Nach seiner Kündigung erfüllt sich Thomas Becher einen lange gehegten Traum: Einmal mit dem Motorrad über Land nach SO-Asien. Das östliche Anatolien, mit der Eskorte durch den Iran und Pakistan, erst eine Panne, dann ein Unfall in Indien und schließlich die Ankunft in Indochina. The original plan was to ride from Tokyo, Japan to St. Petersburg, Russia via Mongolia and the Central Asian Republics. The twists and turns of fate saw them return home through Africa, which had never been part of the plan. From the fabled Silk Road route to Timbuktu there was plenty of adventure and challenges. After 50,000kms and through 30 countries Monica missed out on learning how to change a tyre as she didn't even manage to get a flat. The trip was one of extreme travel and adventure and a wonderful way of spending a year. Monica and Simon managed to return home still married and keen to travel more.

It's hard to believe, but the W129-series Mercedes-Benz SL was launched over 20 years ago. However, its timeless styling has kept it fresh and attractive in the eyes of a new generation of enthusiasts, as well as those returning to the car having owned one when they were still in the dealerships. A combination of superb original design and peerless engineering and build quality adds to the desirability of this series of classic German machines, and has ensured that many of these cars can still be seen in regular use today. Covering the SL's ever-changing specification, and its presence in many of the world's major markets is a huge task, but it's all presented here in definitive detail, along with stunning contemporary photography, in a volume that will readily grace any reference library shelf or connoisseur's coffee table. Two earlier books, also published by Veloce, and covering the W113 cars and the 107-series SL and SLC, act as perfect companions to this title, which takes the SL story up to 1989.

Relive the first one hundred years of Germany's best two- and four-wheeled rides. Established in 1916, BMW is one of the auto and motorcycle industry's oldest and most-respected car and motorcycle manufacturers. Over the past century, the company went

through myriad developments. The BMW Century chronicles this remarkable transportation company through images of the cars and motorcycles it manufactured, from the 1923 R32 motorcycle to sleek electric cars of today. This handsome volume is filled with images, history, and in-depth looks at the incredible machines BMW created year after year. The BMW Century showcases how the company's new visionary team systematically rebuilt BMW in the post-World War II years into the spectacular success we know today - that is, a company with sales projected to be upwards of two million cars annually by 2016, led by its 3-series, the best-selling luxury-performance car in the world. BMW's motorcycle division is no less legendary. It began with the 1923 avant-garde R32, which featured a 180-degree, horizontally opposed twin, the engine configuration that would become BMW's hallmark. Along the way, BMW would use that configuration to power groundbreaking machines like the R90S, R100RS, and R80GS. Beginning in 1983, they would add three- and four-cylinder machines to their offerings, culminating in today's spectacular S1000RR sport bike. From the pre-war motorcycles to the iconic R-series twins of the 1970s and 80s to the mighty M-series cars and superbikes of today, The BMW Century offers a full review of German engineering at its finest. The book is illustrated with hundreds of historic, contemporary, and racing photographs - many sourced from BMW's archives - and detailed text relating the BMW's full history. This is the one volume no BMW aficionado can be without.

A definitive guide to the iconic BMW GS, the model that revolutionized the dual-purpose adventure bike in 1980. Combining all-terrain capability, high performance and on-road ride comfort, the GS is the bestselling large-capacity motorcycle in the UK and is still evolving today. Including comprehensive specification details, owners' experiences and previously unseen pictures, BMW GS - The Complete Story covers the original R80G/S and its impact on the industry; design and development of all the updated models; radical engineering concepts and technology; worldwide racing success for the GS and finally, the all-new R1200GS of 2013 and the future of the GS. Superbly illustrated with 196 colour and 8 black & white illustrations, many previously unseen.

Stalked by a black bear, encountering a close shave with a bull buffalo, having his tent eaten by an elk and being mugged by a gang of racoons; these are just a few of the adventures the author experiences as he attempts to circumnavigate North America by motorcycle in 2009. In doing so he discovers a land and two countries that feature a number of different divides – political, national, cultural and geographical. The early chapters describe the minimal planning that took place and the doubts that hit him when he begins his journey, finding his motorcycle impounded by US Customs, but then gradually transform with the release of the bike into a classic road trip as he delves down the Appalachians into Alabama, meeting kindred spirits from the biking world on the way and warming mile by mile into a deep appreciation of the splendour of the landscape and the warmth of the inhabitants. Later into the journey he travels through the First Nation reservations and looks into the history surrounding the demise of the Great Plains culture, describing the victory of the Sioux and their allies at Little Bighorn then the massacre at Wounded Knee, meeting descendants of those involved. The book is light-hearted and written in the spirit of gentle adventure by someone who admits to being a 'pretty slow rider' and a navigational incompetent to boot. If he manages to get back to Baltimore it will be a small miracle and hopefully, by the time he gets there, he will have finally found out what the 'Great Divide' really is.

Plenty of retirees take a holiday. When Brian Rix retired after 36 years as a policeman in Victoria rather than hitching up the caravan, he put his wife, journalist Shirley Hardy-Rix, on the back of his motorcycle and headed off for a ride. For the next 16 months Brian and Shirley rode more than 83,000 kilometres through 32 countries on five continents with side trips to Antarctica and Galapagos Islands. They rode from the bottom of South America to the very top of North America. They rode over the Andes, sometimes more than 5,000 metres high. They rode through deserts, the tropics and up to Alaska. They had a catastrophic breakdown in the heart of bear country and suffered altitude sickness. The motorcycle didn't make it to Antarctica but they did - taking them from Antarctica Circle to the Arctic Circle... and then a bit more. Beautifully illustrated in full colour throughout, Circle to Circle is an engaging account of the travels of an adventurous couple. It will entertain you in your armchair, or it may even inspire you to get up and go! Praise for Brian & Shirley's previous book, Two for the Road Makes you want to get up and go. – Australian Women's Weekly Few books are as inspirational as that just written by Melbourne journalist Shirley Hardy-Rix and her policeman husband Brian Rix. – Herald Sun For bikers and those with itchy feet. – Sunday Age The inspiring story of two middle-aged adventurers. – Manly Daily A great read for anyone with a yearning for the open road and exotic climes. – West Australian A must-read for adventurous hearts. – Canberra Times For anyone who's ever dreamed of escaping and experiencing the romance of the open road. – Inverell Times This book might tip undecided travellers over the edge - no bad thing. – Two Wheels

Dr. Linda Kipling has had her share of excitement working as a meteorologist with the Naval Research Laboratory. Twice in four years, she and her boss, the arrogant Dr. Victor Silverstein, have faced international crises requiring heroic action. Now, in 2011, Kipling faces her most formidable foe yet: her only remaining relatives, the Muller family. Debates about climate change continue as two researchers in Greenland mysteriously disappear. Kipling soon comes to a horrific realization: not all observed climatic aberrations are coming from natural variation or an increase in greenhouse gases. Instead, someone is tampering with nature, risking a cataclysmic event that could destroy the world. Her dying father is suspicious; he believes distant relatives in South America are involved. The Muller family was once part of Hitler's inner circle. They escaped from Germany in 1945 with a fortune in gold, and now they hope to alter the world's climate for their own purposes. Kipling must head to Greenland under the guise of familial reunion in order to dismantle the Muller plan and save the planet from a climatic apocalypse. "Paul Mark Tag[s] books never disappoint.
