This book is helpful for importers as well as exporters of apparel and textiles to the USA. Exporters from different countries will hopefully make use of the information I share in this book. The book targets importers, exporters, business executives, textile industry professionals, students, etc. Before I mention what this book is all about, let me remark on how the idea of writing first came about. I have been associated with international trade for over 20 years. Having lived in both Pakistan and the US, I have been able to obtain a vast knowledge on importing and exporting. I have also traveled extensively throughout the world, which has enabled me to gain a great deal of exposure, knowledge, and information on global trade. Over time, the idea of putting all my experiences together began to develop in my mind. I am not aware of any other book that serves as a complete guide for importers and exporters of apparel and textiles to the USA. In the book, I have tried to pass on my knowledge of business to both importers and exporters. The book discusses different steps one needs to take in setting up a business. It explains everything from the advantages of the export business and the production of apparel to making a practical entry into the US apparel and textile market. It also provides valuable information to entrepreneurs in the US and elsewhere, who might be interested in importing apparel and textiles from Pakistan. This information will save a tremendous amount of time for any importer or exporter, especially beginners. It is designed to give a head start to any entrepreneur. I have tried to keep this book error free to the best of my ability, but I apologize if any mistakes or inaccuracies are found or if there is a disagreement on an opinion. The book is divided into two parts. Part 1: Export to the USA This part provides a wealth of information for exporters around the world who want to sell their products to the US. It covers topics in depth, including methods of finding US buyers, market research, important trade shows, options of selling, web sites of designers and large US chain stores, garment production, apparel machinery, fashion and color forecasting information, and much more! Part 2: Import from Pakistan This part serves as a guide for importers on how to acquire apparel and textiles from Pakistan. It provides information on how to reach Pakistani manufacturers, exporters, and more.

This publication seeks to promote a process of simplification and harmonization of procedures for international trade making documentation as simple and direct as possible for traders, public authorities and governments. The requirements and complexity of import, export and transit-related regulations often place a burden on company resources, creating a barrier to the development and efficiency of international trade, in particular for small and medium sized enterprises (SMEs). To make trade easier the UN recommends that governments and traders should establish a "Single Window" where trade-related information and /or documents need only be submitted once, at a single entry point, and that further, all participating authorities and agencies should coordinate their respective controls through this "Single Window", providing facilities for the payment of relevant duties, taxes and fees.
