Can Humans Prevail Underneath Earth's Crust? "It is always a foolish thing to contemplate suicide; for no matter how dark the future may appear today, tomorrow may hold for us that which will alter our whole life in an instant, revealing to us nothing but sunshine and happiness. So, for my part, I shall always wait for tomorrow." - Edgar Rice Burroughs, Pellucidar David Innes left some matters unsolved after his first adventure in Pellucidar – the fantastic world underneath Earth's crust – and now he is ready to face them and set things right. So he returns to Pellucidar, tries to map the new world and save his lost companions in the process. Will the Mahar stop him? Will the Human Race from the interior be ever free? A stranger lures a child into his car with the promise of sweets. A young man spots his fiancée's double in a public park of ill repute. An executive visits the secluded home of a former employee whose intentions are frightfully unclear. A modest soul weds the woman he rescues from suicide—only to fall victim to an unfathomable form of possessiveness... In the eleven tales gathered in *The Fallen Curtain*, Ruth Rendell—the grande dame of the literary mystery—lays bare the twisted inner workings of the unbalanced mind. Here are eleven tales of haunting psychological accuracy: the gesture that betrays a parent's madness, the childhood memory clouded with denial, the utterance that introduces the threat of violence in a situation as benign as a dinner date. Instantly engaging, maddeningly addictive, *The Fallen Curtain* testifies to the enduring talents of a master of the genre. Since 1932 the University of Minnesota's General College has provided educational access and excellence for the most diverse group of students on the campus. To celebrate this work and explore the current programs and mission of the college, GC faculty, staff, and students bring forth their perspectives examining how the college successfully contributes to intellectual growth, enhances multiculturalism, and supports student development.

Possibly the most comprehensive overview of computer graphics as seen in the context of geometric modelling, this two volume work covers implementation and theory in a thorough and systematic fashion. *Computer Graphics and Geometric Modelling: Mathematics*, contains the mathematical background needed for the geometric modeling topics in computer graphics covered in the first volume. This volume begins with material from linear algebra and a discussion of the transformations in affine & projective geometry, followed by topics from advanced calculus & chapters on general topology, combinatorial topology, algebraic topology, differential topology, differential geometry, and finally algebraic geometry. Two important goals throughout were to explain the material thoroughly, and to make it self-contained. This volume by itself would make a good mathematics reference book, in particular for practitioners in the field of geometric modelling. Due to its broad coverage and emphasis on explanation it could be used as a text for introductory mathematics courses on some of the covered topics, such as topology (general, combinatorial, algebraic, and differential) and geometry (differential & algebraic).

This volume concerns several aspects of China's changing market based economy. These include commercial contract enforcement, corporate structures, competition law and other issues related to China's membership in the WTO. In the past two decades, the rapid integration of China's economy into the global marketplace has created obligations and expectations of non-discrimination and regulatory transparency in domestic markets. The Chinese government has responded by demanding better governance within major companies, market sectors and public administration generally. However, as the articles in this volume show, it has struggled to find a corporate structure capable of absorbing external equity investment and participation but still amenable to direct and indirect state guidance. It has also moved cautiously in creating legal controls over unfair competition. Moreover, the protection of state owned enterprises, which serve as vehicles for domestic economic, social and political policy, has been a recurring issue in China's WTO trade disputes.

Affective Health and Masculinities in South Africa explores how different masculinities modulate substance use, interpersonal violence, suicidality, and AIDS as well as recovery cross-culturally. With a focus on three male protagonists living in very distinct urban areas of Cape Town, this comparative ethnography shows that men's struggles to become invulnerable increase vulnerability. Through an analysis of masculinities as social assemblages, the study shows how affective health problems are tied to modern individualism rather than African 'tradition' that has become a cliché in Eurocentric gender studies. Affective health is conceptualized as a balancing act between autonomy and connectivity that after colonialism and apartheid has become compromised through the imperative of self-reliance. This book provides a rare perspective on young men's vulnerability in everyday life that may affect the reader and spark discussion about how masculinities in relationships shape physical and psychological health. Moreover, it shows how men change in the face of distress in ways that may look different than global health and gender-transformative approaches envision. Thick descriptions of actual events over the life course make the study accessible to both graduate and undergraduate students in the social sciences. Contributing to current debates on mental health and masculinity, this volume will be of interest to scholars from various disciplines including anthropology, gender studies, African studies, psychology, and global health.

Symposiacs By Plutarch Plutarch (Lucius Mestrius Plutarchus), was a Greek historian, biographer, and essayist, known primarily for his Parallel Lives and Moralia. He is considered today to be a Middle Platonist. He was born to a prominent family in Chaeronea, Boeotia, a town about twenty miles east of Delphi. Symposiacs is one of Plutarch's less known essays. Has it happens to many works of antiquity like this one, small pieces of the book are missing. Unfortunately because of that, some "questions" made in the Symposiacs are forever missing an answer. We are delighted to publish this classic book as part of our extensive Classic Library collection. Many of the books in our collection have been out of print for decades, and therefore have not been accessible to the general public. The aim of our publishing program is to facilitate rapid access to this vast reservoir of literature, and our view is that this is a significant literary work, which deserves to be brought back into print after many decades. The contents of the vast majority of titles in the Classic Library have been scanned from the original works. To ensure a high quality product, each title has been meticulously hand curated by our staff. Our philosophy has been guided by a desire to provide the reader with a book that is as close as possible to ownership of the original work. We hope that you will enjoy this wonderful classic work, and that for you it becomes an enriching experience.

Published in 1928 by Rupert Gould, the first of two books featuring strange facts about natural history, animals, and lore, Oddities: A Book of Unexplained Facts is filled with odd tales that will delight and baffle. Readers will get small history lessons embedded in wondrous and curious tales about Nostradamus, the Aurora Islands, and the planet Vulcan. Part of the Loren Coleman

Presents series from Cosimo Classics, as well as its sequel, Enigmas: Another Book of Unexplained Facts, Oddities will entertain readers of all types, but especially those interested in mythology, folktales, and cryptozoology. RUPERT T. GOULD (1890-1948) was a cryptozoology enthusiast, as evidenced by his books on the Loch Ness Monster and the Great Sea Serpent, as well as his books on unexplained facts. Though he was a career lieutenant commander in the British Royal Navy, Gould was best known for his contributions to marine horology. His work The Marine Chronometer was considered the authoritative text on marine timekeepers for more than 50 years. His other interests lay in science (he was a science educator on the BBC's children's hour; his lectures later became the book The Stargazer Talks), tennis (he umpired at Wimbledon), and radio. In 1947, Gould received a Gold Medal from The British Horological Institute in highest honor for his contributions to the field. He died in 1948 at 57 years of age.

From bestselling, Printz Award-winning author Libba Bray, the story of a plane of beauty pageant contestants that crashes on a desert island. Teen beauty queens. A "Lost"-like island. Mysteries and dangers. No access to email. And the spirit of fierce, feral competition that lives underground in girls, a savage brutality that can only be revealed by a journey into the heart of non-exfoliated darkness. Oh, the horror, the horror! Only funnier. With evening gowns. And a body count.

Maritime history is littered with maritime casualties involving the loss of vessels, cargo, crew and often passengers. Since the first edition was published over 8 years ago, many serious maritime disasters have occurred.

The volume seeks to establish socio-onomastics as a field of linguistic inquiry not only within sociolinguistics, but also, and in particular, within pragmatics. The linguistic study of names has a very long history, but also a history sometimes fraught with skepticism, and thus often neglected by linguists in other fields. The volume takes on the challenge of instituting onomastic study into linguistics and pragmatics by focusing on recent trends within socio-onomastics, interactional onomastics, contact onomastics, folk onomastics, and linguistic landscape studies. The volume is an introduction to these fields – with the introductory chapter giving an overview of, and an update on, recent onomastic study – and in addition offers detailed in-depth analyses of place names, person names, street names and commercial names from different perspectives: historically, as well as from the point of view of the impact of globalization and glocalization. All the chapters focus on the use and function of names and naming, on changes in name usage, and on the reasons for, processes in, and results of names in contact.
