to our present lives. It is especially important that followers of Christ know the church's history. How are national identities constructed and articulated through music? Popular music has long been associated with political dissent, and the nation state has consistently demonstrated a determination to seek out and procure for itself a stake in the management of 'its' popular musics. Similarly, popular musics have been used 'from the ground up' as sites for both populist and popular critiques of nationalist sentiment, from the position of both a globalizing and a 'local' vernacular culture. The contributions in this book arrive at a critical moment in the development of the study of national cultures and musicology. The book ranges from considerations of the ideological focus of cultural nationalism through to analyses of musical hybridity and musical articulations of other kinds of identities at odds with national identity. The processes of global homogenization are thereby shown to have brought about a transitional crisis for national cultural identities: the evolution of these identities, particularly with reference to the concept of 'authenticity' in music, is situated within broader debates on power, political economy and constructions of the self. Theorizations of practice are employed after the manner of Bourdieu, Gramsci, Goffman, Gadamer, Habermas, Bhabha, Lacan and Zizek. Each contribution acts as a case study to characterize the strategies through which differing modes of musical discourse engage, critique or obscure discourses on national identity. The studies include discussions of: musical representations of Irishness; the

In this way, the book seeks to characterize the ideological configurations that help to activate and sustain hegemonic, amb East Syriac Christianity spread outside the Roman Empire as a result of the missions carried out by the "Church of the East", formerly known as "Nestorian Church". This volume contains the most recent cutting edge research on this very Church in China and Central Asia. World-renowned scholars from universities and institutions in China, India, Europe and North America contributed to the study of this fascinating chapter of the history of Christianity. They come from various disciplines such as Religious and Ecclesiastical History, Philology (Sinology, Syrology), Archeology, Theology, and Central Asiatic Studies.

Thresholds of Western Culture explores identity, postcoloniality and transnationalism--three closely related issues which redefine contemporary cultural identity. The book opens with an analysis of subjectivity and the cultural meltdown that accompanied fascism in the West. The situation in Africa is then explored which, while recalling modernity's dark side, highlights the intricacy of postcolonial identity. Post-Soviet Eastern Europe presents a separate case of neglected postcoloniality which emphasizes how ethnocentrism and cultural tensions have exposed the fragility of
