In Tchaikovsky's symphonic output, his Symphony No. 4 was a pivotal work. It announced the composer as a major symphonist of his time, overshadowing his previous, less-than-distinguished efforts in this form, and opened the way to his last, major, works: the haunting Fifth Symphony and the biographical Sixth, the profound "Pathétique." Tchaikovsky's Fourth Symphony — written in 1877 at the age of thirty-seven — offers itself as an intensely personal statement. Dramatically shaped and brilliantly orchestrated, it captures a theatrical quality and orchestral color that shaped the composer's symphonic fantasy *Francesca da Rimini*, written just a year earlier. The Fourth opens unequivocally with the thrust of a brass fanfare — the "fate" motive that is to reappear in the last movement — then flows with the effortless quality that characterizes Tchaikovsky's great, generously melodious ballet scores. The second movement lingers over one of the composer's most poignant melodies, and the third — the Scherzo — offers a delightful fantasy from this master orchestrator: the charming Pizzicato ostinato, a unique moment in the entire orchestral literature. The symphony is reproduced here from the authoritative Breitkopf &

Could your ancestors write their own names or did they mark official documents with a cross? Why did great-

grandfather write so cryptically on a postcard home during the First World War? Why did great-grandmother copy all the letters she wrote into letter-books? How unusual was it that great-uncle sat down and wrote a poem, or a memoir? *Researching Family History Through Ancestors' Personal Writings* looks at the kinds of (mainly unpublished) writing that could turn up amongst family papers from the Victorian period onwards - a time during which writing became crucial for holding families together and managing their collective affairs. With industrialization, improved education, and far more geographical mobility, British people of all classes were writing for new purposes, with new implements, in new styles, using new modes of expression and new methods of communication (e.g. telegrams and postcards). Our ancestors had an itch for scribbling from the most basic marks (initials, signatures and graffiti on objects as varied as trees, rafters and window ledges), through more emotionally charged kinds of writing such as letters and diaries, to more creative works such as poetry and even fiction. This book shows family historians how to get the most out of documents written by their ancestors and, therefore, how better to understand the people behind the words.

This calligraphy book includes basic instruction in penmanship and a gallery of finished work from top calligraphers.

In recent years, there has been a growing academic acknowledgment around the world of a contemporary Buddhist phenomenon described as Engaged, or Socially Engaged Buddhism (SEB). It is a contested phenomenon variously associated with finding Buddhist solutions for social, political and

ecological problems. The debate about its origins, practice and legitimacy has stirred academics and practitioners alike. Firstly, does such an approach to Buddhist practice constitute a departure with the past, in which case a new expression of an ancient practice is being experienced all around us? Or is this really a continuity of practice, adapted to inform current understanding given that some would describe Buddhism as always having been engaged? *Adaptation and Developments in Western Buddhism* examines the UK Socially Engaged Buddhist experience captured through a series of five case studies of Buddhist groups and a survey undertaken over two years in the field. The volume is a ground-breaking and benchmark analysis of Socially Engaged Buddhism in the UK, drawing for the first time on evidence from practitioner's experiences with which to characterise the previously dichotomous academic debate. Ultimately, the volume locates Socially Engaged Buddhism in the UK and places it within the broader and global context of an emerging "Western Buddhism??, characterising the phenomenon and its relationships to the wider Buddhist world.
