Excerpt: Zipcar is a membership-based car sharing company providing automobile reservations to its members, billable by the hour or day. Zipcar was founded in 2000 by Cambridge, Massachusetts residents Antje Danielson and Robin Chase, and is now led by Scott Griffith, Chairman and Chief Executive Officer. As of December 2010, the company offers a fleet of over 8,000 vehicles in urban areas throughout 28 North American states and provinces, as well as in the United Kingdom, and has over 560,000 members which the company refers to as "Zipsters." Zipcar offers more than 30 makes and models of self-service vehicles by the hour or day. Zipcar has major operations in Atlanta, Baltimore, Boston, Chicago, London, New York, Philadelphia, Pittsburgh, Portland, San Francisco, Seattle, Toronto, Washington D.C. and Vancouver. The company also has presence on over 230 college campuses. Members can reserve Zipcars online or by phone, 24 hours a day, seven days a week. Reservations can be made minutes up to a year in advance. Zipcar members have automated access to Zipcars using an access card called a "Zipcard," which works with the car's technology to unlock the door, where the keys are already located inside. Zipcar also offers an iPhone application, recognized by Time magazine as one of the "Best Travel Gadgets of 2009," that allows members to honk the horn to locate a Zipcar and unlock the doors. Zipcar charges a one-time application fee of \$25, and an annual fee of \$60, depending on the market, and reservation rates start from \$7.50 per...

Although freedom is America's core value, few Americans have a clear idea of what it means or - worse - enjoy much freedom in any of its conventional meanings. Drawing from republican tradition, the book critiques the contemporary American value of freedom as it appears in politics, the economy, and culture.

The notion of 'creative cities' - where cultural activities and creative and cultural industries play a crucial role in supporting urban creativity and contributing to the new creative economy - has become central to most regional and urban development strategies in recent years. A creative city is supposed to develop imaginative and innovative solutions to a range of social, economic and environmental problems: economic stagnancy, urban shrinkage, social segregation, global competition or more. Cities and regions around the world are trying to develop, facilitate or promote concentrations of creative, innovative and/or knowledge-intensive industries in order to become more competitive. These places are seeking new strategies to combine economic development with quality of place that will increase economic productivity and encourage growth. Against this increasing interest in creative cities, this volume offers a coherent set of articles on sustainable and creative cities, and addresses modern theories and concepts relating to research on sustainability and creativity. It analyses principles and practices of the creative city for the formulation of policies and recommendations towards the sustainable city. It brings together leading academics with different approaches from different disciplines to provide a comprehensive and holistic overview of creativity and sustainability of the city, linking research and practice. In

transportation science sources, this book is an essential tool for professionals, students, and researchers in the fields of transportation research and data mining.

This book constitutes the thoroughly refereed papers of the 8th Chinese Conference on The Semantic Web and Web Science, CSWS 2014, held in Wuhan, China, in August 2014. The 22 research papers presented were carefully reviewed and selected from 61 submissions. The papers are organized in topical sections such as ontology reasoning and learning; semantic data generation and management; and semantic technology and applications.

A pithy yet deep introduction to Einstein's general theory of relativity Of the four fundamental forces of nature, gravity might be the least understood and yet the one with which we are most intimate. On Gravity combines depth with accessibility to take us on a compelling tour of Einstein's general theory of relativity. A. Zee begins with the discovery of gravity waves, then explains how gravity can be understood in comparison to other classical field theories, presents the idea of curved spacetime, and explores black holes and Hawking radiation. Zee travels as far as the theory reaches, leaving us with tantalizing hints of the unknown, from the intransigence of quantum gravity to the mysteries of dark matter. Infused with Zee's signature warmth and fresh style, On Gravity opens a unique pathway to comprehending relativity, gravity, spacetime, and the workings of the universe.

This new Edition of Electronic Commerce is a complete update of the leading graduate level/advanced undergraduate level textbook on the subject. Electronic commerce (EC) describes the manner in which transactions take place over electronic networks, mostly the Internet. It is the process of electronically buying and selling goods, services, and information. Certain EC applications, such as buying and selling stocks and airline tickets online, are reaching maturity, some even exceeding non-Internet trades. However, EC is not just about buying and selling; it also is about electronically communicating, collaborating, and discovering information. It is about e-learning, e-government, social networks, and much more. EC is having an impact on a significant portion of the world, affecting businesses, professions, trade, and of course, people. The most important developments in EC since 2014 are the continuous phenomenal growth of social networks, especially Facebook, LinkedIn and Instagram, and the trend toward conducting EC with mobile devices. Other major developments are the expansion of EC globally, especially in China where you can find the world's largest EC company. Much attention is lately being given to smart commerce and the use of AI-based analytics and big data to enhance the field. Finally, some emerging EC business models are changing industries (e.g., the shared economy models of Uber and Airbnb). The 2018 (9th) edition, brings forth the latest trends in e-commerce, including smart

commerce, social commerce, social collaboration, shared economy, innovations, and mobility.

This book constitutes the refereed proceedings of the 5th International Symposium on Rules, RuleML 2011 - Europe, held in Barcelona, Spain, in July 2011 - collocated with the 22nd International Joint Conference on Artificial Intelligence, IJCAI 2011. It is the first of two RuleML events that take place in 2011. The second RuleML Symposium - RuleML 2011 - America - will be held in Fort Lauderdale, FL, USA, in November 2011. The 18 revised full papers, 8 revised short papers and 3 invited track papers presented together with the abstracts of 2 keynote talks were carefully reviewed and selected from 58 submissions. The papers are organized in the following topical sections: rule-based distributed/multi-agent systems; rules, agents and norms; rule-based event processing and reaction rules; fuzzy rules and uncertainty; rules and the semantic Web; rule learning and extraction; rules and reasoning; and rule-based applications.

We are at the dawn of the Autonomous Revolution, a technological revolution as decisive as the Agricultural and Industrial Revolutions. Autonomous machines are capable of learning and adapting faster than humans and entirely on their own. And for the first time in human history we no longer require physical locations to work, play, shop, socialize, or be entertained. William Davidow and Michael Malone, authors of the seminal book *The Virtual Corporation*, explore the enormous implications of these developments. They show why increases in productivity no longer translate into increases in the GDP, how invisible algorithms control what you see and hear, and much more. Many of the book's recommendations—such as monetizing internet usage and making companies pay for personal information—are likely to be controversial, but this debate needs to begin now, before the Autonomous Revolution overcomes us.

This volume brings together a diverse range of scholars to address important philosophical and interdisciplinary questions in the study of language. Linguistics throughout history has been a conduit to the study of the mind, brain, societal structure, literature and history itself. The epistemic and methodological transfer between the sciences and humanities in regards to linguistics has often been documented, but the underlying philosophical issues have not always been adequately addressed. With 15 original and interdisciplinary chapters, this volume therefore tackles vital questions relating to the philosophy, history, and theoretical interplay between the study of language and fields as varied as logic, physics, biology, classical philology and neuroscience. With a four part structure, questions of the mathematical foundations of linguistics, links to the natural sciences, cognitive implications and historical connections, take centre stage throughout the volume. The final chapters present research related to the linguistic connections between history, philosophy and the humanities more broadly. Advancing new avenues of research, this volume is exemplary in its treatment of diachronic and cross-disciplinary interaction, and will be of interest to all scholars interested in the study of language.

Enterprise ontology is one of the conceptual pillars of enterprise engineering, next to enterprise design and enterprise governance, together accomplishing the goals of intellectual manageability, organisational concinnity and social devotion. By revealing the essence of an enterprise's organisation, enterprise ontology addresses business processes, data and rules in a fundamental and truly integrated way. In addition, it provides deep insight into and broad overview over complex organisational transformations. The book is divided into three parts. Part A is an introduction in enterprise engineering and enterprise ontology. Part B explores the theories underlying enterprise ontology, explaining the foundations of each theory, the elaborations in practical methods and techniques, and the relationships with other comparable approaches. Part C presents the practical application of the theories. It includes a comprehensive summary of the DEMO methodology and the DEMO specification language, as well as exercises and applications of DEMO in various business areas. It also features a chapter on combining DEMO with comparable approaches to modelling business processes, data and rules, to the benefit of the latter. Discussing the theoretical foundations of enterprise ontology and its practical applications in equal measure, this book is the principal textbook in courses on enterprise engineering. Since it unites elements from management science and information systems engineering, it is also relevant to students and professionals in either field.

Three years ago, the first Liquid Legal book compelled the legal profession to reassess its identity and to aspire to become a strategic partner for corporate executives as well as for clients. It also led to the foundation of the Liquid Legal Institute (LLI) – an association that sparks innovation and drives collaboration in the legal industry. This second Liquid Legal book builds on the LLI's progress and on the lessons learned by a legal community that has moved beyond focusing purely on LegalTech. It not only presents an outlook on how legal professionals will operate in the future, but also allows readers to develop a genuine understanding of the value of digitalization, standardization and new methodologies. Further, the book outlines a Common Legal Platform (CLP) and makes it the common point of departure for every author, offering inspiring insights from a wide range of forward-thinking experts who are all invested in driving new thinking within the legal ecosystem. The book also features "Liquid Legal Waves," which provide links between the various articles, connecting concrete ideas, practical solutions and specific topics and putting them into perspective, and so creating a true network of ideas for readers. A must read, this book is vibrant proof of the power of sharing, collaboration and coepetition, helping the legal profession to shape its digital future and revitalize its relevance while retaining a focus on the human lawyer.

Rising energy prices and concerns about climate change are driving us towards a new kind of economy - a low-carbon economy. What will this low-carbon economy be like, and what does your business have to do to prosper in this new business environment? Larry Reynolds shows how successful organisations are already learning to be more energy efficient, manage their carbon footprint, adapt to climate change and become truly sustainable. As well as explaining how to future-proof your organisation against possible threats, The Business Leader's Guide to the Low-carbon Economy, tells you how to make the most of the many opportunities that the low-carbon economy will bring, especially in growing profits from new products and services. It is your guide to creating an organisation that will thrive in the twenty-first century. While there are plenty of published books about 'going green', there are none which explain the low-carbon economy and how to thrive in it. This book will fill that important gap. Drawing on examples from across industries, including businesses such as Asda, BT, Cargill, Coca Cola, Co-operative Group, Eurostar, Marks and Spencer, Tesco, Tesla, Walker's Crisps, Walmart and ZipCar, Larry Reynolds shows how today's successful organisations are already benefiting from the coming low-carbon economy.

This book provides a holistic picture of the digital age as it emerges in the 2010s. On the background of business analysis concepts from firm to megatrends and all business sectors of the World, the digital age of information systems and digital drivers are thoroughly laid out.

Main author Ravi S. Iyer created the [eklavyasai.blogspot.com](http://eklavyasai.blogspot.com) blog and used it from September 2011 to play a part-time, peaceful and amicable, Indian Computer Science (CS) and Information Technology (IT) academic reform, Internet-based activist role. His focus was on improving the practice of software development in Indian CS & IT academia. But he thought that it is such a vital part of the CS & IT field and that it is so poor in many parts of Indian CS & IT academia, that he referred to his efforts as Indian CS & IT academic reform activism. Other contributors to the blog have given their views on certain topics. Main work period has been from 2011 to 2014 with a little work later, off & on. The main author is no longer active in this area. This book is aimed at helping other activists involved in improving the practice of software development in Indian CS and IT academia to get the views of the blog in a convenient form. The book may also be of interest to similar activists in other countries. About the author: Main author Ravi S. Iyer is a Physics graduate from Ruia college, University of Bombay (Mumbai) who was industry trained and later self-taught in software development. He

worked in the international software industry (US, Europe, Japan, South Korea, India etc.) developing systems as well as applications software (CS & IT) for over 18 years after which he retired from commercial work. Later, mainly as a "visiting faculty", he offered free service of teaching programming courses (lab. courses) and being a "technical consultant" for student projects in a Maths & Computer Science department of a deemed university in India for 9 years.

Estás a punto de volverte obsoleto. Piensas que eres especial, único y que cualquier cosa que sea que hagas es imposible de reemplazar. Te equivocas. Mientras conversamos, millones de algoritmos creados por científicos informáticos están corriendo frenéticamente en servidores de todo el mundo, con un solo propósito: hacer cualquier cosa que hagan los humanos, pero mejor. Estos algoritmos son programas de computación inteligentes que impregnan el sustrato de nuestra sociedad. Toman decisiones financieras, predicen el clima, sugieren que países están a punto de declarar una guerra. Pronto, nos quedará muy poco por hacer: las máquinas tomarán el control. ¿Suena esto como una

fantasía futurista? Tal vez. Este argumento ha sido propuesto por un comunidad cada vez más grande, pero marginal, de pensadores, científicos y académicos, quienes ven al avance de la tecnología como una fuerza disruptiva que muy pronto transformará nuestro sistema socio-económico entero, para siempre.

Hospitality industry is growing at a rapid pace. The improving cross-country relations have resulted into boom in the Travel and Tourism Industry and its services. It also talks about tourism's role in revenue generation, and trade forming an integral part of the tourism industry. The book discusses the topics like sustainable tourism and contemporary trends being followed in tourism, hotel and aviation industry today. Designed as a text for the students of hospitality management, the book is equally beneficial for the students pursuing a diploma level course in travel and tourism management. Besides, the book is equally useful for the professionals working in the hospitality industry. What Reviewer says... This book appears to be quite exhaustive and aims to cover all aspects of tourism and travel management. The chapterization of the book is planned in a very scientific manner, i.e. moving from simple or early to complex or advance stages of study in the subject. The text also serve as a learning material for the students enrolled for distance education in Tourism and Travel Management. This text, to a larger extent, covers all the functional area of Tourism, Travel, Hospitality and Aviation Management. Text is designed in such a manner that it not only brings out the challenges but also indicates employment opportunities for trained manpower in this sector. The statistical data and references are up-to-date which will serve as a useful source of information for target audience for this text from all spheres of this business activity. The text also highlights the details of new and emerging trends and study areas of Travel and Tourism like Sustainable Tourism, Community-based Tourism, and so on. The author has completely incorporated the proposed changes to make the text appealing for different segments of academia. —Prof. (Dr.) M. Excerpt: Zipcar is an American membership-based carsharing company providing automobile reservations to its members, billable by the hour or day. Zipcar was founded in 2000 by Cambridge, Massachusetts residents Antje Danielson

and Robin Chase, and is now led by Scott Griffith, Chairman and Chief Executive Officer. As of November 2012, the company has 767,000 members and offers 11,000 vehicles throughout the United States, Canada, the United Kingdom, Spain and Austria, making Zipcar the world's leading carsharing network. Members can reserve Zipcars online or by phone at anytime, immediately or up to a year in advance. Zipcar members have automated access to Zipcars using an access card which works with the car's technology to unlock the door, where the keys are already located inside. Zipcar also offers an iPhone or Android application, that allows members to honk the horn to locate a Zipcar and unlock the doors. Zipcar charges a one-time application fee, an annual fee, and a reservation charge. Gas, parking, insurance, and maintenance are included in the price. Recent years have seen the creation of many Zipcar competitors. Traditional car...

Like many Americans, Ricky Vogt was searching for a career and purpose during the fallout from America's 2008 economic implosion. At the same time the nation was searching to resolve energy, environmental, and economic problems within a dysfunctional political system. This story explains how Vogt joined his fellow Americans as they fought amongst themselves in search of a better vision. He questions how community resolves the tension between intolerance and personal liberty; between the selfishness of trickle-down economics and the ideals of spirituality and our founding documents promoting the common good. The book depicts Vogt's evolving search for better solutions and a new way forward.
