Pharmacotherapy Principles & Practice pares back the exhaustive coverage of Pharmacotherapy: A Pathophysiologic Approach, 7/e by over 1,000 pages to topics and a depth of coverage the editors have identified as essential to pharmacy practice. Collectively, this textbook represents the work of over 160 authors and 145 reviewers. The Report on Carcinogens (RoC) is a congressionally mandated, science-based, public health document that identifies and discusses agents, substances, mixtures, or exposure circumstances (hereinafter referred to as "substances") that may pose a hazard to human health by virtue of their carcinogenicity. For each listed substance, the report contains a substance profile which provides information on (1) the listing status, (2) cancer studies in humans and animals, (3) studies of genotoxicity (ability to damage genes) and biologic mechanisms, (4) the potential for human exposure to these substances, and (5) Federal regulations to limit exposures. Eight substances have been added to this 12th ed. of the report, which now includes 240 listings. The industrial chemical formaldehyde and a botanical known as aristolochic acids are listed as known human carcinogens. Six other substances captafol, cobalt-tungsten carbide (in powder or hard metal form), certain inhalable glass wool fibers, o-nitrotoluene, riddelliine, and styrene are added as substances that are reasonably anticipated to be human carcinogens. Women's health is threatened by gender bias on three fronts: bias against women patients, bias against women doctors, health practitioners, and medical scientists, and bias against women as medical research subjects. *Outrageous Practices*, a highly acclaimed best-seller newly available in paperback, chronicles the history of a prejudiced health care establishment and shows how the current system remains captive to male-dominated medicine and research. The book examines how gender discrimination manifests itself in hospitals, physicians's and psychiatrists's offices, medical schools, research labs, government health-related agencies, and biomedical and pharmaceutical industries. KEY POINTS: o New paperback edition of a powerful book about gender bias in the medical establishment. o New preface by authors brings the issues up-to-date.

You Don't Have to Enlist in the Mommy Wars Motherhood is filled with uncertainty and soul-breaking questions. And there is not one "right" answer despite what the mommy wars tell your heart. You need a coach, someone to come alongside you. Barbara Rainey, cofounder of FamilyLife, says, "Dannah helps you find your own soul-healing answers" to some of the toughest questions out there. Is my child ready to make a decision to follow Christ? In her warm and personal writing style, Dannah Gresh offers biblically based wisdom and encouragement, walking with you as you think through 20 of the most difficult questions confronting moms. Discover how to replace your anxiety and frustration with calm assurance that when you pour out your soul to God, He will show you the right path for you and your children.

New Scientist magazine was launched in 1956 "for all those men and women who are interested in scientific discovery, and in its industrial, commercial and social consequences". The brand's mission is no different today - for its consumers, New Scientist reports, explores and interprets the results of human endeavour set in the context of society and culture. Among women's health concerns, reproductive issues, both prenatal and postpartum, hold particular prominence. Yet despite the many programs dedicated to improving women's reproductive health, maternal and infant morbidity and mortality rates in minority communities remain unchanged—or have increased. Confronting this alarming statistic head-on, *Reducing Racial/Ethnic Disparities in Reproductive and Perinatal Outcomes* is the first book systematically examining public health interventions designed toward meeting this important and elusive goal. Its contributors offer the best thinking and practice on this complicated topic, clarifying the relationship between evidence-based medicine and evidence-based public health and its potential for increasing parity, considering interventions in the multiple contexts of women's lives, reviewing the evidence base for each program or initiative featured, and describing methodologies for evaluating interventions. The resulting volume advocates for an integrative lifespan approach, including topics related to: Family planning STI and HIV/AIDS screening and treatment Smoking cessation and reducing exposure to environmental smoke Preconceptional well-woman care Depression screening and treatment Labor/delivery approaches and intrapartum care Emerging prenatal care interventions, from centering pregnancy to doula support For professionals and graduate students in psychiatry, psychology, sociology, women's health, and public health, *Reducing Racial/Ethnic Disparities in Reproductive and Perinatal Outcomes* reframes a set of ongoing issues and guides the reader toward state-of-the-art solutions.
