Course * *Gives CCNA Security students a comprehensive, printed and bound lab resource containing all of the course's labs, for use whenever Internet access isn't available. *Handy printed format lets students easily highlight and make notes. *Page correlations link to the online curriculum. *Covers the latest CCNA Security Course, from threats to firewalls, cryptography to VPNs. The Cisco CCNA Security curriculum provides foundational network security knowledge, practical experience, opportunities for career exploration, and softskills development to help students prepare for careers with network security responsibilities. CCNA Security includes a comprehensive set of hands-on, online laboratories. To complement these, many students and instructors have requested a printed resource that can be used to study in places where Internet access may not be available. Cisco Exam 30 Lab Manual, 2/e, is that resource. Drawn directly from the online curriculum, it covers every lab presented in this course, addressing all major areas of network security. This lab manual gives students new flexibility to study these hands-on labs offline, highlight key points, and take handwritten notes. All topics are correlated directly to online web pages, helping students easily switch between offline and online content. Additional notes pages will be included between each lab for use as a notebook in class. A separate Answer Key is available in the Cisco Academy Connection area of Cisco's web site.

make notes Page correlations link to the online curriculum Covers the latest CCNA Security Course, from threats to firewalls, cryptography to VPNs The Cisco CCNA Security curriculum provides foundational network security knowledge, practical experience, opportunities for career exploration, and soft-skills development to help students prepare for careers with network security responsibilities. CCNA Security includes a comprehensive set of hands-on, online laboratories. To complement these, many students and instructors have requested a printed resource that can be used to study in places where Internet access may not be available. CCNA Security Lab Portfolio is that resource. Drawn directly from the online curriculum, it covers every lab presented in this course, addressing all these areas of network security: " Modern network security threats " Securing network devices " Authentication, authorization and accounting " Implementing firewall technologies " Implementing intrusion prevention " Securing LANs " Cryptography " Implementing VPNs " Putting it all together CCNA Security Lab Portfolio gives students new flexibility to study these hands-on labs offline, highlight key points, and take handwritten notes. All topics are correlated directly to online web pages, helping you easily switch between offline and online content. Additional notes pages will be included between each lab for use as a notebook in class. A separate Answer Key is available in the Cisco

La certificación CCNA Security (Cisco Certified Network Associate Security) valida los conocimientos y prácticas para asegurar las redes de Cisco. Con la certificación CCNA Security se obtienen las habilidades necesarias para desarrollar una infraestructura de seguridad, reconocer las amenazas y vulnerabilidades en las redes y mitigar las amenazas de seguridad. Siguiendo estos conceptos, esta guía de estudio fue diseñada para preparar el examen 640-554 IINS (Implementing Cisco IOS Network Security) para la obtención de la certificación CCNA Security. Este libro abarca temas como la instalación, la configuración, monitorización y mantenimiento de los dispositivos Cisco IOS Firewall y ASA (Adaptive Security Appliances) utilizando la interfaz de línea de comandos (CLI) y los administradores de dispositivos web como CCP (Cisco Configuration Professional) y ASDM (Adaptive Security Device Manager). El temario está basado en el blueprint de Cisco para este examen y cubre temas como:

- o Configurar la conversión de direcciones de red, listas de acceso, la inspección dinámica del tráfico y el filtrado de aplicaciones.
- o Implementar la detección de intrusiones basándose en la firma.
- o Configurar la administración de la identidad utilizando AAA.
- o Configurar redes privadas virtuales mediante IPsec para la conectividad sitio a sitio y de acceso remoto.
