The one thing investors seek when funding new ideas - here's what to do if you want to turn your business into the next Apple. Having a great idea isn't enough to launch a multi-million-dollar business. Let's face it, investors don't put money in ideas. They need concrete evidence that they'll get return on their investment, and a good business plan gives them such information. Do you have a hard time figuring out how to get a business plan down on paper? Are you tired and confused by all the business jargon, just wanting a straightforward how-to guide outlining exactly what you need to do? Business plans are the heart and soul of a successful company - they give you focus and operational clarity that can kick major mistakes to the curb. No matter how good your business idea is, you will need a plan to create a solid foundation before going on the market or trying to get investors on board. Did you know that even science says you need a business plan to make your startup a success? One study found out that companies with a business plan grow 30% faster than competitors! In addition, startups with a business plan achieve more sustainable success in the long run. So, what's the secret to writing a business plan like a seasoned pro or a Fortune 500 company CEO? It's not something you'll learn in business school, as experience shows a completely different side of running a business. For best results, you need to learn from someone who's already been there and who has conquered the almighty business plan. In *How to Write a Winning Business Plan*, you will discover: What a business model canvas is and 4 reasons why you should be using it How a great idea dies in the absence of good organization and the one thing to do about it 9 business plan building blocks to put organizational specifics in place Surefire ways to overcome financial conundrums and secure the investment needed to help your business thrive Ways in which successful CEOs mitigate business startup risks A bulletproof technique to write a killer value proposition Tactics for pinpointing the right customers and reaching them through the power of marketing A comprehensive guide to understand your business model in a structured way How to analyze the competition if you want to benefit from some competitive advantage And much more. Most guides focusing on business plan creation are rather vague, abstract, and non-specific. By relying on those, you'll never put together a tailored strategic document that will set you up for success from day one. The methodology you'll find in *How to Write a Winning Business Plan* is derived from reality and analysis of the best corporate organizational approaches out there. It doesn't matter what field you operate in or how big you want to grow. This methodology is the way to understand your business better, putting together realistic expectations and goals for the future. How would you like to get business startup advice straight from the man who co-founded Global Entrepreneurship Week and StartUp America? Well now you can. Carl Schramm, the man described by The Economist as 'The Evangelist of Entrepreneurship', has written a myth-busting guide packed with tools and techniques to help you get your big idea off the ground. Carl believes that entrepreneurship has been completely misrepresented by the media, business books, university programmes and MBA courses. He believes that the perception of what it takes to start a business no longer matches the reality - which is bad news for everyone because it stops great ideas coming to life. Burn the Business Plan punctures the myth of the cool, tech-savvy 20-something entrepreneur with nothing to lose and venture capital to burn, showing that most people who start businesses are juggling careers and mortgages just like you. Burn the Business Plan is written to encourage you to get started. It demystifies the entrepreneurial process portrayed on television shows like Dragon's Den. It doesn't rely on largely irrelevant stories of overvalued tech startups, nor does it build on the largely mistaken narrative of a linear path from cold start to great success that is the essence of business planning, as taught in universities. This is the guide to starting and running a business that will actually work for the rest of us. Burn the Business Plan is for regular people who just want practical, real-world advice on how to start and run a successful business. It shows you how to avoid the common mistakes and what you need to do to put your enterprise on track for success. BUSINESS PLAN FOR A BUSINESS START UP Book Description The real value of creating a business plan is not in having the finished product in hand; rather, the value lies in the process of researching and thinking about your business in a systematic way. The act of planning helps you to think things through thoroughly, study and research if you are not sure of the facts, and look at your ideas critically. It takes time now, but avoids costly, perhaps disastrous, mistakes later. This business plan is a generic model suitable for all types of businesses. However, you should modify it to suit your particular circumstances. Before you begin, review the section titled Refining the Plan, found at the end. It suggests emphasizing certain areas depending upon your type of business (manufacturing, retail, service, etc.). It also has tips for fine-tuning your plan to make an effective presentation to investors or bankers. If this is why you're creating your plan, pay particular attention to your writing style. You will be judged by the quality and appearance of your work as well as by your ideas. It typically takes several weeks to complete a good plan. Most of that time is spent in research and re-thinking your ideas and assumptions. But then, that's the value of the process. So make time to do the job properly. Those who do never regret the effort. And finally, be sure to keep detailed notes on your sources of information and on the assumptions underlying your financial data. Writing a business plan should be simple, dynamic, and straightforward. More importantly, it must be a FUNCTIONAL tool that advances you forward towards your goals -- rather than holding you back due to endless tinkering and perfecting of your plan without taking action. Enter the 24 Hour Business Plan Template, your functional tool to get you there as efficiently as possible. This is a complete guide that includes a downloadable pre-formatted business plan template and cash flow spreadsheet to help you get started. In the book, I lay out the method I personally used to plan my own business - and in doing so, leave my full-time job and start my business on a full-time basis within seven months. My plan itself was constructed in under 24 hours on January 1, 2015 as my new years resolution; the remainder of the time spent was executing this plan over time. In the book you'll learn how to do the same, or close to it at the very least - and you'll begin to understand why this efficiency in the beginning is so important. To reiterate, it's important to get to the action-taking phase as soon as possible. This cannot be overstated enough. Successful entrepreneurs and authors like Eric Ries, Gabriel Weinberg, and Justin Mares tout this very principle in their books The Lean Startup and Traction -- the simple fact is, it's much easier to make progress by taking action and adapting over time vs. trying to get everything perfect the first time around. Too much time can be spent getting stuck in your head due to information

paralysis or perfectionism, only to wake up one day realizing you've actually done nothing concrete at all to advance your goals. Don't be this person! Get up out of your chair and take action to make your goals happen. Realize that it may take several iterations of creating a business plan, or cycling through various ideas, before you feel confident in moving forward with one in particular. This is okay -- and in fact, it's the exact reason why you need to be efficient during the initial planning and evaluation stage. Much better to spend one or two weeks cycling through 5-10 ideas than an entire year getting nowhere. In this book, we'll cover the following topics: -The importance of validation, and how to validate your business idea. -The key elements of designing an amazing cover page for your business plan. -How to write an executive summary, and why it must be written last after everything else. -The proper elements that make up your Company Objectives section. -The right approach to laying out your Products & Services section. -How to setup a target customer profile including the right questions to ask. -Websites and tables that will greatly simplify your industry and competitor analyses. -Several possibilities for getting started with sales and marketing, and the difference between each. -The key elements that will comprise your operational plan and any business logistics. -What roles need to be defined in your Management section. -The preferred formats and metrics to use in your business capitalization (initial funding) section. -How to lay out your financial plan, both for your business and your personal finances. Please know that fat was trimmed from every section of this book to ensure you can get through it and understand the key principles quickly and move on to actually creating your own plan. Only the critical elements were left in, with additional explanation added at key junctions to ensure comprehension. Whether you're venturing out for your first time as an entrepreneur, or you're a seasoned veteran looking for a no-nonsense way to manage the planning process for your next venture, 24 Hour Business Plan Template belongs on your tool belt.

Do you want to increase the odds that your business startup will be a success?
