

Case Files Psychiatry Fourth Edition

The closest a student can get to the wards without seeing patients! Designed to teach through clinical cases, this text offers 60 of the most common clinical problems in psychiatry along with case discussion questions, clinical pearls, key terms and concepts, and USMLE-style questions and answers to reinforce learning. This is an excellent study guide for the psychiatry shelf exam and the USMLE Step 2. Issues in Clinical Psychology, Psychiatry, and Counseling: 2013 Edition is a ScholarlyEditions™ book that delivers timely, authoritative, and comprehensive information about Group Psychotherapy. The editors have built Issues in Clinical Psychology, Psychiatry, and Counseling: 2013 Edition on the vast information databases of ScholarlyNews.™ You can expect the information about Group Psychotherapy in this book to be deeper than what you can access anywhere else, as well as consistently reliable, authoritative, informed, and relevant. The content of Issues in Clinical Psychology, Psychiatry, and Counseling: 2013 Edition has been produced by the world's leading scientists, engineers, analysts, research institutions, and companies. All of the content is from peer-reviewed sources, and all of it is written, assembled, and edited by the editors at ScholarlyEditions™ and available exclusively from us. You now have a source you can cite with authority, confidence, and credibility. More information is available at <http://www.ScholarlyEditions.com/>.

Written by noted authorities in geriatric psychiatry, this volume is a clinically oriented guide to the diagnostic workup and treatment of psychiatric and neuropsychiatric disorders in elderly patients. The book describes in detail the neurologic and neuropsychiatric patient assessment and the use of all treatment modalities, both psychotherapeutic and pharmacologic, in elderly patients. Chapters discuss the treatment of disorders in all clinical settings—inpatient, outpatient, emergency, primary care, assisted living, and long-term care. Algorithms for workup and treatment are included, as well as case studies and personal accounts by patients and care providers. Appendices provide drug information and additional resources.

Offers information on the duties, salary ranges, educational requirements, job availability, and advancement opportunities for a variety of technical professions.

Acclaimed for its clear writing and stellar contributors, this authoritative text is now in a revised and updated fourth edition. The book explains the history, assessment approach, techniques, and research base of each of the 12 most important psychotherapies practiced today, along with its foundational ideas about personality and psychological health and dysfunction. The consistent chapter format facilitates comparison among the various approaches. Every chapter includes engaging clinical vignettes and an extended case example that bring key concepts to life, as well as suggested resources for further learning. New to This Edition *Incorporates important developments in clinical practice and research. *Entirely new chapters on CBT, third-wave CBT, couple therapies, and interpersonal and brief psychodynamic therapies; all other chapters fully updated. *Increased attention to multiple dimensions of diversity, the evidence-based practice movement, psychotherapy integration, and applications to physical health care.

"Subject Areas/Keywords: direct practice, family, families, childhood problems, at-risk, adolescents, adolescence, assessments, interventions, psychotherapy, counseling, child abuse, maltreatment, child welfare, neglect, trauma, parents, play therapy, schools, substance abuse, poverty, child development, social workers, textbooks, texts, kids, social work courses, MSW, masters classes, masters students, social work school, LCSW, child protective services, therapists, counselors, practitioners, helping professionals, mental health, transgender, ADHD, emotional and behavioral problems, violence, homelessness, PTSD, parental drug use, domestic violence, community violence, abused children, poor families, dysfunctional, bullying, loss, divorced, immigrants DESCRIPTION A leading course text and practitioner resource for over 20 years--now revised and updated--this book presents developmentally and culturally informed methods for helping children in family, school, and community settings. Nancy Boyd Webb offers vital guidance and tools for practitioners. The text demonstrates research-based strategies for working with victims of maltreatment and trauma as well as children affected by poverty, parental substance abuse, bullying, and other adversities. Vivid case examples illustrate the "whys" and "how-tos" of play and family therapy, group work, and school-based interventions. Student-friendly features include thought-provoking discussion questions and role-play exercises. Reproducible assessment forms can be downloaded and printed in a convenient 8 1/2" x 11" size"--

Tens of thousands of readers have relied on this leading text and practitioner reference--now revised and updated--to understand the issues the legal system most commonly asks mental health professionals to address. Highly readable, the volume demystifies the forensic psychological assessment process and provides guidelines for participating effectively and ethically in legal proceedings. Presented are clinical and legal concepts and evidence-based assessment procedures pertaining to criminal and civil competencies, the insanity defense and related doctrines, sentencing, civil commitment, personal injury claims, antidiscrimination laws, child custody, juvenile justice, and other justice-related areas. Case examples, exercises, and a glossary facilitate learning; 19 sample reports illustrate how to conduct and write up thorough, legally admissible evaluations. New to This Edition *Extensively revised to reflect important legal, empirical, and clinical developments. *Increased attention to medical and neuroscientific research. *New protocols relevant to competence, risk assessment, child custody, and mental injury evaluations. *Updates on insanity, sentencing, civil commitment, the Americans with Disabilities Act, Social Security, juvenile and family law, and the admissibility of expert testimony. *Material on immigration law (including a sample report) and international law. *New and revised sample reports.

"This book aims to provide professionals and clinicians-in-training with the latest forms of treatment for children and adolescents who have been impacted by crises and trauma. The various treatment options presented here include approaches that focus on the individual as well as many that include a parent in conjoint or filial therapy, and others that employ a family treatment model. Many chapters in this book demonstrate the use of a variety of creative methods with young people who have suffered traumatic experiences such as sexual abuse, bullying, immigration, natural disasters, and witnessing violence"--
Real life cases for the psychiatry clerkship and shelf-exam 4 STAR DOODY'S REVIEW! "During medical school, I used similar case review books for various clerkships, including psychiatry. This one stands out because the cases are representative of psychiatry, the explanations are complete yet concise, and the text uses bolded words, tables, and definitions of key terms to help readers understand the essential concepts rather than simply memorizing more data that is likely to be forgotten. The questions are very representative of the type of questions on the shelf-exams and USMLE Step 2, with appropriate descriptions of the correct answers. The first two sections are ideal for students just beginning their clerkship, as they set the groundwork for the basis of psychiatry."--Doody's Review Service You need exposure to high-yield cases to excel on the psychiatry clerkship and the shelf-exam. Case Files: Psychiatry presents 60 real-life cases that illustrate essential concepts in psychiatry. Each case includes a complete discussion, clinical pearls, references, definitions of key terms, and USMLE-style review questions. With this system, you'll learn in the context of real patients, rather than merely memorize facts. 60 high-yield psychiatry cases, each with USMLE-style questions Clinical pearls highlight key concepts Primer on how to approach clinical problems and think like a doctor Proven learning system maximizes your shelf-exam scores

Using cases from the authors' files or from case files of other working clinicians, CASEBOOK IN ABNORMAL PSYCHOLOGY portrays the rich and arresting nature of disorders manifested in real people. Cases illustrate every major DSM-IV category, followed by a therapy outcome section that tells the rest of the story of what happened to these clients. Using an integrative approach, the authors emphasize the multiple causes of disorders and incorporate developmental and cultural issues in each case. Complex cases are presented without a diagnosis, so students can come up with a diagnosis on their own. This Fourth Edition includes a new case on body dysmorphic disorder as well as two new cases without a diagnosis. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

This fourth edition continues to provide a link between occupational health and clinical practice. It covers target organ systems that can be affected by hazardous exposures in workplaces, and it focuses on the clinical presentations, investigations and management of affected individuals. We have retained consideration of some special issues relevant to occupational medicine practice in this new edition. The main emphasis continues to be prevention of disease and early detection of health effects. This edition of the book has been updated to include new materials, topics, and references. We have retained a few of the previous case studies and illustrations, and introduced several new ones. There are new chapters on audit and evidence-based practice and on occupational cancer. We trust that this edition addresses many of the recommendations that were provided by readers of the previous edition. We have again asked international experts to author many of the chapters. Some of the authors are from Asia, and others from the US, UK, the Middle East and Australia. All the authors will have either clinical or academic experience in occupational medicine practice. The book will be of interest to medical practitioners, especially those in primary care and doctors intending to pursue a career in occupational medicine. It would also be relevant for non-medical health and safety professionals wanting to know more about health effects resulting from occupational exposures. Other groups who may find this edition useful as a ready reference are medical students, occupational health nurses, or clinical specialists in fields such as dermatology, respiratory medicine or toxicology. The book is targeted at all those who are interested in the interaction between work and health, and how occupational diseases and work-related disorders may present. Contents: Clinical Occupational Medicine: Work and Health (David Koh and Aw Tar Ching) Diagnosis and Management of Occupational Diseases (Aw Tar Ching, David Koh and John P Thompson) Respiratory Disorders (David Fishwick and Chris Barber) Skin Disorders (David Koh and Goh Chee Leok) Mental Health Disorders (Ken Addley and Robert Kerr) Musculoskeletal Disorders (Keith Palmer, Jane Frølund Thomsen and Sigurd Mikkelsen) Auditory Disorders (Ailin Razali and Krishna Gopal Rampal) Hematological Disorders (Ng Wee Tong and Mark Newson-Smith) Neurological Disorders (Ian Brown and Arjune Sen) Occupational Infections (Rayhan Hashmey and Aw Tar Ching) Renal Disorders (Huw Rees, Doris T Chan and Steve Riley) Cardiovascular Disorders (Mikhail S Dzeshka, Eduard Shantsila and Gregory Y H Lip) Hepatobiliary and Gastrointestinal Disorders (Ian Brown and Jane Collier) Eye Injuries and Other Disorders (Laurence Lim Shen and Wong Tien Yin) Metabolic Disorders (Tng Eng Loon and Lee See Muah) Reproductive Disorders (Lim John Wah and David Koh) Occupational Cancers (Lin Fritschi and Alison Reid) Special Issues in Occupational Medicine: Ethics in Occupational Medicine (David Koh and Lee See Muah) Occupational Medicine Practice and the Law (Lee See Muah and David Koh) Audit and Evidence-Based Occupational Medicine Practice (Yue-liang Leon Guo) Health Screening and Periodic Medical Examinations (Aw Tar Ching and David Koh) Aviation Medicine (Brian See and Gan Wee Hoe) Diving Medicine (Gregory Chan Chung Tsing) Remote Health Care (John Nelson Norman) Medical Disasters Planning and Response (Halim Mohamed and Abu Hasan Samad) Communication in Occupational Medicine (Max Lum) Cultural Aspects of Occupational Medicine Practice (Adul Bandhukul) Workers' Compensation Schemes (Paul Cullinan) Rehabilitation and Return to Work (Nerys Williams) Prevention of Occupational Diseases (David Koh and Aw Tar Ching) Readership: Serves as a useful guide for all those who are interested in occupational medical practice. These include medical students at various levels, occupational health nurses, general practitioners, researchers or colleagues and professionals in occupational and public health and safety — in other words, for all who have committed themselves to do the best practice for the health of working people.

This textbook presents real-world cases and discussions that introduce the various mental health syndromes found in the aging population before delving into the core concepts covered by geriatric psychiatry curricula. The text follows each case study with the vital information necessary for physicians in training, including key features of each disorder and its presentation, practical guidelines for diagnosis and treatment, clinical pearls, and other devices that are essential to students of geriatric psychiatry. With the latest DSM-5 guidelines and with rich learning tools that include key points, review questions, tables, and illustrations, this text is the only resource that is specifically designed to train both American and Canadian candidates for specialty and subspecialty certification or recertification in geriatric psychiatry. It will also appeal to audiences worldwide as a state-of-the-art resource for credentialing and/or practice guidance. The text meets the needs of the future head on with its straightforward coverage of the most frequently encountered challenges, including neuropsychiatric syndromes, psychopharmacology, eldercare and the law, substance misuse, mental health following a physical condition, medical psychiatry, and palliative care. Written by experts in the field, Geriatric Psychiatry: A Case-Based Textbook is the ultimate resource for graduate and undergraduate medical students and certificate candidates providing mental health care for aging adults, including psychiatrists, psychologists, geriatricians, primary care and family practice doctors, neurologists, social workers, nurses, and others.

Part of the authoritative Oxford Textbooks in Psychiatry series, Oxford Textbook of Old Age Psychiatry, Third Edition has been thoroughly updated to reflect the developments in old age psychiatry since publication of the Second Edition in 2013, and remains an essential reference for anyone interested in the mental health care of older people.

Case Files Psychiatry, Fourth Edition course load ebook for Case Files Psychiatry 4/EMcGraw Hill Professional

Written for case managers working in health and human services, this practical guide addresses the need for more progressive and compassionate ways of working with others. Introducing innovative strategies for working with people that challenge the status quo, the book reconsiders old forms of social casework in favour of empowerment approaches that incorporate individual systemic advocacy. Patricia Spindel covers the history of case management, traditional approaches and their critiques, barriers to an empowerment approach, the ethical issues of labelling, stereotyping, stigmatization and pathologizing, and key empowerment philosophies and the research that supports them. This guide provides concrete methods that will help readers put principles of empowerment philosophy into practice. With practical case studies and questions for reflection featured throughout the chapters, it is well suited for human services, social services, and social work programs in colleges and universities in Canada. FEATURES: - Offers a practical "how to" for developing an empowerment plan and deals with common issues in practice, such as projection, countertransference, and transference - Includes core concepts of empowerment and methodology for building individual and community capacity and competence - Provides students with case studies from the field and questions to encourage reflection

The definitive reference in the field--now significantly revised with 75% new material--this volume examines typical and atypical development from birth to the preschool years and identifies what works in helping children and families at risk. Foremost experts explore neurobiological, family, and sociocultural factors in infant mental health, with a major focus on primary caregiving relationships. Risk factors for developmental problems are analyzed, and current information on disorders and disabilities of early childhood is presented. The volume showcases evidence-based approaches to assessment and intervention and describes applications in mental health, primary care, child care, and child welfare settings. New to This Edition: *Chapters on genetic and epigenetic processes, executive functions, historical trauma, and neglect. *Chapters on additional clinical problems: hyperactivity and inattention, sensory overresponsivity, and relationship-specific disorder. *Chapters on additional interventions: attachment and biobehavioral catch-up, video-feedback intervention to promote positive parenting and sensitive discipline, parent-child interaction therapy, and home visiting programs. *Existing chapters all rewritten or revised to reflect a decade's worth of empirical and clinical advances.

Provides a review of diseases of the small intestine in children, with an emphasis upon a discussion of their causes, clinical manifestations and the newer techniques which are used in diagnosis as well as modern methods of management. The book will be of value to the consultant paediatrician and paediatric surgeon as well as to the paediatric registrar and house officer as a practical guide to their understanding of these diseases. It is also intended for adult physicians, gastroenterologists and surgeons who wish to survey the clinical spectrum of disease of the small intestine in childhood.

This state-of-the-science reference and text has given thousands of practitioners and students a strong foundation in understanding and treating addictive disorders. Leading experts address the neurobiology of addictions and review best practices in assessment and diagnosis. Specific substances of abuse are examined in detail, with attention to real-world clinical considerations. Issues in working with particular populations--including polysubstance abusers, culturally diverse patients, older adults, chronic pain sufferers, and others--are explored. Chapters summarize the theoretical and empirical underpinnings of widely used psychosocial and pharmacological treatments and clearly describe clinical techniques. New to This Edition *Incorporates a decade's worth of major advances in research and clinical practice. *Updated for DSM-5. *Many new authors; extensively revised with the latest information on specific biological mechanisms, substances, populations, and treatments. *Chapter on motivational interviewing.

Preceded by American Psychiatric Publishing textbook of psychiatry / edited by Robert E. Hales, Stuart C. Yudofsky, Laura Weiss Roberts. Sixth edition. 2014.

This book provides the readers with a series of complex cases that are organized by psychiatric disorder. Written by experts in the field, the cases offer insight on how to navigate care in delicate situations while considering preexisting medical conditions. Topics cover pharmacological concerns in women who are pregnant or nursing, working with dementia patients suffering from HIV, assessing and treating ADHD in special populations, monitoring medication use in patient recovering from Substance Use Disorder, and working with patients suffering from personality disorders. Each chapter offers guidance through the maze of classifications, clinical features, diagnosis and various complex interventions. The book also covers new information on the advances in research and management aspects. Complex Clinical Conundrums in Psychiatry is a valuable resource for psychiatrists, psychologists, family physicians, geriatricians, counselors, social workers, nurses, and all medical professionals working with complex psychiatric patients.

"This book describes child development and how it can be applied to practice with children. Developmental knowledge provides a framework for understanding children in relation to the tasks and issues relevant to their age. These, in turn, are determined by physical, social, emotional, and neurodevelopmental norms that transform in meaningful ways from birth through adolescence. Only with a sound grounding in this knowledge can we determine whether a child's emotions, thoughts, or behaviors fall within normal expectations. Part I, "Contexts of Development: A Transactional Approach," introduces the idea that the child's development is the outcome of the interplay of normative developmental maturation and the context within which it occurs. Part II, "The Course of Child Development," represents the core of the book, looking at childhood through the lens of discrete expected stages"--

Now revised and expanded with over 50% new material, this definitive clinical reference is the text of choice for graduate-level courses in evidence-based psychotherapy. Foremost authorities describe the conceptual and scientific foundations of cognitive-behavioral therapy (CBT) and provide a framework for assessment and case formulation. Major approaches are reviewed in detail, including emotion-centered problem-solving therapy, rational emotive behavior therapy, cognitive therapy, schema therapy, mindfulness- and acceptance-based interventions, and dialectical behavior therapy (DBT). Applications to specific populations are discussed, including children and adolescents, couples, culturally diverse clients, and more. New to This Edition *Chapter on clinical assessment. *Chapter on DBT. *Chapters on transdiagnostic treatments, CBT-based prevention models, and improving dissemination and implementation. *Existing

chapters extensively revised or rewritten to reflect important research and clinical advances.

The Cultural Formulation Interview (CFI) is a product of the arduous process that resulted in publication of the DSM-5, and only one book—DSM-5 Handbook of the Cultural Formulation Interview—provides clinicians with the background and guidance they need to implement the CFI. The Handbook teaches the reader how to conduct a cultural assessment using the CFI, which consists of three types of semistructured interviews. Although the CFI was not designed to be the sole basis for making a clinical diagnosis, it can be used in research and clinical settings to enhance clinical understanding and decision making. The volume presents techniques to help providers situate their work within the context of a patient's culture to enhance communication—not only with those of different cultures but across all clinical encounters. Especially instructive are the supplemental videos that demonstrate application of the CFI components through the use of clinical vignettes. Clinicians will, of course, find the DSM-5® Handbook of the Cultural Formulation Interview indispensable, but administrators, policy makers, advocates, and other practitioners who work collaboratively to engage patients in the mental health care process will also value its clarity and comprehensiveness.

No skeletons were rattling in "his" closet, Thomas Eagleton assured George McGovern's political director. But only eighteen days later--after a series of damaging public revelations and feverish behind-the-scenes maneuverings--McGovern rescinded his endorsement of his Democratic vice-presidential running mate, and Eagleton withdrew from the ticket. This fascinating book is the first to uncover the full story behind Eagleton's rise and precipitous fall as a national candidate. Within days of Eagleton's nomination, a pair of anonymous phone calls brought to light his history of hospitalizations for "nervous exhaustion and depression" and past treatment with electroshock therapy. The revelation rattled the campaign and placed McGovern's organization under intense public and media scrutiny. Joshua Glasser investigates a campaign in disarray and explores the perspectives of the campaign's key players, how decisions were made and who made them, how cultural attitudes toward mental illness informed the crisis, and how Eagleton's and McGovern's personal ambitions shaped the course of events. Drawing on personal interviews with McGovern, campaign manager Gary Hart, political director Frank Mankiewicz, and dozens of other participants inside and outside the McGovern and Eagleton camps--as well as extensive unpublished campaign records--Glasser captures the political and human drama of Eagleton's brief candidacy. Glasser also offers sharp insights into the America of 1972--mired in war, anxious about the economy, ambivalent about civil rights.

Rich, original, and transformative, the latest edition of A New Psychology of Women examines how gender-related expectations interact with other cultural assumptions and stereotypes, and with social and economic conditions, to affect women's experiences and behavior. Absorbing narratives centered on essential topics in psychology and global research engage readers to grasp cutting-edge insights into the psychological diversity of women. Aware that our own cultural experience colors and limits what we think we know about people, veteran educator and scholar Hilary Lips imbues her discussions with international examples and perspectives to provide an inclusive approach to the psychology of women. A wide range of new and extensively updated topics optimize readers' knowledge of how disparate perspectives from cultures throughout the world shape women's behavior and attitudes toward: health care / violence against women / poverty / labor force participation / occupational segregation / unpaid work / stereotyping and discrimination / expectations about power within marriage / female genital mutilation / theories of gender development / women's attitudes toward their bodies / use of social media / media portrayals of girls and women / women in political leadership roles Among thoroughly updated topics particular to US culture are same-sex marriage, Latina women's issues, the portrayal of women of different ethnic and cultural groups on television, and breast cancer survival rates of African American and European American women. Boxed items containing learning activities, profiles of women who helped shape psychology, and suggestions for making social changes appear throughout the text. Each chapter concludes with discussion questions, key terms, suggestions for additional reading, and Web resources.

Now updated to keep professionals current with the latest research and trends in the field, this edition covers both basic science and clinical practice, and draws on the talents of 53 new contributors to guarantee fresh, authoritative perspectives on advances in psychiatric drug therapy.

Winner of the BMA 2011 book awards: psychiatry category Winner of the Australian Journal of Ageing book of the year award This definitive work on dementia and related disorders has been fully updated and revised to reflect recent advances in this fast-moving field. The incidence of dementia continues to rise as the population of the world ages, and the condition represents one of the most significant challenges facing societies and health professionals in the next half-century. In this, the most comprehensive single volume work available on the subject, the editors have met this challenge by assembling a team of the world's leading experts on all aspects of the condition, from history, epidemiology and social aspects to the latest neurobiological research and advanced therapeutic strategies.

"This represents the first textbook explicitly to join interpretation of the ICF with that of DSM-IV-TR in clinical cases. In fact, Professor Peterson's book reads as though it were a helpful crosswalk between the Classification and the DSM, which is innovative."--ICF Newsletter "Peterson is the most qualified individual in the field of rehabilitation counseling and rehabilitation psychology to write this text...He thoroughly understands the ICF as a model with great utility for the field of rehabilitation counseling." --David A. Rosenthal, PhD, CRC Chairperson, Department of Rehabilitation Psychology and Special Education University of Wisconsin-Madison "This proposed text has significance for assisting in the needed universal conceptual framework for improving public policy and service delivery systems for individuals with mental health-related issues." --Susanne Bruyere, PhD Cornell University This textbook focuses on psychopathology as classified in the DSM-IV-TR, and discusses how it can be integrated into the ICF to assist mental health professionals while diagnosing and treating people with mental disorders. A perfect reference for students, the book serves as a natural bridge between the DSM-IV-TR and the ICF. Students will learn the utility of using the ICF's biopsychosocial approach

for conceptualizing mental health functioning (body functions and structures), disability (activity limitations and participation restrictions), and contextual factors (environmental and personal factors). The ICF's collaborative approach presents students with a conceptual framework that guides the selection of appropriate interventions and informs the evaluation of treatment efficacy. Key Features: Develops knowledge and understanding of mental health functioning and disability based on the ICF and related diagnoses within the DSM-IV-TR Applies the ICF conceptual framework to planning mental health assessment and related interventions, and evaluating treatment outcomes Integrates diagnostic information from the DSM-IV-TR with the ICF's classification of functioning, disability, and health

Sixty high-yield family medicine cases help you sharpen your diagnostic and problem-solving skills You need exposure to high-yield cases to excel on the family medicine clerkship and the shelf-exam. Case Files: Family Medicine presents sixty real-life cases that illustrate essential concepts. Each case includes complete discussion, clinical pearls, references, definitions of key terms, and USMLE-style review questions with detailed explanations of the correct answers. With this system, you'll learn in the context of real patients, rather than merely memorize facts.

Juvenile justice centers have a long tradition as an unfortunate stop for young offenders who need mental health care. Reports estimate that as many as 70% of the youth in detention centers meet criteria for mental health disorders. As juvenile justice systems once again turn their focus from confinement to rehabilitation, mental health providers have major opportunities to inform and improve both practice and policy. The Handbook of Juvenile Forensic Psychology and Psychiatry explores these opportunities by emphasizing a developmental perspective, multifaceted assessment, and evidence-based practice in working with juvenile offenders. This comprehensive volume provides insights at virtually every intersection of mental health practice and juvenile justice, covering areas as wide-ranging as special populations, sentencing issues, educational and pharmacological interventions, family involvement, ethical issues, staff training concerns, and emerging challenges. Together, its chapters contain guidelines not only for changing the culture of detention but also preventing detention facilities from being the venue of choice in placing troubled youth. Key issues addressed in the Handbook include: Developmental risks for delinquency. Race and sex disparities in juvenile justice processing. Establishing standards of practice in juvenile forensic mental health assessment. Serving dually diagnosed youth in the juvenile justice system. PTSD among court-involved youth. Female juvenile offenders. Juvenile sex offenders. The Handbook of Juvenile Forensic Psychology and Psychiatry is an essential reference for researchers, professors, allied clinicians and professionals, and policy makers across multiple fields, including child and school psychology, child and adolescent psychiatry, developmental psychology, criminology, juvenile justice, forensic psychology, neuropsychology, social work, and education.

Four sections address topics such as the history of the TGNC experience, mental health factors particular to the TGNC community, physical health -- including hormones -- of TGNC individuals, gender-affirming surgical procedures, and nonsurgical interventions. Summarizing key points and review questions are included at the end of each chapter.

Covering a range of fundamental topics essential to modern forensic investigation, the fourth edition of the landmark text Forensic Science: An Introduction to Scientific and Investigative Techniques presents contributions from experts in the field who discuss case studies from their own personal files. This edition has been thoroughly updated to r

Sixty high-yield psychiatry cases help you sharpen your diagnostic and problem-solving skills You need exposure to high-yield cases to excel on the psychiatry clerkship and the shelf-exam. Case Files: Psychiatry presents sixty real-life cases that illustrate essential concepts. Each case includes complete discussion, clinical pearls, references, definitions of key terms, and USMLE-style review questions with detailed explanations of the correct answers. With this system, you'll learn in the context of real patients, rather than merely memorize facts.

Four years have passed since the last edition (3rd) of this book was published. In the intervening years, several reviews of this book have provided highly encouraging remarks about the value of this book in transmitting information on classification and treatment of psychiatric disorders to the audience. We are proposing to revise all chapters with an eye on accuracy and ease of use, and this is an especially timely endeavor with the upcoming publication of the Diagnostic and Statistical Manual V. All the appropriate new information on biology, etiology, diagnosis and treatment of psychiatric disorders will be added to the current proposed edition. It is our goal to recruit the same authors (if possible) who contributed to the previous edition. While all chapters will be updated (see TOC), those marked by asterisks will be the most likely to undergo more revision. Psychiatry has emerged as a burgeoning scientific field with major advances in etiology and treatment of several disorders. Just as there was excitement in the anatomic advances that took place a hundred years ago when Emil Kraepelin and his collaborators took on the enormous task of classification of psychiatric disorders based on rational scientific thinking, new advances in genetics, biochemistry, neuroanatomy and pharmacotherapy of mental disorders have brought us even closer to a better understanding of complex disorders like schizophrenia, bipolar disorder, depression and even autism. The major goal of the previous edition of this classic book was to update the busy clinician, psychiatric resident and medical student with the most up-to-date information on etiology, diagnosis and treatment of psychiatric disorders. This goal remains the focus of the fourth edition of this book. In this updated and expanded edition, the reader will be provided with the most contemporary information and literature supported by a close survey of the field. This new edition of this classic title, with its focus on biologic and medical aspects of psychiatry, will continue to be of significant help to all interested in the scientific practice of psychiatry.
