Safety Critical Systems Handbook: A Straightfoward Guide to Functional Safety, IEC 61508 (2010 Edition) and Related Standards, Including Process IEC 61511 and Machinery IEC 62061 AND ISO 13849, Third Edition, offers a practical guide to the functional safety standard IEC 61508. The book is organized into three parts. Part A discusses the concept of functional safety and the need to express targets by means of safety integrity levels. It places functional safety in context, along with risk assessment, likelihood of fatality, and the cost of conformance. It also explains the life-cycle approach, together with the basic outline of IEC 61508 (known as BS EN 61508 in the UK). Part B discusses functional safety standards for the process, oil, and gas industries; the machinery sector; and other industries such as rail, automotive, avionics, and medical electrical equipment. Part C presents case studies in the form of exercises and examples. These studies cover SIL targeting for a pressure let-down system, burner control system assessment, SIL targeting, a hypothetical proposal for a rail-train braking system, and hydroelectric dam and tidal gates. The only comprehensive guide to IEC 61508, updated to cover the 2010 amendments, that will ensure engineers are compliant with the latest process safety systems design and operation standards Helps readers understand the process required to apply safety critical systems standards Real-world approach helps users to interpret the standard, with case studies and best practice design examples throughout

The acclaimed cookbook author and chocolatier presents an endlessly inventive and delectable selection of cookie recipes—organized by texture! Cookies are easy, enticing, and fun. Yet as the James Beard Award-winning baker Alice Medrich notes, home cooks too often cling to the recipe on a bag of chocolate chips, when so much more is possible. "What if cookies reflected our modern culinary sensibility—our spirit of adventure and passion for flavors and even our dietary concerns?" Medrich writes in her introduction to this landmark cookie cookbook, organized by texture, from crunchy to airy to chunky. A master manipulator of ingredients, Medrich draws on the world's pantry for delicious riffs on classics—from chocolate chip cookies and brownies to airy meringues studded with cashews and chocolate chunks, palmiers (elephant's ears) made with cardamom and caramel, and rugelach with halvah. Butter and sugar content is slashed and the flavor turned up on everything from ginger snaps to chocolate clouds. And with delectable 2-point treats for Weight Watchers and cookies to make with kids, this master conjurer of sweets brings bliss to every dessert table. An IACP Cookbook Award Winner

A short self-study or classroom course (40-60 hours) for nurses who need to use English in the workplace"--Publisher's description.

Prior to its involvement with the Iraqi air force in 2004, the US Air Force (USAF) was relatively inexperienced in helping to create an air force for a partner nation. Usually the partner nation would already have an air force and the requisite infrastructure-only needing better airplanes, more training, or additional spare parts for the equipment already on hand. None of those conditions were present in Iraq when the Coalition Military Assistance Training Team (CMATT) was tasked to create an air corps for what the Coalition Provisional Authority called the New Iraqi Army. Nor were the handful of USAF personnel assigned to the CMATT air cell (CMATT-A) given any special preparations or high-level support and oversight after that task had morphed into the creation of a full-fledged Iraqi air force- and all that must accompany such an undertaking-in 2005.The resulting ad hoc nature of CMATT-A's operations combined with other factors to produce an untenable situation for the USAF, USAF Reserve, and other Department of Defense component advisors involved. Unfortunately, that increasingly serious situation did not garner the attention of the USAF's senior leadership until such neglect was found to be a contributing factor in an aircraft accident that took the lives of five dedicated Airmen-four USAF members and an Iraqi Air Force officer-on 30 May 2005.This study summarizes the events that led up to that accident and the consequences that followed, including the decision to replace CMATT-A with a larger, better-resourced organization led by a USAF general officer, the recognition of the need to deploy significantly greater numbers of suitably trained USAF instructor/advisor Airmen to Iraq, and the concerted action to assist the Iraqi Air Force in obtaining more capable aircraft. These improvements took the better part of two years' analyses, preparations, investment, and adjustments. This study summarizes the essentials of that complex sequence of events. It is a story about accomplishing a demanding, unheralded mission under harrowing conditions in a foreign land.

The National Wildfire Coordinating Group provides national leadership to enable interoperable wildland fire operations among federal, state, local, tribal, and territorial partners. Primary objectives include: Establish national interagency wildland fire operations standards. Recognize that the decision to adopt standards is made independently by the NWCG members and communicated through their respective directives systems; Establish wildland fire position standards, qualifications requirements,

and performance support capabilities (e.g. training courses, job aids) that enable implementation of NWCG standards; Support the National Cohesive Wildland Fire Management Strategy goals: to restore and maintain resilient landscapes; create fire adapted communities; and respond to wildfires safely and effectively; Establish information technology (IT) capability requirements for wildland fire; and Ensure that all NWCG activities contribute to safe, effective, and coordinated national interagency wildland fire operations. The objectives of the "Interagency Helicopter Operations Guide" (IHOG) are to: Promote safe, cost-efficient and effective aviation services in support of agency and interagency goals and objectives; Define and standardize national, interagency helicopter management and operational procedures for helicopter users from participating agencies; Through standardization, facilitate the ability of personnel from different agencies to work cooperatively on incidents or projects; and Provide a framework within which areas, regions, states, and local units can provide supplemental, site-specific guidance. The procedures contained in this guide apply to helicopter operations conducted by providers and users of helicopters from participating agencies. This guide addresses both incident and resource helicopter operations.
