of the Common Core State Standards, as well as updates to the web and print resources in Part 4.

The 10th edition of the World Directory of Crystallographers and of Other Scientists Employing Crystallographic Methods is a revised and up-to-date edition of the World Directory and contains the current addresses, academic status and research interests of over 8000 scientists in 74 countries. It is produced directly from the regularly updated electronic World Directory database, which is accessible via the World-Wide Web. Full details of the database are given in an Annex to the printed edition.

Supplement to 3d ed. called Selected characteristics of occupations (physical demands, working conditions, training time) issued by Bureau of Employment Security.

The STIAS research theme on Being Human Today explores the interrelated questions: What does it mean to be human? And: What is the nature of the world in which we aspire to be human? In the context of post-apartheid South Africa race and racism remain key references in both these questions. Why is this so, considering that the biological basis of race thinking has been refuted?

Templates of race and racialism remain at the core of state policy in South Africa, periodic gross incidents of racism surface in public, and notions of the existence of races remain central to everyday thinking and discourse. This book is the result of the work of a group of leading thinkers and their in-depth conversations at STIAS during the winter of 2015 on the effects of race. Convened by evolutionary anthropologist Nina Jablonski and sociologist Gerhard Mare, the group included Njabulo Ndebele, Chabani Manganyi, Barney Pityana, Crain Soudien, Goeran Therborn, Mikael Hjerm, Zimitri Erasmus and George Chaplin. The group reconvened annually through 2017. This is the first in a series of planned publications on the their work.

Welcome to the PostgreSQL 8.4 Official Documentation - Volume I. The SQL Language! After many years of development, PostgreSQL has become feature-complete in many areas. This release shows a targeted approach to adding features (e.g., authentication, monitoring, space reuse), and adds capabilities defined in the later SQL standards.

InfoWorld is targeted to Senior IT professionals. Content is segmented into Channels and Topic Centers. InfoWorld also celebrates people, companies, and projects.

The four-volume set LNCS 11070, 11071, 11072, and 11073 constitutes the refereed proceedings of the 21st International

Conference on Medical Image Computing and Computer-Assisted Intervention, MICCAI 2018, held in Granada, Spain, in September 2018. The 373 revised full papers presented were carefully reviewed and selected from 1068 submissions in a double-blind review process. The papers have been organized in the following topical sections: Part I: Image Quality and Artefacts; Image Reconstruction Methods; Machine Learning in Medical Imaging; Statistical Analysis for Medical Imaging; Image Registration Methods. Part II: Optical and Histology Applications: Optical Imaging Applications; Histology Applications; Microscopy Applications; Optical Coherence Tomography and Other Optical Imaging Applications. Cardiac, Chest and Abdominal Applications: Cardiac Imaging Applications: Colorectal, Kidney and Liver Imaging Applications; Lung Imaging Applications; Breast Imaging Applications; Other Abdominal Applications. Part III: Diffusion Tensor Imaging and Functional MRI: Diffusion Tensor Imaging; Diffusion Weighted Imaging; Functional MRI; Human Connectome. Neuroimaging and Brain Segmentation Methods: Neuroimaging; Brain Segmentation Methods. Part IV: Computer Assisted Intervention: Image Guided Interventions and Surgery; Surgical Planning, Simulation and Work Flow Analysis; Visualization and Augmented Reality. Image Segmentation Methods: General Image Segmentation Methods, Measures and Applications; Multi-Organ Segmentation; Abdominal Segmentation Methods; Cardiac Segmentation Methods; Chest, Lung and Spine Segmentation; Other Segmentation Applications.
This series provides all the knowledge and skills students need to complete level 2 qualifications. Written in simple, clear language using Office 2000 applications, the titles are full of exercises to help students get to grips fast with the skills they need for assessment.
"Learn to build fast and fluid Windows 8 Apps in a variety of

contexts and projects"--Cover.

This 88-page primer unveils the key features of Microsoft's eagerly anticipated Windows 8 operating system. Windows 8 contains Microsoft's revolutionary new application framework for building dynamic and responsive touch-enabled applications that target both desktops and mobile devices. Experienced author Adam Freeman invites you to take a crash course in Windows 8 development. Using the open standards of XAML and C# he ensures you understand the changes that are being made to Windows development practices and puts you on the right course to creating innovative and elegant applications for this latest evolution of the world's most successful operating system.

The Academic Vocabulary Practice for fifth grade offers teachers 128-pages of practical ways to help students master essential academic vocabulary. It is aligned with Common Core State Standards and includes word lists of more than 200 domain-specific words, reproducible practice pages, game templates, a student dictionary, and an answer key. Additionally, a full set of vocabulary flash cards is available online. The Academic Vocabulary Practice series for kindergarten through grade 5 supports literacy in the content areas of language arts, math, science, social studies, art, and technology. Each book offers systematic practice and usage of many of the academic and domain-specific words and phrases that students need to know to successfully complete work at grade level. There is also a Games and Suggestion section and game templates for small or whole group activities! The Student Dictionary pages are organized by content area and support the activity pages in each section.

This book celebrates the work of Yorick Wilks in the form of a selection of his papers which are intended to reflect the range and depth of his work. The

volume accompanies a Festschrift which celebrates his contribution to the fields of Computational Linguistics and Artificial Intelligence. The selected papers reflect Yorick's contribution to both practical and theoretical aspects of automatic language processing.

Remember when you used to pay for things?! When computer software was almost as much as your new computer. Times have certainly changed! Today many companies are giving you all that stuff you used to pay hundreds of dollars for—for free! What's the catch? There has to be a catch! Sometimes there definitely is a catch…it's free, but you have to watch a 30 second commercial every five minutes. Or it's free but you have to pay a subscription once you start to really like it. In the case of Google Apps, it truly is free. No annoying ads. No money grabs. Nothing. For the price of nothing you are getting online software that is on par with the Office suite you grew to love—and pay hundreds of dollars for. That means you get writing software, spreadsheet software, presentation software, and more…and you don't pay a dime! Now you see why so many people are making the switch to Google Apps? Who wouldn't want to pay nothing for good software? If you are interested in learning more about it, or you are ready to make the leap and become a free user, then this guide will show you the ropes and get you started as quickly as possible. Let's get started! This

Learn Python—Fast! Python Crash Course is a fast-paced, thorough introduction to Python that will have you writing programs, solving problems, and making things that work in no time. In the first half of the book, you'll learn about basic programming concepts, such as lists, dictionaries, classes, and loops, and practice writing clean and readable code with exercises for each topic. You'll also learn how to make your programs interactive and how to test your code safely before adding it to a project. In the second half of the book, you'll put your new knowledge into practice with three substantial projects: a Space Invaders–inspired arcade game, data visualizations with Python's super-handy libraries, and a simple web app you can deploy online. As you work through Python Crash Course you'll learn how to: *Use powerful Python libraries and tools, including matplotlib, NumPy, and Pygal *Make 2D games that respond to keypresses and mouse clicks, and that grow more difficult as the game progresses *Work with data to generate interactive visualizations *Create and customize Web apps and deploy them safely online *Deal with mistakes and errors so you can solve your own programming problems If you've been thinking seriously about digging into programming, Python Crash Course will get you up to speed and have you

writing real programs fast. Why wait any longer? Start your engines and code! Uses Python 2 and 3 Words Every Fifth Grader Needs to Know! is a vocabulary resource designed to support instruction in the content areas. Each activity gives students extra practice with academic vocabulary, which are the subject-specific words that often challenge learners. Students rarely encounter these words in everyday use. However, knowing them is essential to a student's ability to learn new subject concepts. The 220 words in Words Every Fifth Grader Needs to Know! have been carefully selected to match national education standards in the curriculum areas of math, science and health, technology, language arts, history, geography, civics and economics, and the arts. The activities feature vocabulary words in a variety of contexts so that students can make their own thoughtful connections about them. This book also includes a reproducible student dictionary, vocabulary game ideas and reproducible templates, and word cards—tools that will make learning academic vocabulary words both effective and fun! Features: • 220 subject-specific vocabulary words • Standards-based activities • Vocabulary games and templates • Student dictionary • Word cards Translation / Warren Weaver / - Mechanical translation / A.D. Booth / - The mechanical determination of meaning / Erwin Reifler / - Stochastic methods of mechanical translation /

Gilbert W. King / - A framework for syntactic translation / Victor H. Yngve / - The present status of automatic translation of languages / Yehoshua Bar-Hillel / - A preliminary approach to Japanese English automatic translation / Susumu Kuno / - ALPAC : the (in) famous report / John Hutchins / - Automatic translation : some theoretical aspects and the design of a translation system / O.S. Johnson / - Translation by structural correspondences / Ronald M. Kaplan / - Treatment of meaning in MT systems / Sergei Nirenburg / - Three levels of linguistic analysis in machine translation / Michael Zarechnak / - A framework of a mechanical translation between Japanese and English by a ...

This is a down-to-earth, 'how to do it' textbook on the making of dictionaries. Written by professional lexicographers with over seventy years' experience between them, the book presents a step-by-step course for the training of lexicographers in all settings, including publishing houses, colleges, and universities world-wide, and for the teaching of lexicography as an academic discipline. It takes readers through the processes of designing, collecting, and annotating a corpus of texts; shows how to analyse the data in order to extract the relevant information; and demonstrates how these

findings are drawn together in the semantic, grammatical, and pedagogic components that make up an entry. The authors explain the relevance and application of recent linguistic theories, such as prototype theory and frame semantics, and describe the role of software in the manipulation of data and the compilation of entries. They provide practical exercises at every stage. The Oxford Guide to Practical Lexicography draws on materials developed by the authors over more than twenty years of teaching courses for publishing houses and universities in the US, Japan, Hong Kong and China, South Africa, Australia, the UK, and Europe. It will be welcomed everywhere by lexicographers, teachers of lexicography, and their students. It is also fascinating reading for all those interested in discovering how dictionaries are made.

This is a supplement to the Occupational Outlook Handbook in which it defines the O'Net codes in detail referenced in all occupations listed in the OOH with over eight times as much job data.
