The Art of BMW Motorcycles presents the rolling sculptures that are BMW motorcycles in studio portraits, each bike accompanied by a short history of the machine. All the classic bikes are here--pre-World War II BMWs like the R5 that defined performance in that era; the military R12 that carried the Wehrmacht as it blitzkrieged its way across Europe; the R75M that accompanied Rommel's Panzers in North Africa; the Earles-forked R69S that offered the perfect platform for mounting a Steib sidecar; the R90S caf? racer; and the GS (Gel?nde Sport) series that launched a dual-sport revolution. All the bike families are covered: the side-valve machines from the early years, the early overhead-

valve performance bikes, the postwar Airheads and Oilheads, the four-cylinder and six-cylinder touring bikes, the early pushrod singles, the modern overhead-cam singles, the latest parallel twins, and inline-four cylinder sport bikes. From the first model, the R32 that launched BMW's motorcycle dynasty, to the latest (and fastest) model, the World Super Bike dominating S1000RR, this book captures nearly a century of motorcycling excellence.

engine, BMW F650CS, Airhead, Oilhead. Excerpt: The BMW R1200RT is a touring motorcycle that was introduced in 2005 by BMW Motorrad to replace the R1150RT model. It features a 1,170 cc (71 cu in) flat-twin engine with a six-speed gearbox and shaft drive. Four generations of "RT" motorcycles from 1996 to the present BMW Motorrad began manufacturing "RT" ((Reise-Tourer, or "travel tourer") touring motorcycle models in the late 1970s. The first of these were "airhead" models that continued BMW's long tradition dating to 1923 of producing "boxer" or opposed-twin engined motorcycles with unit engine-transmission construction and shaft final drive. In 1995 BMW produced its first "oilhead" RT, the R1100RT. The new machine included oil-cooling, standard ABS brakes, four-valve heads, 5 speed gearbox, Telelever front suspension, Paralever rear suspension, and an electrically adjustable screen. In 2002, BMW launched the R1150RT, providing the same basic platform with increased engine capacity and horsepower, fully linked, power-assisted ABS brakes, revised front lighting system and a 6 speed gearbox. This model was further updated in 2004 by the addition of two spark plugs per cylinder. The next version of the RT series arrived in 2005 with the introduction of the R1200RT. The design of this model is completely different from the R1150RT with a 15% boost in power, 20 kg (44 lb) weight saving, optional electronically...
