Systemic financial crises have become a common feature of the global financial landscape. Resolution of such crises requires a complex mix of macroeconomic and financial sector policies, including the restructuring and resolution of problem banks. This volume outlines the theoretical insights that have been gained and the practical lessons learned.

Since the mid-1990s, economic observers have kept a watchful eye on the financial sector because of its potential to spark economic crises. Banks in particular have come under close scrutiny. This book offers guidance on setting up regulatory and supervisory regimes that can help to prevent crises, and on dealing with turmoil, should a crisis erupt. It contains a collection of essays on a wide range of issues useful to bolstering the banking and financial sector.

Chama to Conglomerate captures the global phenomenon of group investment, whereby like-minded people pool their resources together on a regular basis to pursue business projects with long-term returns. This book shows how they can grow from a small club of investors to a big corporate entity.

In this timely Handbook, over 30 prominent academics, practitioners and regulators from across the globe provide in-depth insights into an area of law that the recent global financial crisis has placed in the spotlight: bank insolvency law. Research Handbook on Crisis Management in the Banking Sector discusses the

rules that govern a bank insolvency from the perspectives of the various parties that are affected by these rules. Thus, whilst many bank insolvency rules have been enacted only recently and their application is still clouded by a host of uncertainties, this book takes the perspectives of the relevant authorities, of the bank and of the bank's counterparties. Providing a comprehensive approach to crisis management in the banking sector, this Handbook will prove a valuable resource for academics, postgraduate students, practitioners and international policymakers.

Deals with the result of a study conducted by the FDIC on banking crisis of the 1980s and early 1990s. Examines the evolution of the processes used by FDIC and RTC to resolve banking problems, protect depositors and dispose of the assets of the failed institutions.

This book takes stock after a year of application of the SRM and examines the situation from various perspectives: the perspective of the SRB, the NRA, the supervised bank and judicial protection. Special attention is given to the division of power between the RB and the NRA and the impact on the supervised bank, the relationship and links between the SRM and the SSM and the query whether the right balance between national and supranational powers has been struck, also in view of the principle of subsidiarity.

Important improvements have been made to the bank resolution, safety net and crisis management framework since the last FSAP. The resolution framework has been strengthened with the creation, within the Banco Central do Brasil (BCB), of a new Resolution Department, and requirements for recovery and resolution planning have been established. The early intervention powers of the BCB are robust and flexible. Notwithstanding this progress, the current framework has limitations that are broadly acknowledged by the authorities. Resolution powers are incomplete and no formal inter-agency arrangements for crisis management are in place. The BCB has taken the lead in preparing a comprehensive draft law (the “Draft Law”) that seeks to introduce a new resolution regime in line with international best practices. This FSAP takes place therefore at a critical juncture. It provides recommendations on the design features of the new resolution regime, examining the existing framework as well as the areas not addressed in the Draft Law.

This 2017 Article IV Consultation highlights that the Russian economy stabilized in 2016, contracting by just 0.2 percent of GDP, after being hit in 2014 by the dual shocks of lower oil prices and sanctions. The more stable oil prices and improved financial conditions will support a return to growth in 2017, with an expected increase in real GDP of 1.4 percent. Growth is forecast to continue at 1.4 percent in 2018. With adverse demographics, and barring significant structural reforms that lifts productivity, potential growth is likely to stay at about 1.50 percent over the medium term. The main risk to the outlook remains a fall in oil prices.

This Technical Note discusses the findings and recommendations made in the Financial Sector Assessment Program for the Russian Federation in the areas of bank resolution and a crisis management framework. The findings reveal that the experiences of past financial crises have strengthened the Russian bank resolution framework. The resolution framework has been effective in preserving financial stability. Since January 2014, 28 banks have been placed in open bank resolution, and three were resolved by purchase and assumption transactions. The effectiveness of bank resolution could be improved. Introduction of the full range of resolution powers and safeguards recommended by the Financial Stability Board Key Attributes would improve the framework's effectiveness. This Selected Issues paper provides a brief overview of the Dominican Republic authorities' structural reform efforts in the 1990s. The paper provides a history of

trade reforms, which form an integral part of the structural reform agenda. It presents a review of fiscal policy during the 1990s. The paper discusses the major tax reforms and improvements in administration that were implemented during the 1990s, as well as developments in expenditure policy. A survey of fiscal policy proposals considered by the authorities, aimed at reinforcing the gains already achieved is also presented.
