-It is the biggest question of all in the universe, when and from what universe came into being and how it expanded. It puzzled Einstein and many other cosmologist after him. Finally, they have discovered the particle, which they mysteriously named the God particle. As the mystery surrounds this particle, their quest will either end in finding God, the source of the particle or not. -In an age

when biblical truth are considered fairytales by many a scientists, someone must be bold enough to tell the truth that in the beginning the universe was void and darkness prevailed in the entire cosmos until God separated darkness by his eternal light and used 5 percent of the dark matter to create the universe and everything within it. Dr. Cherian courageously links the Scriptures and the science behind the dark matter and the scientists who were divinely guided to name it the God particle. -Newton's and Einstein's dreams have been materialized and though not accepted by the vast majority of scientists openly, many are compromising that universe formed from a cosmic evolution, and life evolved abiogenetically and God interjected his presence into the process of evolution to claim his role-a most absurd stand. -While the latest scientific discoveries tackled the biggest mystery of the universe, scientific discoveries have corroborated the truth man (humanity) is nothing but specks of the dust (Ps. 103:14). -While God who created the universe "sits enthroned above the circle of the earth and stretches out (expanse) the heavens like a canopy and spreads them out like a tent. (Isa. 40:22) is also holding the universe in his hands. -Dr. Cherian brings to light the neglected truth that science and theology are the perfect match of God's truth in the universe. -Most of the scientific discoveries deciphered during the last five hundred years are recorded in the Bible, including

water in the exoplanets and the dark matter and dark energy that have been discovered recently. The author has succinctly explained with specific biblical references and explanations. -The author also reveals that from Plymouth Rock to Independence Hall and throughout the length and breadth of America, the profound Christian heritage is engrained in every inch of the land, and America cannot negate God from our land. -God's systematic order of creation was schemed as stages of unguided evolution. -All Christians of the nation must reinvent the declaration by the Supreme Court of the United States in 1892 that "This a Christian Nation," and present-day lawmakers must adhere to that with freedom and liberty for all. -Like a skilled attorney, the author explains America is part of the "Israel of God and a member of the Commonwealth of Israel," as explained by Apostle Paul. The United States of America and the United Kingdom are two nations blessed by God, under the protection of the Almighty God, and we have a moral mandate to preserve our godly culture and civilization and lead other nations to follow before Armageddon, which is imminent.

The relationship between science and theology has been a crisis for humanity since Darwin's publication of Origin of Species that affects the very core of scientific and Biblical truths with serious consequences. In this detailed and absorbing book Dr. Cherian provides astounding facts of science that were deciphered in the last 500 years, each of which is recorded in the Biblical Scriptures. Heeding back to the Biblical account of creation, Dr. Cherian takes the readers from the erroneous notion of the origin of the universe without a cause and abiogenesis as the source of life to the latest scientific discoveries that corroborate the Biblical evidence for divine creation of the universe, life and species that dispel Darwinian evolution. The Origins of the Universe, Life and Species sheds much light for a better understanding of the Scriptures that were hidden to many scientists, researchers and students to relate the scientific

discoveries that reveal the Biblical truths for a better appreciation of the unknown God who reveals himself through the many scientists and their discoveries. Dr. Cherian, uses all branches of science from astronomy to zoology connecting the dots between science and theology that stretches from the highest of heavens (outer space) to the deepest of ocean floor revealing the unknown God to be the KNOWN GOD.

In this introduction, Gerhard Neuweiler surveys the most current information available on the physiology, ecology, and phylogeny of bats. In 1996, the National Bladder Foundation (NBF) was founded by a dedicated group of physicians and researchers propelled by the urgent need to find better treatments for bladder disease. Committed to increasing bladder disease research and to supporting its research community, the NBF coordinates and sponsors the International Bladder Symposium (IBS) in Washington, DC. Now considered to be a premier scientific assembly, the IBS brings together international leaders in bladder disease research to

present and discuss their findings. It is the only international conference where all areas of bladder disease research are exclusively covered and where bladder disease researchers are provided with a unique opportunity to share their results and theories. IBS participants contributed the research papers included in this publication in 2000 and 2001. All substantial areas of bladder disease research are addressed, including oncology and cellular biology, neurophysiology, neurogenic bladder and incontinence, immunology, inflammation and infection, muscle, matrix and obstruction, and new frontiers and therapies of the bladder. Assembled in one publication, these papers and their findings demonstrate the high scientific caliber of the dedicated researchers in this field and the potential for significant discoveries in treatment options in the next decade. Pathology: Oxidative Stress and Dietary Antioxidants bridges the disciplinary knowledge gap to help advance medical sciences and provide preventative and treatment strategies for pathologists, health care workers, food scientists and nutritionists who have divergent skills. This is important as oxidative stress can be ameliorated with pharmacological, nutraceutical or natural agents. While pathologists and clinical workers understand the processes in disease, they are less conversant in the science of nutrition and dietetics. Conversely, nutritionists and dietitians are less conversant with the detailed clinical background and science of pathology. This book helps to fill those gaps.
