"In Exploring the Dynamics of Human Development, Dr. Catherine Raeff constructs a theoretical framework that enables readers to reconcile seemingly disparate information by thinking systematically about dynamic developmental processes"--

This magistral treatise approaches the integration of psychology through the study of the multiple causes of normal and dysfunctional behavior. Causality is the focal point

reviewed across disciplines. Using diverse models, the book approaches unifying psychology as an ongoing project that integrates genetics, experience, evolution, brain, development, change mechanisms, and so on. The book includes in its integration free will, epitomized as freedom in being. It pinpoints the role of the self in causality and the freedom we have in determining our own behavior. The book deals with disturbed behavior, as well, and tackles the DSM-5 approach to mental disorder and the etiology of psychopathology. Young examines all these topics with a critical eye, and gives many innovative ideas and models that will stimulate thinking on the topic of psychology and causality for decades to come. It is truly integrative and original. Among the topics covered: Models and systems of causality of behavior. Nature and nurture: evolution and complexities. Early adversity, fetal programming, and getting under the skin. Free will in psychotherapy: helping people believe. Causality in psychological injury and law: basics and critics. A Neo-Piagetian/Neo-Eriksonian 25-step (sub)stage model. Unifying Causality and Psychology appeals to the disciplines of psychology, psychiatry, epidemiology, philosophy, neuroscience, genetics, law, the social sciences and humanistic fields, in general, and other mental health fields. Its level of writing makes it appropriate for graduate courses, as well as researchers and practitioners.

While firmly acknowledging the importance of play in early childhood, this book interrogates the assumption that play is a birthright. It pushes beyond traditional understandings of play to ask questions such as: what is the relationship between play and the arts – theatre, music and philosophy – and between play and wellbeing? How is play relevant to educational practice in the rapidly changing circumstances of today's world? What do Australian Aboriginal conceptions of play have to offer understandings of play? The book examines how ideas of play evolve as children increasingly interact with popular culture and technology, and how developing notions of play have changed our work spaces, teaching practices, curricula, and learning environments, as well as our understanding of relationships between children and adults. This multidisciplinary volume on the subject of play combines the work of some of the world's leading researchers in the field of early childhood education with contributions from distinguished and emerging scholars in areas as diverse as education, theatre studies, architecture, literature, philosophy, cultural studies, theology and the creative arts. Reconsidering the common focus on play in early education, to investigate its broader impact, this collection offers a refreshing and valuable addition to studies on play, reconceptualizing it for the 21st century.

This book investigates the ways in which pre-service teachers develop and articulate their professional knowledge by presenting their reflections on contemporary issues and topics they have explored during their own teaching practicums. It uses reflective practice to connect pre-service teachers' personal backgrounds with their placement experience concerning a self-selected topic, including teacher educators' reflections on the pre-service teachers' reports on these placement topics. By illustrating the broad range of issues encountered by pre-service teachers, sharing multiple perspectives on the complexity of classroom practice, and demonstrating the importance of reflective practice, it also provides a valuable mentoring framework. Moreover, the book studies how examining pre-service teachers' life experience can facilitate in-depth understanding, specifically in the context of pre-service teachers' reflections on their own practices in different educational settings. In short, the book helps current and prospective pre-service teachers and teacher educators get to know their students and themselves better using reflective practice.
