During the period of Japanese domination, Kim Songsu emerged as one of Korea's leading cultural nationalists. This life history details his contribution to the self-strengthening programs moderate nationalists advocated as the foundation for Korea's independence.

Over nine successful editions, CAMPBELL BIOLOGY has been recognised as the world's leading introductory biology textbook. The Australian edition of CAMPBELL BIOLOGY continues to engage students with its dynamic coverage of the essential elements of this critical discipline. It is the only biology text and media product that helps students to make connections across different core topics in biology, between text and visuals, between global and Australian/New Zealand biology, and from scientific study to the real world. The Tenth Edition of Australian CAMPBELL BIOLOGY helps launch students to success in biology through its clear and engaging narrative, superior pedagogy, and innovative use of art and photos to promote student learning. It continues to engage students with its dynamic coverage of the essential elements of this critical discipline. This Tenth Edition, with an increased focus on evolution, ensures students receive the most up-to-date, accurate and relevant information.

Despite the passage of over forty years since the official end of the civil war in Korea, the north and the south sections of the country remain technically at war. In Korea and

its Futures , Roy Grinker argues that the continued conflict between North and South Korea, and the prospects for peace on the Korean peninsula, must be understood within the broader social and cultural contexts in which Koreans live. Grinker suggests that a fundamental obstacle to peace on the peninsula is that South Korea has become a nation in which nearly all aspects of economic, political, and cultural identity are defined in opposition to North Korea. He further demonstrates that in spite of its status as a sacred goal for all Koreans, the idea of unification threatens the world in which almost every South Korean has been born and raised. In chapters on defectors, divided families, student protests, and early education, Grinker reveals how South Korean conceptions of unification prevent either side from recognizing that a unified Korea must also be a diverse Korea. In other words, Grinker points out, unification is largely perceived by South Koreans not as the integration of different identities but as the southern conquest and assimilation of the north - in short, as winning the war.

account of the technological history of agriculture, with major sections devoted to field systems, implements and techniques (sowing, harvesting, storing) and crop systems (what has grown and where and how crops rotated).

Discusses Britain's policy towards Southeast Asia in the period 1950-55, when it was crucially affected by the struggle in Korea. Covering the dispute over West New Guinea and the Chinese Nationalist incursion into Burma, the book gives a full account of the Geneva conference 50 years ago, which reached a settlement in Vietnam, Laos and Cambodia, and of the creation of the SEATO alliance.

Focuses on the most challenging features of Korean pronunciation and pairs practice exercises with chapters on vowel and consonant sounds, and discusses the role of prosody in expressing meaning and emotion.

Words are the building blocks of language. An understanding of how words are learned is central to any theory of language acquisition. This volume looks at early verb learning, focusing on the foundations for verb learning, and how these foundations intersect with the burgeoning language system.

You don't have to look very far these days to see the influence that the film industry of Hong Kong has had on moviemaking around the world. Hong Kong film stars, such as Jackie Chan, Chow Yun-fat, Jet Li, and Michelle Yeoh, have become household names headlining Hollywood blockbusters, while directors

such as John Woo, Tsui Hark, and Wong Kar-wai are closing deals in Tinseltown and developing huge international followings. Despite achieving such recognition abroad, the luster on Hong Kong's homegrown film industry has faded quite a bit over the past decade. However, many Hong Kong cinema aficionados, who passionately followed the rise of the 'Hong Kong New Wave' during the Eighties and early Nineties, only to become increasingly disenchanting since then, are now looking to South Korea for Asia's boldest and most innovative films. Since 1998, South Korea's local film industry has undergone a remarkable transformation. A new generation of Korean moviemakers is revitalizing the industry with bold arthouse productions, big-budget actioners, thought-provoking dramas, and subversive satires. In some circles, South Korea is even being likened to the new 'Hong Kong', with its film industry on the verge of exploding onto the world stage, similar to how the 'Hong Kong New Wave' catapulted the former British colony and its groundbreaking films into the international spotlight. Already, some Korean films have found success in the North American market arthouse circuit, while Korean directors are being courted by major Hollywood studios for lucrative U.S. remake rights. "Korean Cinema: The New Hong Kong" is a guidebook for exploring this new and exciting treasure trove of cinema. It is the first book of its kind, covering this emerging cinematic powerhouse in an easy-

to-read and leisure-focused fashion, bringing all the sought-after information on Korean cinema into one convenient package. Within the pages of *Korean Cinema: The New Hong Kong*, you will find: A brief history of South Korea and its film industry, which will help you understand the reasons behind the revolutionary changes in Korean cinema and what is influencing the country's directors A look at the present state of Korea's filmmaking industry and how it resembles the dot-com era (with the only difference being that these companies are actually making money, and lots of it) An examination of the characteristics, themes, and dominant genres of the films in this newest 'Korean New Wave' In-depth reviews and commentary of the top ten must-see films of this latest 'Korean New Wave' An overview of the top genres of Korean cinema, with reviews, commentary, and notes on availability for the good, the bad, and the ugly A look at the stars of Korean cinema, such as the Korean equivalents to Tom Cruise (Han Suk-kyu) and Julia Roberts (Shim Eun-ha). How moviegoers can go about seeing Korean flicks (with English subtitles too!) So sit back, relax, and get ready to be introduced to *Korean Cinema: The New Hong Kong*! Comments about the book "It's designed for people who are in the process of discovering Korean film, and it's especially useful for people who are building DVD collections. Anthony approaches the industry as a fan of Hong Kong cinema who has gravitated

towards Korean films in recent years... 266 pages in total, so there's a lot of information... I'd recommend it." (Darcy Paquet, Koreanfilm.org, Screen International correspondent, and English language editor for the Korean Film Commission) "Anthony Leong has taken the study of Asian Cinema to the next level. This book helps make sense of Korean cinema. It's an authoritative text, yet thoroughly entertaining, while being the definitive word of this exploding motion pic

Current research fields in science and technology were presented and discussed at the EKC2008, informing about the interests and directions of the scientists and engineers in EU countries and Korea. The Conference has emerged from the idea of bringing together EU and Korea to get to know each other better, especially in fields of science and technology. The focus of the conference is put on the topics: Computational Fluid Dynamics; Mechatronics and Mechanical Engineering; Information and Communications Technology; Life and Natural Sciences; Energy and Environmental Technology.

Provides the first authoritative look inside North Korea, detailing the everyday life of people living in the world's most isolated country in the world.

A fresh historical and theoretical exploration of the much-debated, but still elusive, question of the Korean divide. In contrast to much of the literature on the

divide, which deals with state-building on the two sides of the Demilitarized Zone, this book sheds light on the slow, but steady process of homogenization between the two estranged peoples, as accelerated after the end of the Cold War and especially after the inauguration of President Kim Dae-jung in 1998. Providing immense empirical detail as well as theoretical debate on the ideas in policy shaping in South Korea, the book presents a rich 'history of enemies' and covers issues including: an overview of the structural shift and the rise and fall of identity groups in South Korea history of 'enemy-making' and 'peace-building' North Korea's external relations with the US, Japan and Europe Hyundai's groundbreaking, cross-border tourism and other economic cooperation projects the lingering nuclear weapons crises. By focusing on the question of identities, the book presents a new approach on one of the most important legacies of the Cold War and threat to peace in the contemporary world: the divided Korean peninsula. As such it fills a major gap in the literature, utilizing new theoretical and empirical frameworks to deal with the Korean division and its future implications in East Asia.

A collection of short, epigrammatic poems whose narrator is conceived to be a spider, which represents a mystic observer with a 'spiderly' sense of humor. The poems were written with substantial attention to poetic vision and metaphor.

This book contains 14 chapters focusing on the usefulness of controlled atmosphere (CA) storage in the reduction of postharvest losses and maintenance of the nutritive value and organoleptic characteristics of various fruits and vegetables and extend their season of availability by making good eating quality fruits and vegetables available for extended periods at reasonable costs. The efficacy and shortcomings of various CA storage techniques and their potential as alternatives to the application of preservation and pesticide chemicals are also discussed.

Pak Tu-jin is one of Korea's most revered and influential modern poets. This Pak Tu-jin helped free modern Korean literature in the 1940s from its preoccupation with decadence and fashionable literary trends, finding a new voice rooted in nature and Korean traditions. Pak also represents Christian faith and original philosophical reflection in the development of modern Korean culture and he writes poignantly of his own spiritual struggles. He stood courageously, and at great cost, for freedom and human rights during the long years of military dictatorship in recent Korean history, and the strength of his convictions brings vitality and power to his works. Pak's aesthetic is distinctly Korean while his voice echoes legends and traditions from aspects of many Western and other Asian cultures. His poems of social comment and protest draw the reader into a turmoil of malevolent political and cultural conflict ? contraposed by his love poems and lyric verses where his great heart exults in the sheer joy of life. His poetry illuminates the themes forming modern Korean consciousness and the hearts of the ordinary people engaged in the extraordinary struggles and relationships of Korean life.

In the rich and varied life stories in *Under the Black Umbrella*, elderly Koreans recall incidents that illustrate the complexities of Korea during the colonial period. Hildi Kang here reinvigorates a period of Korean history long shrouded in the

silence of those who endured under the "black umbrella" of Japanese colonial rule. Existing descriptions of the colonial period tend to focus on extremes: imperial repression and national resistance, Japanese subjugation and Korean suffering, Korean backwardness and Japanese progress. "Most people," Kang says, "have read or heard only the horror stories which, although true, tell only a small segment of colonial life." The varied accounts in *Under the Black Umbrella* reveal a truth that is both more ambiguous and more human—the small-scale, mundane realities of life in colonial Korea. Accessible and attractive narratives, linked by brief historical overviews, provide a large and fully textured view of Korea under Japanese rule. Looking past racial hatred and repression, Kang reveals small acts of resistance carried out by Koreans, as well as gestures of fairness by Japanese colonizers. Impressive for the history it recovers and preserves, *Under the Black Umbrella* is a candid, human account of a complicated time in a contested place.
