Given the fact that there are perhaps 400 billion stars in our Galaxy alone, and perhaps 400 billion galaxies in the Universe, it stands to reason that somewhere out there, in the 14-billion-year-old cosmos, there is or once was a civilization at least as advanced as our own. The sheer enormity of the numbers almost demands that we accept the truth of this hypothesis. Why, then, have we encountered no evidence, no messages, no artifacts of these extraterrestrials? In this second, significantly revised and expanded edition of his widely popular book, Webb discusses in detail the (for now!) 75 most

cogent and intriguing solutions to Fermi's famous paradox: If the numbers strongly point to the existence of extraterrestrial civilizations, why have we found no evidence of them? Reviews from the first edition: "Amidst the plethora of books that treat the possibility of extraterrestrial intelligence, this one by Webb ... is outstanding. ... Each solution is presented in a very logical, interesting, thorough manner with accompanying explanations and notes that the intelligent layperson can understand. Webb digs into the issues ... by considering a very broad set of in-depth solutions that he addresses through an interesting and challenging mode of presentation that stretches the mind. ... An excellent book for anyone who has ever asked 'Are we alone?'" (W. E. Howard III, Choice, March, 2003) "Fifty ideas are presented ... that reveal a clearly reasoned examination of what is known as 'The Fermi Paradox'. ... For anyone who enjoys a good detective story, or using their thinking faculties and stretching the imagination to the limits ... 'Where is everybody' will be enormously informative and entertaining. ... Read this book, and whatever your views are about life elsewhere in the Universe, your appreciation for how special life is here on Earth will be enhanced! A worthy addition to any personal library." (Philip Bridle, BBC Radio, March, 2003) Since gaining a BSc in physics from the University of Bristol and a PhD in theoretical physics from the University of Manchester, Stephen Webb has worked in a variety of universities in the UK. He is a regular contributor to the Yearbook of Astronomy series and has published an undergraduate textbook on distance determination in astronomy and cosmology as

well as several popular science books. His interest in the Fermi paradox combines lifelong interests in both science and science fiction.

A shocking exposé of Volkswagen's fraud by the New York Times reporter who covered the scandal. Updated with a New Afterword by the Author. When news of

Volkswagen's clean diesel fraud first broke in September 2015, it sent shockwaves around the world. Overnight, the company long associated with quality, reliability and trust became a universal symbol of greed and deception. Consumers were outraged, investors panicked, the company embarrassed and facing bankruptcy. As lawsuits and criminal investigations piled up, by August 2016 VW had settled with American regulators and car-owners for \$15 billion, with additional fines and claims still looming. In *Faster, Higher, Farther*, Jack Ewing rips the lid off the scandal. He describes VW's rise from "the people's car" during the Nazi era to one of Germany's most prestigious and important global brands, touted for being "green." He paints vivid portraits of Volkswagen chairman Ferdinand Piëch and chief executive Martin Winterkorn, arguing that their unremitting ambition drove employees, working feverishly in pursuit of impossible sales targets, to illegal methods. With unprecedented access to key players and a ringside seat during the course of the legal proceedings, *Faster, Higher, Farther* reveals how the succeed-at-all-costs culture prevalent in modern boardrooms led to one of corporate history's farthest-reaching cases of fraud—with potentially devastating consequences. As the future of one of the world's biggest companies remains uncertain, this is the extraordinary story of Volkswagen's downfall.

The Bugatti Veyron's statistics are mind-boggling: 0-60mph in 2.5 seconds; a top speed of 253 mph; tyres that cost £20,000 a set and an engine with ten radiators and four turbos; a launch control system taken from F1 and even windscreen wipers that create sizeable downforce ... all delivered complete with a high-end stereo system, luxurious leather seats and air-conditioning. It was a feat of engineering grandiosity that, in automotive terms, rivals the achievements of the great 19th Century industrialists. In *A Quest for Perfection*, no. 1 bestselling author Martin Roach sets out to track down the mythical beast that is a Bugatti Veyron - and ultimately attempts to drive one. He traces the genesis of this remarkable machine through Bugatti's long and glorious early days and then through its more turbulent modern era. Travelling to the top secret Bugatti Research & Development workshop in Germany, touring the factory and chateau in France where these stunning cars are hand-built, interviewing famous engineers, super-rich owners and automotive presidents, as well as a host of other expert eye-witnesses to this unique car's many achievements, Roach ponders this mechanical whirlwind and in so doing has written a page-turning study of a modern masterpiece. *Bugatti Veyron: A Quest for Perfection* discovers and unravels the enigma that is this remarkable car. Part-history, part-personal obsession, part-travelogue, part-humorous quest, altogether a book that will

appeal to both fans of cars, and serious petrol-heads, Top Gear viewers as well as anyone who has ever raised an eyebrow as a shiny piece of metal on four wheels drives past in the street. 'A tragic age and a tragic character, both seemingly compelled to destroy themselves...a chilling reminder of how little control we have over our fates'
Damon Hill 'One of the greatest motor racing stories'
Nick Mason 'Timely, vivid and enthralling ... it's unputdownable'
Miranda Seymour, author of *The Bugatti Queen*
Dick Seaman was the archetypal dashing motorsport hero of the 1930s, the first Englishman to win a race for Mercedes-Benz and the last Grand Prix driver to die at the wheel before the outbreak of the Second World War. Award-winning author Richard Williams reveals the remarkable but now forgotten story of a driver whose battles against the leading figures of motor racing's golden age inspired the post-war generation of British champions. The son of wealthy parents, educated at Rugby and Cambridge, Seaman grew up in a privileged world of house parties, jazz and fast cars. But motor racing was no mere hobby: it became such an obsession that he dropped out of university to pursue his ambitions, squeezing money out of his parents to buy better cars. When he was

offered a contract with the world-beating, state-sponsored Mercedes team in 1937, he signed up despite the growing political tensions between Britain and Germany. A year later, he celebrated victory in the German Grand Prix with the beautiful 18-year-old daughter of the founder of BMW. Their wedding that summer would force a split with his family, a costly rift that had not been closed six months later when he crashed in the rain while leading at Spa, dying with his divided loyalties seemingly unresolved. He was just 26 years old. *A Race with Love and Death* is a gripping tale of speed, romance and tragedy. Set in an era of rising tensions, where the urge to live each moment to the full never seemed more important, it is a richly evocative story that grips from first to last.

The official biography of Top Gear's tame racing driver, from the early years to present day. The Stig is known to millions as Top Gear's tame racing driver, famed for his skillful driving and his legendary reluctance to speak. Other details of his life are the subject of much speculation, yet almost nothing of any substance is known about the man behind the visor. Where did he come from? What is his motivation? Did he really once punch a horse to the ground? Simon du Marche (*Princess Margaret -- Gin & Gentility*; *Keith Chegwin -- Tears of An Idiot*) has devoted over two years to getting inside that trademark white helmet. He has pursued The Stig -- sometimes literally -- in a relentless quest to unearth

the truth and now, at last, his findings can be revealed. Through extensive research and in-depth interviews with celebrities, motorsport experts and Top Gear presenters Jeremy Clarkson, Richard Hammond and James May, du Marche has built up an unprecedented picture of what lies beneath the white suit. His quest threw up many questions: can Stig-like characters really be seen in the hieroglyphics of ancient Egypt? Was The Stig present at some of the most pivotal moments in history? Why is a driver of The Stig's considerable ability not in Formula 1? Who was the mysterious figure in white seen leaving Angelina Jolie's hotel room? How can anyone not understand how stairs work? Happily, these questions -- and many, many others -- will be answered in Simon du Marche's landmark work, *The Stig*.
