you will learn to observe, interpret, and apply the Scripture to transform your life. At the crossroads of philosophy and science, the sometimes-dry topics of evolution and ecology come alive in this new collection of essays--many never before anthologized. Learn how technology may be a sort of second nature, how the systemic human fungus *Candida albicans* can lead to cravings for carrot cake and beer, how the presence of life may be why there's water on Earth, and many other fascinating facts. The essay "Metametazoa" presents perspectives on biology in a philosophical context, demonstrating how the intellectual librarian, pornographer, and political agitator Georges Bataille was influenced by Russian mineralogist Vladimir Vernadsky and how this led to his notion of the absence of meaning in the face of the sun--which later influenced Jacques Derrida, thereby establishing a causal chain of influence from the hard sciences to topics as abstract as deconstruction and post-modernism. In "Spirochetes Awake" the bizarre connection between syphilis and genius in the life of Friedrich Nietzsche is traced. The astonishing similarities of the Acquired-Immune-Deficiency-Syndrome symptoms with those of chronic spirochete infection, it is argued, contrast sharply with the lack of evidence that "HIV is the cause of AIDS". Throughout these readings we are dazzled by the intimacy and necessity of relationships between us and our other planetmates. In our ignorance as

"civilized" people we dismiss, disdain, and deny our kinship with the only productive life forms that sustain this living planet.

Since September 11, 2001, colleges and universities nationwide have expanded their curricula to include intelligence and national security studies, many offering degrees in the subjects. Curiously, no book exists for classroom use in teaching the important skills needed by these professionals to ensure their

products/papers/reports are properly written or briefed. Communicating with Intelligence fills that gap and is aimed primarily at faculty and students pursuing studies in intelligence, national security, homeland security, or homeland defense; but it also has considerable value for working intelligence professionals who simply wish to hone their "rusty" writing or briefing skills. Designed to provide essential information regarding the preparation of written products or intelligence briefings, the book is divided into two parts. Part One, "Writing with Intelligence," contains material on reading intelligence publications and on the basics of writing in the intelligence profession. Part Two, "Briefing with Intelligence," deals with the fundamental principles of an intelligence briefing and includes information on gaining—or regaining—self-confidence behind the podium. Every chapter ends with exercises, many of which can be completed in the classroom to facilitate group activity or by an individual pursuing the study independently. Five appendixes provide additional information for quick reference and an annotated bibliography points toward further sources that can be used.

The object of much debate, attention, and scholarship since it first aired more than 20 years ago, *The Simpsons* provides excellent, if unexpected, fodder for high school and college lesson plans. After all, laughing students are hardly sleeping students! But *The Simpsons* also provides a familiar student knowledge base which instructors can use as a jumping-off point to introduce concepts in literature, composition, linguistics, cultural studies, gender studies, and media appreciation. The authors, both of whom have been teaching *The Simpsons* for more than a decade, share exercises, prompts, and even syllabi that have proven successful in their own courses. Instructors considering this book for use in a course may request an examination copy [here](#).

Wrapped up years roll themselves out as eleven-year-old Poorva whisks through centuries to enter the bygone era of twelve Vishnu devotees of South India, collectively described as the Azhvars. The miracles that she witnesses in their lives leave her speechless while her own journey has her bemused. She finds herself walking through solid walls and riding limpid clouds. Animals and birds offer her company. A Wishing Food Tree floors her with its sumptuous fare of delectable dishes as does a worm-bird by its generous offering of a beak-ful of worms! Cruising through these adventures Poorva gets to experience events of different hues from the lives of the Azhvars. She is mesmerized by the marriage of Andal with Lord Ranganatha and shaken up to see a bankrupt king turn to robbery before his final transformation into an Azhvar.

This edited volume constitutes the first serious, sustained examination of the study of children's books for children aged from 0 to 3 with contributions by scholars working in different domains and attempting to assess the recognition of the role and influence of children's literature on the cognitive, linguistic, psychological and aesthetic development of young children. This collection achieves a balance between theoretical, empirical, historical and cross-cultural approaches by examining the broad range of children's books for children under three years of age, ranging from early-concept books through wimmelbooks and ABC books for small children to picture books that support the young child's acquisition of behavioral norms. Most importantly, the chapters proffer new insights into the strong relationship between children's books for young children and emergent literacy, drawing on current research in children's literature research, visual literacy, cognitive psychology, language acquisition, picture

The Routledge Handbook of Corpus Linguistics provides a timely overview of a dynamic and rapidly growing area with a widely applied methodology. Through the electronic analysis of large bodies of text, corpus linguistics demonstrates and supports linguistic statements and assumptions. In recent years it has seen an ever-widening application in a variety of fields: computational linguistics, discourse analysis, forensic linguistics, pragmatics and translation studies. Bringing together experts in the key areas of development and change, the handbook is structured around six themes which take the reader through building and designing a corpus to using a corpus to study literature and translation. A comprehensive introduction covers the historical development of the field and its growing influence and application in other areas. Structured around five headings for ease of reference, each contribution includes further reading sections with three to five key texts highlighted and annotated to facilitate further exploration of the topics. The Routledge Handbook of Corpus Linguistics is the ideal resource for advanced undergraduates and postgraduates. In recent years non-fiction history programmes have flourished on television. This interdisciplinary study of history programming identifies and examines different genres employed by producers and tracks their commissioning, production, marketing and distribution histories. With comparative references to other European nations and North America, the authors focus on British history programming over the last two decades

and analyse the relationship between the academy and media professionals. They outline and discuss often-competing discourses about how to 'do' history and the underlying assumptions about who watches history programmes. *History on Television* considers recent changes in the media landscape, which have affected to a great degree how history in general, and whose history in particular, appears onscreen. Through a number of case studies, using material from interviews by the authors with academic and media professionals, the role of the 'professional' historian and that of media professionals – commissioning editors and producer/directors - as mediators of historical material and interpretations is analysed, and the ways in which the 'logics of television' shape historical output are outlined and discussed. Building on their analysis, Ann Gray and Erin Bell ask if history on television fulfils its potential to be a form of public history through offering, as it does, a range of interpretations of the past to and originating from or including those not based in the academy. Through consideration of the representation, or absence, of the diversity of British identity – gender, ethnicity and race, social status and regional identities – the authors substantially extend the scope of existing scholarship into history on television. *History on Television* will be essential reading for all those interested in the complex processes involved in the representation of history on television.

In his words: "I chose to be a villain. I'm not proud of it, nor am I ashamed of it. I have paid my debt to society and it's time to go home."
