This collection addresses the central question of how the current international framework for the regulation of fisheries may be strengthened in order to meet the challenges posed by changing fisheries and ocean conditions, in particular climate change. International fisheries law has developed significantly since the 1990s, through the adoption and establishment of international instruments and bodies at the global and regional levels. Global fish stocks nevertheless remain in a troubling state, and fisheries management authorities face a wide array of internal and external challenges, including operational constraints, providing effective management advice in the face of scientific uncertainty and non-compliance by States with their international obligations. This book examines these challenges and identifies options and pathways to strengthen international fisheries law. While it has a primarily legal focus, it also features significant contributions from specialists drawn from other disciplines, notably fisheries science, economics, policy and international relations, in order to provide a fuller context to the legal, policy and management issues raised. Rigorous and

comprehensive in scope, this will be essential reading for lawyers and non-lawyers interested in international fisheries regulation in the context of profoundly changing ocean conditions.

Little gods, big personalities! The series follows little versions of the Greek gods who are at a camp to learn how to control their powers and use them properly--as well as learn to get along with one another. Zeus is living with his parents, Kronos and Rhea, and he's starting to show his abilities, but his lightning is out of control! Every time he sneezes or gets mad, or is even just plain bored, his lightning shoots out. He tries to keep it under wraps most of the time, but he can't help it, and it causes such a ruckus that his parents decide that it's time he learns to properly use his powers. So they send him to Eureka, a camp where little gods learn to use and control their supernatural abilities. He's excited to be able to learn to use his powers here, but he's also nervous about going and meeting all the other gods. Apollo and Ares in particular seem very strong (and they let him know it), but he finds friends in the calm and wise Athena and

Based on reporting that was a finalist for the Pulitzer Prize, *Thunder Run* chronicles one of the boldest gambles in modern military history: the surprise assault on Baghdad by the Spartan Brigade, the Second Brigade of the Third Infantry Division (Mechanized). Three battalions and fewer than a thousand men launched a violent thrust of tanks and Bradley Fighting Vehicles into the heart of a city of five million people—and in three days of bloody combat ended the Iraqi war. More than just a rendering of a single battle, *Thunder Run* candidly recounts how soldiers respond under fire and stress and how human frailties are magnified in a war zone. The product of over a hundred interviews with commanders and men from the Second Brigade, it is a riveting firsthand account of how a single armored brigade was able to capture an Arab capital defended by one of the world’s largest armies. “The best account of combat since *Black Hawk Down*.” —Men’s Journal
