What others are saying about "LEED Green Associate Exam Guide"...(Part I) "Finally! A comprehensive study tool for LEED GA Prep!" "I took the one-day Green LEED Green Associate course and walked away with a power point binder printed in very small print--which was missing MUCH of the required information (although I didn't know it at the time). I studied my little heart out and took the test, only to fail it by 1 point. Turns out I did NOT study all the material I needed to in order to pass the test. I found this book, read it, marked it up, retook the test, and passed it with a 95%. Look, we all know the LEED Green Associate Exam is new and the resources for study are VERY limited. This one's the VERY best out there right now. I highly recommend it." --Consultant VA "Complete overview for the LEED Green Associate exam" "I studied this book for about three days and passed the exam ... if you are truly interested in learning about the LEED system and green building design, this is a great place to start." --K.A. What others are saying about LEED BD&C Exam Guide ... "Passed on first try, only used this guide "This is the best study guide HANDS DOWN. If you're serious about passing the LEED AP BD&C exam on your first try, this is the one you've been looking for! I bought Mr. Chen's LEED Green Associate Exam Guide 2 months ago and passed it on the first try as well. I purchased the USGBC reference guide and Mr. Chen's LEED BD&C Exam Guide. I never opened the USGBC reference guide, only studied from Mr. Chen's study guide. I followed Mr. Chen's instructions and studied the guide for 2 weeks (yes, I have a full-time job). I did ignore the mnemonics, not my learning style (makes it more confusing to me). The exam was not easy, but I prepared and stuck to this material. I am not a good test taker by no means. I reviewed the technical data of the guide about 6 times and ignored everything else I had read or heard about the exam. Here's a piece of advice that I picked up from this book, spend less time on practice tests and more time studying! I have a subscription to a web exam simulator (rated the best) and only did about 100 questions, until I realized that I was wasting my valuable time. Find a good book and stick to it. This is also a great reference guide to use on everyday projects. Review the material, try to understand it, then try to memorize it through repetition. I would like to shake your hand and say THANKS AGAIN MR. GANG CHEN !!!" —LOBO

"Excellent Guide and Good Manual "I passed the LEED AP BD+C and the LEED AP ID+C exams this year and Gang Chen's books were my primary study material! The books are easy to read and use. Gang Chen provides study hints and guidance as well as an outline format that makes it easy for the reader to grasp key points. He also provides an excellent review of the entire accreditation process which can save people time in personal research. The books are more than study guides; they are helpful as reference manuals because of the easy to follow format. Definitely a keeper in my bookshelf for future project reference."

—Karen M. Scott "Great resource for studying for the LEED Exam! "I have taken and passed the LEED AP BD+C exam and know what it takes. As this author

says, it's not an easy exam and he is right. What is critical to passing is having great teaching tools and this book is one of them. He touches on every aspect of how to memorize data, how questions are formed, what to expect on tricky questions, the content the test writers are looking for and every little detail you need to know when preparing for this exam. I highly recommend this author's books if you are serious about passing any of the LEED exams, hopefully on the first try!" —S. Jennifer Sakiewicz "LEED BD & C Exam Study Guide "Gang Chan's study guide is an excellent resource in preparing to take the LEED AP BD+C exam particularly if one follows the study recommendation made in the guide. It does not replace the LEED Reference manual as the definitive source for technical information but more importantly provides a structure for the study of the information that is easily understood and when followed should provide good assurance of success in passing the exam the 1st time. This is a 'keeper'!" —Spock "Good summary of information to memorize for the test "Chen's exam guide is a good summary of the test relevant information in the LEED reference guide. He underlines specific information that is important to commit to memory for the test. It is a good way to understand which information needs to be strictly memorized if you are preparing for the test in a short amount of time and have a good understanding of the LEED process through your professional experience. I passed the test with a very high score on my first try, and I did use this guide, one other, the LEED reference manual, online sources, a class, and many years of personally working on and completing online LEED submittals through my work. The week before taking the test I used it to commit point values and those kind of details to memory... " —Denver "Not a bulky ref guide "LEED BD&C Exam Guide does a great job in highlighting and summarizing the key points and concepts in USGBC ref guide. If you only have limited amount of time for LEED AP BD+C exam preparation, definitely go for this book." —Metcalf "Very valuable guide! "I am a lighting designer and am preparing to take the LEED BD+C exam...I got LEED BD&C Exam Guide to prepare for the LEED AP BD+C Exam and it was fairly well organized to help me refresh my memory on the background LEED knowledge I had. All the specifics that one needs to know about each credit such as the Purpose of the credit, Credit path, Submittals, Strategies and technologies etc, are clearly organized for every credit. In addition the author also employs the smart technique of Mnemonics which helps in memorizing the vast amount of information in a simplified manner." —Visswapriya Prabakar "Immensely valuable and utterly to the point, a true must have! "This is an excellent publication by Gang Chen that outlines precisely all the key points one need for success. I personally appreciate the easy to adopt memorization technique offered by the author. Practice exams are very comprehensive yet summarized and not to mention highly effective learning tool as it is designed in this book. It is a very delightful experience for me to have this outstanding publication. In a word, this definitely worth the money and for me it turns out extraordinarily helpful." —Shanaz, who passed LEED AP BD+C Exam on the first

try “Very Helpful! “I found LEED BD&C Exam Guide to be very detailed and very helpful. I plan to take the exam soon, and I feel fully prepared for it.” — Yousuf Asadzoi “Good book! “I had appeared for GA and passed. I loved the content and the underlined highlights. I read your book; it gave me insight and knowledge on how credits are applied. Some questions in your book helped me answer ones on the test. Good book, I'll go through it once again when I appear for AP.”

—Haresh Vibhakar, AIIA (India), AIA, LEED Green Associate, Architect “A good outline “The book is an excellent outline to learn the necessary items required to study for the exam. It is not a comprehensive study guide in and of itself. Practice exam is good indicator of test preparation.” —Paul Levine “Solid LEED Study Guide “This is the kind of book I wish was available when I did my original LEED AP exam. It teaches you how to study, which is so important when school is a distant memory. The bulk of the book helps you review and memorize with mnemonics the concepts for each credit that you need to know for the exam. The questions are good representations of questions on the exam. I would recommend to anyone studying for their exam, that they: - First read the chapters in this book on how to study; - Second read the actual LEED BD+C guide to give you the background information on the credits and gain comprehension.

Underline and review as the author indicates to get the most out of your study time. - Finally read the rest of this exam guide to help you review and memorize for the exam.” —missfitz "missfitz" “Very Helpful Guide “Gang Chen's LEED BD&C Exam Guides very helpful in consolidating information from USGBC and GBCI sources as well as providing the information that is necessary for the exam without excess irrelevant information. I highly recommend this book for preparation for the LEED BD+C exams.” —leedap

Follow this orphan through two orphanages in Pennsylvania from the age of 2 until the age of 14 when he runs away and lives on the streets of Philadelphia. A four year stint in the US Air Force is followed by a concurrent pursuit of education including law school while working as a conductor on the railroad and publishing a small town newspaper. Many relationships are attempted but none succeed. A despicable crime earns him a punishment of a 20 year sentence in Folsom State Prison in California. Considered the most violent US prison in the 80s, cunning, luck and mainly faith allow him to survive. Following an early release he spends almost twenty years as a public servant, using computer skills learned before leaving the prison system. The essence of this unbelievable autobiography is a quest to find the answers to two questions that haunt society and whose experts have been unable to answer. What is a cause and what is a cure for pedophilia? If those experts read this autobiography, they may find clues or answers to each question. The author discovers his answers by re-living his life through this writing. Because of the content of this unique book, there is a printed warning that must be read before reading this unique life story. This book is intended for open-minded adults, parents, teachers, psychiatrists, psychologists, social workers, law enforcement and justice officials, and perhaps Christians who might just want to read the mother of all testimonies. It is especially directed at those persons on the verge of committing the same crime for which Steve A. Mizera spent a frightening time in prison in the hope that they will not repeat his mistake and ruin their life, and create a victim whose life will also be ruined. At times this book is both funny and serious. The reader may cry or get angry. Whatever else it may be, it is also an education that may not be available anywhere else. Elizabeth McCrory wrote the introduction to this book in which she offers the reader plenty of reasons to read it: "Steve Mizera would not have chosen the childhood he was forced to endure. Nobody would. News

reports pop up all the time about figures in positions of leadership using their superiority and power to abuse trusting young children. Boy Scout leaders, Catholic Priests, and even more recently, Penn State coaches have all been stigmatized for their role in the suffering of children under their watch. Unfortunately for Steve, the institution he lived in as a young boy included the stereotypical pedophilic activity making headlines today. His journey starts in a very dark place, and brings the reader through his adolescence to his adulthood, including details of the horror he inflicted on victims of his own, eventually finding a new life in Christ, with a loving family that he had been robbed of as a boy. Along the way, the author describes his own theories and insights regarding the choices of those around him, as well as his own. When the opportunity arose for me to help proofread and edit his initial writings, I found myself intrigued, hoping his words will help reach others and possibly assist them to seek help and/or enlightenment of their own. As it is often said, if this book helps stop one child from being abused, or steers one offender toward rehabilitation, then his goal will have been fulfilled." The National Eligibility cum Entrance Test (NEET) is conducted every year to grant admission to aspirants into MBBS / BDS courses across the country. From 2020 onwards, NEET is conducted by the National Testing Agency (NTA). Earlier, it was known as All India Pre-Medical Test (AIPMT) and was conducted by the Central Board of Secondary Education (CBSE). The Medical Council of India (MCI) has recommended the syllabus for NEET after review of various State syllabi as well as those prepared by CBSE, NCERT and COBSE. This was done to establish uniformity across the country keeping in view the relevance of different areas in Medical Education. NEET is held every year in the month of May.
