The battle for the future has just begun. Bruce and Mike finally made it home. But the battle for the future has just begun. The Louisiana farm that Bruce and his allies had built to survive the end of the world was everything they could have hoped for—but no one had planned for the endless horde of fast, smart and ravenous blue zombies who could think, heal, and even reproduce. Now, as they gather an armory of military weaponry from abandoned outposts all across the countryside, Bruce and his growing clan of survivors realize the truth—their compound can be the beginning of a new and rebuilt world—but only if they can confront the “blues” and make their home safe. Pity the poor blues.

At a time when women musicians were just the front singers in groups, Donna dreamed of putting her own group together and being not only a singer, but an electric lead guitarist. This concept was groundbreaking in the 1960s, when women musicians typically played folk music on acoustic guitars, not rock, funk, or R&B on electric guitars. Excited by Donna's vision and energy, other women signed on to play drums, keyboards, bass, and rhythm guitar. They quickly learned about the double standard that existed for men and women. This did not deter them in any way, but made them stronger and more determined to achieve their musical goals. Donna would like to believe that her bands' courage, passion, and drive helped to open doors for future female musicians. This is a feel-good autobiography for anyone who's ever had a dream.

The digital interactive projection system is a staple of nearly every music classroom in the United States. By allowing teachers to show students methods and outcomes from a computer, these systems have become a necessity for reaching students who grew up as digital natives. But, as author and distinguished music educator Catherine Dwinal demonstrates, such systems can be much more meaningful pedagogical tools than simple replacements for chalkboards. In this book, she offers practical tips, tricks, resources, and 50 activities ideal to use alongside classroom projection systems. She focuses especially on tips and activities for beginning teachers, giving them the confidence to take a step out of their comfort zone and learn new ways of engaging students with technology. More than this, she provides reference materials that will serve as a trusted reference resource for years to come.

This book includes simple but powerful ideas and instructions for integrating technology into presentations, and using booktalks to launch learning across the curriculum. For Grades 6 - 12. (Adapted from back cover).
