The Realities of Teacher' Work: Never a Dull Moment follows the fortunes of the teachers at Hillview Primary School over ten years. It explores what it is like to be a primary or elementary school teacher in an urban school with about 200 children, mixed in social class and ethnicity, and suggests what we may learn from them for the future. Sandra Acker links her research with other literature on teachers' work, and describes the school as a workplace, focusing on four key features: the characteristics of the children, the school's physical setting, the available resources, and the ethos of the school. She successfully places us in the classroom giving vivid images of daily interactions with the children, and shows too how teaching extends far beyond the classroom door. The book explores the caring culture that has developed among the teachers and helps them to cope with the difficulties they encounter. It also considers the school as located in the wider community by looking at changes in teachers' careers over time and the effects on Hillview of recent educational reform. This book shows us how and why we need to revise our assumptions about schools and teachers and see them not as isolated individuals in closed classrooms and self-contained schools, but as an integral part of a much broader community. Above all, it shows that teaching is hard, demanding work that is influenced by workplace cultures and the gendered expectations society holds about teachers.

This book presents a collection of original research articles that showcase the state of the art of research in corpus and computational linguistic approaches to Chinese language teaching, learning and assessment. It offers a comprehensive set of corpus resources and natural language processing tools that are useful for teaching, learning and assessing Chinese as a second or foreign language; methods for implementing such resources and techniques in Chinese pedagogy and assessment; as well as research findings on the effectiveness of using such resources and techniques in various aspects of Chinese pedagogy and assessment.

This volume brings together a selection of articles about research conducted on language acquisition in the Baltic States, namely in Latvia and Lithuania, a field which has witnessed massive growth in recent years. The book begins with an introduction which specifies the problems investigated by the contributions in order to acquaint the reader with current issues and research in linguodidactics and applied linguistics. The volume will particularly appeal to scholars of language acquisition, as well as anyone interested in research and practical activities concerning language education in the Baltic States. The papers compiled here are grouped into five sections: language acquisition in the context of bilingualism and multilingualism; pedagogical factors of language acquisition; research on literacy; language acquisition at an early age; and research in linguodidactics to assist language acquisition. This volume will stimulate the reader to ask questions, think of solutions, argue and propose counterarguments

with regards to language acquisition in this region. The driving force in this field is dialogue and argumentative discussion, not utilitarian notes and advice, and, through detailing a range of views on language acquisition problems and perspectives, the book achieves that aim.

This practical and research-based introduction to current and effective English grammar instruction gives pre-service and in-service teachers and teacher educators a strong foundation for teaching second language grammar and helps them develop their professional knowledge and skills. Written in a highly readable style for an international audience, it provides a thorough and rounded overview of the principles, strategies, techniques, and applications currently dominant in teaching L2 grammar in a range of instructional settings around the world.

Chapter authors are world-class authorities in grammar and grammar teaching and learning. All chapters are based on theoretical frameworks and/or research foundations with a strong emphasis on practical applications and implications for classroom teaching, and highlight teaching methods, key concepts, and terminology associated with grammar instruction. Illuminating the options and choices in grammar teaching from a contemporary perspective, *Teaching English Grammar to Speakers of Other Languages* is ideal as key text for students in undergraduate and graduate MA-TESOL programs and as a resource for practicing ESL/EFL teachers, teacher educators, and teaching faculty.

The audience remains much the same as for the 1992 Handbook, namely, mathematics education researchers and other scholars conducting work in mathematics education. This group includes college and university faculty, graduate students, investigators in research and development centers, and staff members at federal, state, and local agencies that conduct and use research within the discipline of mathematics. The intent of the authors of this volume is to provide useful perspectives as well as pertinent information for conducting investigations that are informed by previous work. The Handbook should also be a useful textbook for graduate research seminars. In addition to the audience mentioned above, the present Handbook contains chapters that should be relevant to four other groups: teacher educators, curriculum developers, state and national policy makers, and test developers and others involved with assessment. Taken as a whole, the chapters reflect the mathematics education research community's willingness to accept the challenge of helping the public understand what mathematics education research is all about and what the relevance of their research findings might be for those outside their immediate community.

2007 saw the publication of the European Portfolio for Student Teachers of Languages (EPOSTL) by the Council of Europe, the result of a project carried out under the auspices of the European Centre for Modern Languages. The central aim of this project was to produce a document which would contribute to the harmonisation of teacher education in Europe. The EPOSTL is a portfolio intended for students undergoing their initial teacher education which encourages them to reflect on the didactic knowledge and skills necessary to teach languages, helps them to self-assess their own didactic competences and enables them to monitor their progress and to record their experiences of teaching during the course of their teacher education. At its heart are 195 "I can" descriptors of didactic competences, which teachers strive to attain. The EPOSTL has since been translated into 13 languages and is used widely across Europe and beyond. The main aim of Insights into the European Portfolio for Student Teachers of Languages (EPOSTL) is to explore important theoretical issues, an understanding of which is necessary to support the use of the EPOSTL in teacher education programmes. The first part of the book provides discussions of relevant theoretical areas: the role of reflection, learner autonomy and intercultural awareness. In the second part, the focus is on the relationship between the EPOSTL and other European publications, such as the Common European Framework of Reference and the European Profile for Language Teacher Education. Suggestions are made as to how they can be used together in teacher education. The final section provides case studies on the use of the EPOSTL in three European countries. Whether users of the EPOSTL or not, both teacher educators and their students will find that the discussions of this book provide important insights into key aspects of teacher education.

Building on both Western and Asian theoretical resources, the book examines how EIL teachers see themselves as professional and individual in relation to their work practices. It reveals the tensions, compromises, negotiations and resistance in their enactment of different roles and selves, especially when they are exposed to values often associated with the English-speaking West. The ways they perceive their identity formation problematise and challenge the seemingly dominant views of identity as always changing, hybrid and fragmented. Their experiences highlight the importance of the sense of belonging and being, connectedness, continuity and a coherent growth in identity formation. Their attachment to a particular locality and their commitment to perform the moral guide role as EIL teachers serve as the most powerful platform for all their other identities to be constructed, negotiated and reconstituted.

Volume III of the Handbook of Research in Second Language Teaching and Learning, like Volumes I and II, is a comprehensive, state-of-the-art overview of current research into social contexts of second language (L2)/foreign language (FL) teaching and learning; language policy; curriculum; types of instruction; incremental language skills such as listening, speaking, reading, writing, vocabulary, and grammar; international communication; pragmatics; assessment and testing. It differs from earlier volumes in its main purpose—to provide a more in-depth discussion and detailed focus on the development of the essential language skills required for any type of communication: speaking, listening, reading, vocabulary, grammar, and writing. Volume III preserves continuity with previous volumes in its coverage of all the classical areas of research in L2/FL teaching and learning and applied linguistics, but rather than offering a historical review of disciplinary traditions, it explores innovations and new directions of research, acknowledges the enormous complexity of teaching and learning the essential language abilities, and offers a diversity of perspectives. Chapter authors are all leading authorities in their disciplinary areas. What's new in Volume III? Updates the prominent areas of research, including the sub-disciplines addressed in Volumes I and II, and represents the disciplinary mainstays. Considers and discusses perspectives held by different schools of thought on the what, the how, and the why of teaching foundational language skills, including theories, pedagogical principles, and their implementation in practice. Captures new and ongoing developments and trends in the key areas of L2/FL teaching and learning, and innovative research topics that have gained substantial recognition in current publications, including the role of corpora, technology, and digital literacy in L2/FL teaching and learning. Examines new trends in language pedagogy and research, such as an increased societal emphasis on teaching academic language for schooling, somewhat contradictory definitions of literacy, and the growing needs for instruction in intercultural communication.

History Education is a politically contested subject. It can be used to both promote xenophobia and to develop critical thinking, multiple perspectives, and tolerance. Accordingly, this book critically examines complex issues and constructivist approaches that make history relevant to students' understanding of the modern world. As such, it has global appeal especially in North and South America, Canada, Europe and Asia. The book's authors address the major challenges that History Education faces in an era of globalisation, digital revolution and international terror, nationalism and sectarian and religious conflict and warfare. Central to this volume are controversial issues, trauma, and questions of personal and national identity from a wide range of international settings and perspectives. The research in this book was undertaken by leading history educators from every continent. Their interdisciplinary research represents an important contribution to the teaching of social sciences, social psychology, civic education programmes, history and history education in schools, colleges and universities. The book offers new approaches to history educators at all levels. In addition, the chapters offer potential as required reading for students to both develop an international perspective and to compare and contrast their own situations with those that the book covers. Section I considers issues related to identity; how can history education promote social coherence in multicultural societies, in societies divided by sectarianism, or countries adapting to regime changes, whether Communist or Fascist, including, for example, South Africa, previously Communist countries of Eastern Europe, and previous dictatorships in South America and Western Europe. It discusses such questions as: How important is it that students learn the content of history through the processes of historical enquiry? What should that content be and who should decide it, educators or politicians? What is the role of textbooks and who should write and select them? Should history be taught as a discrete discipline or as part of a citizenship or social sciences curriculum? Sections II and III explore ways in which memory of sensitive issues related to the past, to war, or to massacres may be addressed. Are there new methodologies or approaches which make this possible? How can students understand situations involving intolerance and injustice?

An important contribution to the emerging body of research-based knowledge about English grammar, this volume presents empirical studies along with syntheses and overviews of previous and ongoing work on the teaching and learning of grammar for learners of English as a second/foreign language. It explores a variety of approaches, including form-focused instruction, content and

language integration, corpus-based lexicogrammatical approaches, and social perspectives on grammar instruction. Nine chapter authors are Priority Research Grant or Doctoral Dissertation Grant awardees from The International Research Foundation for English Language Education (TIRF), and four overview chapters are written by well-known experts in English language education. Each research chapter addresses issues that motivated the research, the context of the research, data collection and analysis, findings and discussion, and implications for practice, policy, and future research. The TIRF-sponsored research was made possible by a generous gift from Betty Azar. This book honors her contributions to the field and recognizes her generosity in collaborating with TIRF to support research on English grammar. *Teaching and Learning English Grammar* is the second volume in the *Global Research on Teaching and Learning English Series*, co-published by Routledge and TIRF.

In today's world, people speak more than 6000 languages and identify with thousands of cultural groups and a large variety of different religions. Despite such a number of differences, these and other features of human diversity are housed politically, inside roughly 200 nation-states. Globally speaking, a diverse citizenry is an unavoidable fact for most countries across the planet. Additionally, developments such as transnational migrations, rising socio-economic inequalities, the "War(s) on Terror", and political movements based on absolutist ideologies continue to raise broader questions of justice, governance, equality, quality of life and social cohesion. As such, recent decades have witnessed a revival of debates concerning what it means to be a "citizen". In response to such trends, nations such as Australia, Canada, and Britain have committed themselves to teaching citizenship through their national curriculums. Moreover, all European Union member states have integrated some form of citizenship education into their primary and secondary curriculums. Acknowledging such developments, this book uses discussions with citizenship educators as a backdrop for a critical analysis of various conceptions of citizenship, such as liberal, social-democratic, civic-republican, cosmopolitan and multicultural citizenship. It also analyses how these educators approach the contemporary reality of nation states, which are richly composed of a diverse citizenry. Given Britain's transformation into a multi-ethnic and multi-faith society, this book develops, as a case study, an understanding of how religious and cultural difference can be approached. What makes this work unique is that it gleans ideas and research from a wide field of international scholarship, such as political science, philosophy, education, and cultural studies. A further unique aspect of the book is that it uses the q-methodology, a research method used to study people's viewpoints, to reveal some shared perspectives on citizenship. In doing so, the path traced here leads to the discovery of spaces where citizenship educators – despite their ethnic/religious diversity – display "common ground" on values, beliefs and aims related to citizenship. This book will prove to be a useful resource for academics, educators and political leaders, as well as interfaith and civil society professionals at large. It is worth mentioning that even though this book has benefited from the generously contributed ideas of citizenship educators in England, its scholarly research, lessons, arguments, analysis and suggestions, which focus on multi-faith and multi-ethnic societies, will also be useful elsewhere.

This volume links Cognitive Grammar explanations to the area of second-language learning and instructed grammar teaching. It represents a contribution to empirically based knowledge promoting a new perspective on the process of teaching and learning about English language structures. The theoretical part of the book provides an overview of the basic tenets of Cognitive Grammar, and discusses elements of the theory that are of crucial importance for understanding English tense and aspect structures. The second part brings together these two fields of study and tests a Cognitive Grammar approach to teaching tense and aspect to less advanced learners of English. To this end, an experimental study was conducted, comparing the effects of Cognitive Grammar-inspired instruction on the language learning process with those of teaching methods which employ more traditional grammatical descriptions. As such, the book is of particular relevance to Cognitive Grammar research, and second-language learning and teaching research, and for learners and teachers of a foreign language.
