In *Having Visions*, the author presents an objective, respectful, and faithful translation of its content, accompanied with an historical and scientific context for understanding its insertion into the body of human affairs. In *The Book of Mormon*, the ancient American prophet Mormon presents the history of his people, the Nephites. The intent of the present book is to present "his story as told," and its relationship to "history as known," without altering its essence. It should be noted that exhaustive archeological, genetic, and linguistic research has been undertaken by both proponents for, and detractors of, the existence of the Nephites. So far, no evidence supporting the claim has ever been found for any place, person, or event mentioned in *The Book of Mormon*, while abundant contradictory evidence has been discovered and independently verified.

This volume perfectly complements the work of pastors and counselors; those engaged in the work of pastoral care, lay leaders—indeed, anyone active in the spectrum of Christian service. It offers those who minister a unique, unparalleled collection of resources, including a practical guide to visitation; sample services for weddings, baptisms, and funerals; a step-by-step plan of salvation; easily-accessed scripture references to answer tough questions; and much more. Now a Minister's Bible based upon the increasingly popular ESV joins Hendrickson's successful line of KJV, NASB, NIV, and NKJV editions. Like its predecessors, the new book will make an excellent gift, whether for seminary graduation, Pastor's Appreciation Month, ministry anniversaries, or any special occasion. OTHER FEATURES INCLUDE • Black letter text with helpful cross-references • Concordance and accurate, full color maps • Key Bible promises section • Sturdy sewn binding for years of use

About seventy years after the death of Jesus, John of Patmos sent visionary messages to Christians in seven cities of western Asia Minor. These messages would eventually become part of the New Testament canon, as *The Book of Revelation*. What was John's message? What was its literary form? Did he write to a persecuted minority or to Christians enjoying the social and material benefits of the Roman Empire? In search of answers to these penetrating questions, Thompson critically examines the language, literature, history, and social setting of the *Book of the Apocalypse*. Following a discussion of the importance of the genre apocalypse, he closely analyzes the form and structure of the *Revelation*, its narrative and metaphoric unity, the world created through John's visions, and the social conditions of the empire in which John wrote. He offers an unprecedented interpretation of the role of boundaries in *Revelation*, a reassessment of the reign of the Emperor Domitian, and a view of tribulation that integrates the literary vision of *Revelation* with the reality of the lives of ordinary people in a Roman province. Throughout his study, Thompson argues that the language of *Revelation* joins the ordinary to the extra-ordinary, earth to heaven, and local conditions to supra-human processes.

Sixteen essays discuss *De iure praedae* – Hugo Grotius's 1604-1605 commentary on booty –, its sources, circumstances and consequences, and explore how Grotius the humanist, the theologian, the jurist and the politician concur in this his first exercise in natural law and rights.

*Making Connections in Elementary and Middle School Social Studies, Second Edition* is the best text for teaching primary school teachers how to integrate social studies into other content areas. This book is a comprehensive, reader-friendly text that demonstrates how personal connections can be incorporated into social studies education while meeting the National Council for the Social Studies' thematic, pedagogical, and disciplinary standards. Praised for its "wealth of strategies that go beyond social studies teaching," including classroom strategies, pedagogical techniques, activities and lesson plan ideas, this book examines a variety of methods both novice and experienced teachers alike can use to

integrate social studies into other content areas.

A data-driven exploration of how children's language learning varies across different languages, providing both a theoretical framework and reference. The Wordbank Project examines variability and consistency in children's language learning across different languages and cultures, drawing on Wordbank, an open database with data from more than 75,000 children and twenty-nine languages or dialects. This big data approach makes the book the most comprehensive cross-linguistic analysis to date of early language learning. Moreover, its data-driven picture of which aspects of language learning are consistent across languages suggests constraints on the nature of children's language learning mechanisms. The book provides both a theoretical framework for scholars of language learning, language, and human cognition, and a resource for future research.

God the Creator made a very unique and specialized realm in which we humans live. It is a realm of particles which cohere as what we call matter; it is also a realm of time, the flow of which he creates and causes to occur moment to moment! It is altogether different from the realm of eternity and non-matter that he occupies. All of this special creation displays both his wisdom and glory. Within it and within our time realm, he makes himself known—and especially so since our departure from him at the fall of man. Not only has the One known as Wisdom made this realm, but he has continued to invade it to call mankind back to himself. Indeed, he eventually invaded as Wisdom made Human to complete an astonishing work in which all may be included as his brand new creation!

In reading Job 1-11, Bakhtin's dialogism and chronotope define each different voice as a unique and equally weighted voice and reveal its dialogical interaction with other voices to produce better questions about Job rather than answers.

This volume consists of nine original chapters on central issues in theoretical syntax, all written by distinguished authors who have made major contributions to generative syntax, plus an introductory chapter by the editor. Dedicated to Tarald Taraldsen, the collection reflects the diverse energies that have pushed the cartographic program forward over the last decade. The first three papers deal with subject extraction, the que/qui alternation, and relative clause formation. Luigi Rizzi presents arguments that subjects are 'criterial' and that subject extraction is highly restricted. Hilda Koopman and Dominique Sportiche concur, suggesting that what appears to be subject extraction in French has been misanalyzed, and involves a relative structure. Adriana Belletti shows that children avoid using object relatives, preferring subject relatives, even when it requires passivization. The fourth paper, by Ian Roberts, analyzes the loss of pro-drop in the history of French and Brazilian Portuguese. The papers by M. Rita Manzini and Richard S. Kayne both present novel analyses of complementizers, suggesting that they are essentially nominal, rather than verbal. The final three papers address the relationship of morphology to syntax. The first two argue for a syntactic approach to word formation, Guglielmo Cinque's in a typological context and Anders Holmberg's within an analysis of Finnish focus constructions. The final paper, by Edwin Williams, presents an argument for the limitations of the syntactic approach to word formation.

The book of Proverbs is a large collection made up of diverse wisdom sayings emanating from different wisdom circles in different times. The author investigates the vocabulary of the book in order to interpret the distinctive wisdom characteristics of the seven collections of Proverbs. He argues that exclusive words of a collection will best reveal the peculiar nature of the collection, and that the collections which exclusively share common wisdom words are inevitably coherent in terms of wisdom traditions. This book provides a new understanding of Proverbs, especially with regard to the relationship between collections I (chs. 1-9) and VII (ch. 31), collections II (10:1-22:16) and V (chs. 25-29), and collections VI (ch. 30) and VII (ch. 31). In addition to the investigation of more than three hundred words, this volume contains the lists of exclusive words of the seven collections and thirty-four tables of words related to wisdom. Kim's work will prove a useful resource to those who want to study Proverbs.
