The papers published in this volume were originally presented at the Sixth International Conference on Teaching and Language Corpora (4-7 July 2004 Granada, Spain) and reflect the latest developments that have taken place in the field of the teaching applications of text corpora, with a special emphasis on their use in the foreign language classroom. The book is divided into three main sections. The first section sets the scene for what this collection of essays aims to be. It deals with the issue of what corpus linguistics can do not only for the understanding of the nature of language itself but also for so fundamental and miraculous a matter such as language learning and language acquisition. The second section tackles the issues of corpus design and corpus exploitation and provides the reader with a great variety of evidence in favour of corpora exploitation for the building of a successful teaching environment. The final section deals with practical applications of corpora in the foreign language classroom. Although each of the papers here reports particular experiences in very different teaching and learning contexts, as a whole they show that corpora can be used on the spot in a language teaching context by teachers and learners without extensive training in computational tools, and studies of linguistics features can be tailored to specific pedagogic context and learning requirements. The book represents a solid contribution to linguistic studies and language teaching and it is a good example of the diversity of the scientific lines in which corpus linguistics is involved at the present moment.

Translation is a phenomenon that affects us all on a daily basis, the more so now that dissemination of information is greatly enhanced by modern technology. However, there are no strict regulations on who can become a translator and what qualifications are required. The contributors to this volume strive to find out whether translators are taught, self-taught or trained, what the teaching or training programmes are like and how they can be improved. This is a companion volume to Teaching Translation and Interpreting: Challenges and Practices (edited by ?ukasz Bogucki, Cambridge Scholars Publishing, 2010). It contains papers delivered at two international conferences devoted to teaching translation and interpreting, organised in ?ód?, Poland, as well as invited contributions. The authors are translation and interpreting scholars and teachers from leading Polish and Ukrainian universities.

In addition to providing over 90 dictionary activities to use in the language classroom, this book is also invaluable to any teacher who wants to improve their own knowledge of how dictionaries work. Dictionary Activities contains eight chapters which deal with: Confidence and dictionary skills-building activities, vocabulary-building activities, grammar activities, pronunciation activities, reading and writing activities, quick activities, CD-ROM and electronic dictionary activities and specialized dictionaries. A wealth of ideas for building dictionary skills in class and making the most of dictionaries as a teaching resource.

One of the greatest challenges for non-native speakers of English is collocations, those phrases that we use all the time that just don't translate well into other languages. For example the in English we say to catch a cold but in other languages they say to eat a cold. As soon as a non-native speaker directly translates their phrase correctly, they give away their identity. In business situations this can put the speaker at a disadvantage as most people associate low language ability with low intelligence. A single collocation mistake can have a dramatic impact on the way an employee is

perceived in the office. In my work with multiple non-native speakers with high level executive positions at international firms, I often found that a few collocation mistakes led to a great deal of embarrassment in the workplace as her supervisor then demanded to review and edit every single email before she was allowed to send it to another department. This highly intelligent executive left her position shortly after this experience. By short cutting the collocation learning curve we can help our business students have better work experiences.

This book fills the need for a text that integrates Information and Communication Technologies (ICTs) into English for Specific Purposes (ESP). It offers insights on current methodological principles in ESP in both academic and professional contexts, drawing on authentic teaching and learning situations, and analyses best practice guidelines. Part I begins with ESP pedagogical principles and technological practice in order to focus on its two main branches: English for Academic Purposes, which includes linguistic skills and students' needs, and English for Occupational Purposes, specifically looking at Business, Medical and Translators courses. This book is a great resource for ESP researchers, educators and students, because it provides case studies of how ICTs can be used in English for multiple purposes. Authors present their experiences of integrating tools into their instructions, with each chapter contributing unique pedagogical implications.
