The Everett D. Graff Collection of Western Americana consists of some 10,000 books, manuscripts, maps, pamphlets, broadsides, broadsheets, and photographs, of which about half are described in the present catalogue. The Graff Collection displays the remarkable breadth of interest, knowledge, and taste of a great bibliophile and student of Western American history. From this rich collection, now in The Newberry Library, Chicago, its former Curator, Colton Storm, has compiled a discriminating and representative Catalogue of the rarer and more unusual materials. Collectors, bibliographers, librarians, historians, and book dealers specializing in Americana will find the Graff Catalogue an interesting and essential tool. Detailed collations and binding descriptions are cited, and many of the more important works have been annotated by Mr. Graff and Mr. Storm. An extensive index of persons and subjects makes the book useful to the scholar as well as to the collector and dealer. The book is not a bibliography but rather a guide to rare or unique source materials now enriching The Newberry Library's outstanding holdings in American history.

The purpose of this essay collection is to recover color's complex and sometimes morally troubling past. By emphasising color's materiality, and how it was produced, exchanged and used, contributors draw attention to the disjuncture between the beauty of color and the blood, sweat, and tears that went into its production, circulation and application as well as to the complicated and varied social meanings attached to color within specific historical and social contexts.

This book surveys the channels through which political ideas

and knowledge were conveyed to the English people from the beginning of the reign of Elizabeth I to the Revolution of 1688. Shapiro argues that an assessment of English political culture requires an examination of all means by which this culture was expressed and communicated. While the discussion focuses primarily on genres such as the sermon, newsbook, poetry, and drama, it also considers the role of events and institutions. Shapiro is the first to explore and elucidate the entire web of communication in early modern English political life.

Discusses the principles of aerodynamics, tools, materials, and building and flying techniques for planes ranging from hand-launched gliders to radio-controlled models

These essays by a prominent Barthian scholar offer a full and unique reading of the most significant modern Protestant theologian for twenty-first century readers.

John Payne Collier (1789–1883), one of the most controversial figures in the history of literary scholarship, pursued a double career. A prolific and highly influential writer on the drama, poetry, and popular prose of Shakespeare's age, Collier was at the same time the promulgator of a great body of forgeries and false evidence, seriously affecting the text and biography of Shakespeare and many others. This monumental two-volume work for the first time addresses the whole of Collier's activity, systematically sorting out his genuine achievements from his impostures. Arthur and Janet Freeman reassess the scholar-forger's long life, milieu, and relations with a large circle of associates and rivals while presenting a chronological bibliography of his extensive publications, all fully annotated with regard to their creditability. The authors also survey the broader
