We all do it - how to be a better liar, spot a charlatan and tell the difference between truth and fiction In *Born Liars*, Ian Leslie takes the reader on an exhilarating tour of ideas that brings the latest news about deception back from the frontiers of psychology, neuroscience, and philosophy, and explores the role played by lies - both black and white - in our childhoods, our careers, and our health, as well as in advertising, politics, sport and war. Drawing on thinkers as varied as Augustine, Charles Darwin, Sigmund Freud and Joni Mitchell, the author argues that, far from being a bug in the human software, lying is central to who we are; that we cannot understand ourselves without first understanding the dynamics of deceit. After reading *Born Liars* you'll never think about lies - or life - in quite the same way again.

It began with the best of intentions. Worried about the effects of alcohol on American families, mothers and civic leaders started a movement to outlaw drinking in public places. Over time, their protests, petitions, and activism paid off—when a Constitutional Amendment banning the sale and consumption of alcohol was ratified, it was hailed as the end of public drunkenness, alcoholism, and a host of other social ills related to booze. Instead, it began a decade of lawlessness, when children smuggled (and drank) illegal alcohol, the most upright citizens casually broke the law, and a host of notorious gangsters entered the public eye. Filled with period art and photographs, anecdotes, and portraits of unique characters from the era, this fascinating book looks at the rise and fall of the disastrous social experiment known as Prohibition. *Bootleg* is a 2011 Kirkus Best Teen Books of the Year title. One of School Library Journal's Best Nonfiction Books of 2011. YALSA Excellence in Nonfiction Finalist in 2012. Janie was four years old when she nearly drowned due to her mother's neglect. Through an unhappy foster home experience, and years of feeling that she is unwanted, she keeps alive her dream of someday being a famous singer.

This book explores demotivation in the workplace, which is caused by a lack of challenge at work because of repetitive and monotonous tasks, a lack of interest in the job, and downright boredom. Employees have given up and become resigned to their situation, while they suffer what is effectively the opposite of office burnout. Boreout has become widespread among employees around the world, although the problem is only recently being recognized by employers. The dangerous effects of boreout should not be underestimated: dissatisfaction, weariness and the loss of zest for life - not to mention the economic problems, caused by bored employees spending hours of company time surfing the net. In this fascinating new book, the authors bring to light this prevalent phenomenon and show employees and employers how to recognise boreout and avoid its consequences. Whether you are an employee suffering from this draining condition, or an employer looking to prevent any of your staff from falling into the boreout trap, this title is essential reading.

Compelling and accessible, this Very Short Introduction challenges the perception of borders as passive lines on a map, revealing them instead to be integral forces in the economic, social, political, and environmental processes that shape our lives.

Highlighting the historical development and continued relevance of borders, Alexander Diener and Joshua Hagen offer a powerful counterpoint to the idea of an imminent borderless world, underscoring the impact borders have on a range of issues, such as economic development, inter- and intra-state conflict, global terrorism, migration, nationalism, international law, environmental sustainability, and natural resource management. Diener and Hagen demonstrate how and why borders have been, are currently, and will undoubtedly remain hot topics across the social sciences and in the global headlines for years to come. This compact volume will appeal to a broad, interdisciplinary audience of scholars and students, including geographers, political scientists, anthropologists, sociologists, historians, international relations and law experts, as well as lay readers interested in understanding current events.

This is not a book. This is an interactive experience. There are 10 horror short stories inside, sure, but that's not the only thing lurking within these pages. Check out what this beta reader had to say: "I thought I was buying a book of short stories. I didn't realize that what I would read would have such depth of experience. Most of the stories were amazing, but I have to be honest. When dealing with anthologies that contain multiple authors, there are always a few clunkers and this book is no different. The puzzles, the death override (Do the confirmation. It's pretty cool), the coupon (It works! And you get a surprise back too!) and the amount of thought put into this more than made up for any shortcomings one or two of the stories might have had. I feel as though the Bloodworth sat down and really thought about the type of experience he thought the reader would like to have while going through the book. Amazing." Ann P. Beta reader Ann is correct about the focus on reader experience. I wanted the reader to have something that they weren't quite sure about. I wanted to hide things inside the pages. I wanted people to think of the Boothworld Industries Initiation Kit as less of a book and more of an interactive experience with a paranormal corporation called Boothworld Industries.

"Okay. First, I want to say that I'm a huge Bloodworth fan. I've followed him since he started writing creepypastas for reddit's nosleep subreddit, back before it was filled with the stuff that's in there now. His stories were among the few that focused more on characters and plot than just gore and scares. I don't even like scary stories, but his writing pulled me in and kept me hooked. His stories made you fall in love with the characters he wrote. That sucked because you didn't want anything bad to happen to them, which usually did. His stories also had an air of reality to them. Even though you knew what you were reading couldn't be true, his words would make you question that very notion. Like I said, I'm a superfan. I loved all of Bloodworth's stories in this book. How could anyone not? He created Boothworld Industries and it shows. There were a few authors that gave him a run for his money though. Namely Ross Baxter and Stacie Savage. Now I don't want to be mean, but there was also one story I just didn't like at all. It seemed like very little thought had been put into it. Oh well. I've yet to read a book that was 100% perfect, but this book, with all the extra goodies you find, comes closer than most." Bri K. Beta reader I really wanted the reader to walk away from this experience feeling as if they'd received something more than a book. I wanted to create lasting memories. That's why so much time and effort was put into it. Sure, I could've just thrown the stories together, but it wouldn't have been as powerful as I wanted it to be. "Jesus, dude. I've never been more paranoid in my life. Every time my phone rings I say a little prayer that the number that appears won't read 630-296-7536. Boothworld Industries is something else..." Jon S. Beta reader I could tell you more, but now it's time for you to discover Boothworld Industries for yourself.
