Code of Federal Regulations 2000-

The 1970s promised important readjustments in relations among the great powers, perhaps a reconstituted Europe and Asia, as well as a possible new role for "third world" countries. National attitudes toward the law of nations both shaped and reflected developments of this nature. As a great power, the Soviet Union was a principal actor in what transpired, but until now there has been no systematic exposition in the English language of how Soviet jurists regarded the world legal order. The present volume, published in Moscow in 1970, is the most profound and comprehensive study of international legal theory yet produced by a Soviet jurist. Its author, who holds the Chair of International Law at Moscow State University and for many years was the legal adviser to the USSR Ministry of Foreign Affairs, is widely credited with elaborating the juridical underpinnings of peaceful coexistence in the USSR from the mid-1950s. This book, earlier versions of which have appeared in Eastern and Western Europe, contains the fullest statement of his views. Tunkin traces the development and shaping of international law since 1917, the processes of forming and modifying international legal rules, and the nature of state responsibility under the law of nations. Of special interest to the general reader and specialist in international affairs will be Tunkin's extensive discussion of the interaction among international law, foreign policy, and diplomacy; of the legal nature of international organizations; of the principal factors at work in international politics; and of the nature of legal ties among socialist countries. The latter has been a special concern following the Czechoslovak events of 1968 and the adoption of a comprehensive program for economic integration among socialist states. For this American edition, Tunkin has brought his book up to date and Dr. Butler has supplied an introduction, a translation note, a list of the author's publications, and a glossary of Russian international legal terms.
