The latest techniques and principles of parallel and grid database processing The growth in grid databases, coupled with the utility of parallel query processing, presents an important opportunity to understand and utilize high-performance parallel database processing within a major database management system (DBMS). This important new book provides readers with a fundamental understanding of parallelism in data-intensive applications, and demonstrates how to develop faster capabilities to support them. It presents a balanced treatment of the theoretical and practical aspects of high-performance databases to demonstrate how parallel query is executed in a DBMS, including concepts, algorithms, analytical models, and grid transactions. High-Performance Parallel Database Processing and Grid Databases serves as a valuable resource for researchers working in parallel databases and for practitioners interested in building a high-performance database. It is also a much-needed, self-contained textbook for database courses at the advanced undergraduate and graduate levels. Big Java: Early Objects, 7th Edition focuses on the essentials of effective learning and is suitable for a two-semester introduction to programming sequence. This text requires no prior programming experience and only a modest amount of high school algebra. Objects and classes from the standard library are used where appropriate in early sections with coverage on object-oriented design starting in Chapter 8. This gradual approach allows students to use objects throughout their study of the core algorithmic topics, without teaching bad habits that must be un-learned later. The second half covers algorithms and data structures at a level suitable for beginning students. Choosing the enhanced eText format allows students to develop their coding skills using targeted, progressive interactivities designed to integrate with the eText. All sections include built-in activities, open-ended review exercises, programming exercises,

and projects to help students practice programming and build confidence. These activities go far beyond simplistic multiple-choice questions and animations. They have been designed to guide students along a learning path for mastering the complexities of programming. Students demonstrate comprehension of programming structures, then practice programming with simple steps in scaffolded settings, and finally write complete, automatically graded programs. The perpetual access VitalSource Enhanced eText, when integrated with your school's learning management system, provides the capability to monitor student progress in VitalSource SCORECenter and track grades for homework or participation. *Enhanced eText and interactive functionality available through select vendors and may require LMS integration approval for SCORECenter. The Book of Proverbs is about introducing wisdom to all of humanity, imploring everyone to receive wisdom and to cherish it in their hearts. Proverbs 3:18 says, "She [wisdom] is a tree of life to those who receive her [wisdom], and happy [blessed] is everyone who retains her [wisdom]." Wisdom will give you life, and life more abundantly, because wisdom is the source of life [Prov. 9:11]. When wisdom enters your heart, you will seek the presence of God. Wisdom will impart to you spiritual discernment, mental clarity and moral discipline. Wisdom will empower you with authority and power to live holy, to defeat the enemy and live victoriously. Herb Caen, a popular columnist for the San Francisco Chronicle, recently quoted a Voice of America press release as saying that it was reorganizing in order to "eliminate duplication and redundancy. " This quote both states a goal of data compression and illustrates its common need: the removal of duplication (or redundancy) can provide a more efficient representation of data and the quoted phrase is itself a candidate for such surgery. Not only can the number of words in the quote be reduced without losing informa tion, but the statement would actually be enhanced by such compression since it will no longer exemplify the wrong that the policy is supposed to correct. Here compression can streamline the phrase and minimize the em barassment while improving the English style. Compression in general is intended to provide efficient representations of data while preserving the essential information contained in the

data. This book is devoted to the theory and practice of signal compression, i. e. , data compression applied to signals such as speech, audio, images, and video signals (excluding other data types such as financial data or general purpose computer data). The emphasis is on the conversion of analog waveforms into efficient digital representations and on the compression of digital information into the fewest possible bits. Both operations should yield the highest possible reconstruction fidelity subject to constraints on the bit rate and implementation complexity.

This is the first book on "phylogenetic supertrees", a recent, but controversial development for inferring evolutionary trees. Rather than analyze the combined primary character data directly, supertree construction proceeds by combining the tree topologies derived from those data. This difference in strategy has allowed for the exciting possibility of larger, more complete phylogenies than are otherwise currently possible, with the potential to revolutionize evolutionarily-based research. This book provides a comprehensive look at supertrees, ranging from the methods used to build supertrees to the significance of supertrees to bioinformatic and biological research. Reviews of many the major supertree methods are provided and four new techniques, including a Bayesian implementation of supertrees, are described for the first time. The far-reaching impact of supertrees on biological research is highlighted both in general terms and through specific examples from diverse clades such as flowering plants, even-toed ungulates, and primates. The book also critically examines the many outstanding challenges and problem areas for this relatively new field, showing the way for supertree construction in the age of genomics. Interdisciplinary contributions from the majority of the leading authorities on supertree construction in all areas of the bioinformatic community

(biology, computer sciences, and mathematics) will ensure that this book is a valuable reference with wide appeal to anyone interested in phylogenetic inference.

The Tree of Lost Dreams takes Johnny DaSilva and his Big Tree buddies from youths who lived out their fantasies of heroism high on the towering limbs of the Big Tree to the real world. While trying and failing to enter WW II because of their youth, they were greeted with the Korean War. Johnnys words Now we have our own war were received with some standing tall on their high limb while others deciding to instead abandon the heights and place their two feet squarely on the ground. Johnny, Righty, Scoff, Rhesus and others bought into Johnnys words, If we dont fight them there, we will fight them here. The two young girls that were in love with Johnny, wealthy and popular Yelena, and poor and abused Bernadette, are now women. It took little time for the Big Tree gang to learn the great distance between the lofty fresh air of their beloved Tree to the lowly face in the muck, nearly impossible to breathe gasps of battlefield blood and barf. Johnny suffers the epitome of the wounds of the lower depths and the different directions it spirals him, Yelena and Bernadette into. Hopefully you have read the Tree of Young Dreamers, Frank Sousas first novel of the Tree Trilogy. The third, the Tree of New Roots is underway.

Present this quick, effective method for assessing and managing common medical conditions! The central tool of this text is the decision tree, a simple flowchart that helps students quickly determine the optimal massage therapy approach for specific medical conditions. A Decision Tree is included for each of the more than 50 conditions discussed in the book, with massage considerations listed for numerous additional conditions in brief. Also unique to this text are questions therapists can ask clients during the interview process to help the therapist

understand not just the medical condition, but how it presents in a particular client.
Are the Old and New Testament accounts of Jesus' lineage contradictory or complimentary?
Is the family tree of Jesus a calendar, and what may it tell us about our own generation? Why
was Adam old at 900, Abraham old at 150, and David an old man at only 70? How long is a
Biblical "generation", and exactly when was Jesus born? Is there historical proof of Jesus'
resurrection? "The Family Tree of Jesus" explores these questions, and much more. Within
these pages: Astonishing facts and numerical properties about the lineage of Jesus. Historical
and archaeological proofs that substantiate the Bible's accuracy. Biographies of over 150 real

In this full color book, John Bellaimey explores twenty of the world's religions from Hinduism to Rastafarianism, following Karen Armstrong's developmental model of religion as a human cultural dimension. Beginning with a section on the roots of the "tree of world religions," Bellaimey considers the sources, preoccupations, dimensions, and meanings of human religion in our history. He then surveys polytheistic religions like Maya, Norse, and Canaanite and the great shift Jaspers called the Axial Age. Axial sages like Socrates, Laozi, the Buddha, and the Hebrew Prophets moved religion from mostly-supernatural to mostly-humanistic, shifting the focus on God's inscrutable Otherness to God's increasing insistence on ethical behavior as the highest form of worship. A section on the three monotheistic faiths of Abraham follows, and the book ends with a selection of newer faiths, such as Sikh, Baha'i, Ahmadiyya, and Latter-Day Saints. First published in 2014 as a more permanent version of his 25-year high school world religions readings, the 2018 edition is completely revised with photographs from a year-long sabbatical journey to 22 countries during the 2016-2017 school year.

"A fresh new voice who adds her own charming, beguiling brand of lyricism to the growing body of Haitian American stories . . . a unique and fascinating book." —Lorna Goodison, author of From Harvey River One of the South Florida Times's Best Bets For Your Weekend An Essence Magazine Summer Reading Pick Iris Odys, is the offspring of Hagathe, a Haitian maid, and Brahami, a French-educated mixed-race father who cares little about his child. Hagathe, who'd always dreamt of a better life for her daughter, is presented with the perfect opportunity when Iris is five years old. Adopted by a white American couple, an anthropologist and an art gallery owner, Iris is transported from her tiny remote Haitian village, Monn Neg, to an American suburb. The Roving Tree illuminates how imperfectly assimilated adoptees struggle to remember their original voices and recapture their personal histories. Set between two worlds, suburban America and Haiti under the oppressive regime of Papa Doc's Tonton Macoutes, the novel offers a unique literary glimpse into the deeply entrenched class discrimination and political repression of Haiti during the Duvalier era, along with the subtle but dangerous effects of American racism. Told from beyond the grave and underscored by the spiritual wisdom of Haitian griots, The Roving Tree explores separation and loss, rootlessness, the impact of class privilege and color consciousness, and the search for cultural identity. "A well-balanced story

about a young woman, caught between two worlds, who struggles to connect with her heritage . . . a polished narrative." —Kirkus Reviews "With her skillful incorporation of literary realism, Augustave brilliantly synthesizes the cultural richness of Haitian Vodou and the impoverished socio-political affairs of Haiti, along with the acidic polluted gush of racism that is deeply drenched in American society." —Haitian Times "A stunning tale with beautiful language that dwells in the realm of magical realism . . . The characters are rich, complicated and full of color and nuance." —Mosaic Magazine "A gorgeous new novel about a Haitian adoptee finding her way in many different corners of the world." —Edwidge Danticat, in the New York Times' By the Book feature

King of Light is the title of a series that entail: Book of Genesis Part I (the Creation of the World), Book of John Part I (the Path of the Ministry of the Gospel), and Book of John Part II (the Path of the Cross). They go through the books of the Bible (Genesis chapters 1-9, and John) providing commentary verse-by-verse, in light of God's new era, the Era of Love or "Sarang Shi Dae" in Korean. (Sarang Shi Dae literally translates to "Love Era" or "Love Epoch"). King of Light: the Book of John Part 1 and Part 2 take us through the footsteps of Jesus during His ministry, revealing His work, words and mission, which ultimately led to the slaughter but certainly didn't end there. This book, King of

Light: Book of John Part II: The Path of the Cross, covers chapters 10-21 of the Gospel according to John, and takes us through each chapter that beautifully and poignantly reveals the movement of Jesus, starting from the time of His appearance in John 1. By taking a look at the "First Coming" of Jesus with the spiritually opened Word of the Era of Love, we can discover the spiritually cataclysmic shift that happened from one era to another, and know that another similar shift is in the making. Many believers will know that when Jesus came to this earth in the flesh, "He came to his own, and those who were his own didn't receive him" (John 1:11). King of Light: The Book of John shows that this was the marker of time in which the Gospel, and no longer the Law, was "the light". The Law was "the light" during its time as the light, but when the one who brought completion to the Law arrived at the scene, there were those in the Law who "didn't recognize him" (John 1:10). Nevertheless, Jesus was the Messiah and fulfilled and brought completion to what we see as the Old Testament, that is, the Law, in which animal sacrifices were offered so that God's direct connection with man could be made. Jesus on the cross was the final sacrifice, and it brought down the curtain of the Law (Matt. 27:51, Acts 17:24). After Jesus' arrival, those who received Him as Truth could make a direct connection with God through Jesus. It wasn't until He resurrected and ascended, that afterwards the Holy

Spirit, the same Holy Spirit in Him during His ministry on earth, came upon Mark's Upper Room and rested inside the disciples and in those who would proclaim "the Good News". Now, the time of Christ's return is not only more imminent than before, but the meaning and significance of a "return" must be tore open to expose the "the Even Better News" that it really is (see Lee's books the Food for the Era of Love series.) This is significant because it reveals how God desires to tear open another curtain, the curtain of the literal Word as well as the veil over our eyes, thus exposing another "shift" that's analogous to Christ's "First Coming". The Spirit of His Second Coming rests upon this earth, and goes in search of those who receive the Word opened in the Spirit. The time of Christ's First Coming can be seen as a parallel to the Era of Love, that is, the Second Coming. Just as, at the time of the First Coming, the Word became flesh and went to His own, in the Second Coming, that which fulfills and brings completion to the Gospel first arrives as the Word in the Spirit. The Era of Love is when that which fulfills and brings completion to the Gospel (and ultimately to Scripture as a whole) arrives and moves in the Spirit as Love. The arrival isn't a physical one (in the way of certain popular imaginations) but initially, a spiritual one as the Word—that is, the Word opened in the Spirit. *This book includes a special, short testimony by Young-Rock's daughter, Heeseung Lee, who briefly shares her

journey from South Korea to the U.S., having received God's mission for her to send the Era of Love to the various people she met during her time in the U.S. **Scripture quotes from WEB, in public domain.

This book explores the specifically human dimensions of the problem posed by a new generation of invasive pests and pathogens to tree health worldwide. The growth in global trade and transportation in recent decades, along with climate change, is allowing invasive pests and pathogens to establish in new

environments, with profound consequences for the ecosystem services provided by trees and forests, and impacts on human wellbeing. The central theme of the book is to consider the role that social science can play in better understanding the social, economic and environmental impacts of such tree disease and pest outbreaks. Contributions include explorations of how pest outbreaks are socially constructed, drawing on the historical, cultural, social and situated contexts of outbreaks; the governance and economics of tree health for informing policy and decision-making; stakeholder engagement and communication tools; along with more philosophical approaches that draw on environmental ethics to consider 'non-human' perspectives. Taken together the book makes theoretical, methodological and applied contributions to our understanding of this important subject area and encourages researchers from across the social sciences and humanities to bring their own disciplinary perspectives and expertise to address the complexity that is the human dimensions of forest and tree health. Chapters 5 and 11 are open access under a CC BY 4.0 license via link.springer.com. Brought up in the Depression, Johnny DaSilva is leader of a fun and imaginative gang that lives out their dreams in the Big Tree in which each has a branch that serves as the Lone Ranger's Silver, the race car of Morey Amsterdam, the rocket ship of Buck Rogers, the crow's nest for Black Bart the Pirate. When World War II broke out, they tried every ruse their young imaginations could think of to get into the marines, army, and navy but had to settle for the Boy Scouts. But the faux pas war to end all wars came too soon for the Big Tree Gang. Johnny is best described by an aunt as having the millstone around the neck of having a strict English Episcopalian conscience and bucking bronco Portuguese sexual proclivities. Two girls are in love with him, one wealthy and popular, the other sexually abused and who considered herself a worthless toy, until she met Johnny. Whatever they knew about the facts of life, male and female, were learned pretty much by trial and error.

Barkerton, Massachusetts, 1650, three children and a woman went missing, and the inhabitants of Barkerton were in panic. Was it a witch, a friend, or some kind of monster that had taken them? Even more disappearance had happened several times in the past, but no one had wanted to talk about it until now. This time, it was the Barker family, and this town had been settled by them nearly thirty years ago. A search party was sent out into the forest to find them, but there were no bodies to be found, only a hideous man with an evil disposition. There would be a trial. In present day, the Carrier family-Jonathan, Sarah, and their two boys-move into their new country home, where they begin seeing visions of a ghost, a singing chandelier, and a strange man who is trying to lure

the boys into the woods. The boys eventually go missing, and Jonathan must get them back safely. The older of the two boys, Thomas, shocked his parents when his face is seen in the bark of the mysterious sycamore tree. In 1616, in the village of Wampanoag Indians, terrible times have cursed the village with yellow fever, drought, and famine. Nitchicke, the village spiritual adviser (taupaw), is tasked to find a solution. He and twelve other taupaw search the forest for a place to convene with the spirits. On the night of the full moon, a silver tear is shed by the moon, and it lands in Nitchicke's lap. He must carry this moonstone to the ancient burial ground, where it will capture the spirits of the dead and remove the curse on his village. The journey costs him his life. He was buried beneath a sycamore tree. It was said that his face could be seen in the bark. Today's embedded devices and sensor networks are becoming more and more sophisticated, requiring more efficient and highly flexible compilers. Engineers are discovering that many of the compilers in use today are ill-suited to meet the demands of more advanced computer architectures. Updated to include the latest techniques, The Compiler Design Handbook, Second Edition offers a unique opportunity for designers and researchers to update their knowledge, refine their skills, and prepare for emerging innovations. The completely revised handbook includes 14 new chapters addressing topics such as worst case

execution time estimation, garbage collection, and energy aware compilation. The editors take special care to consider the growing proliferation of embedded devices, as well as the need for efficient techniques to debug faulty code. New contributors provide additional insight to chapters on register allocation, software pipelining, instruction scheduling, and type systems. Written by top researchers and designers from around the world, The Compiler Design Handbook, Second Edition gives designers the opportunity to incorporate and develop innovative techniques for optimization and code generation.

Carbon Inventory Methods Handbook fills the need for a handbook that provides guidelines and methods required for carbon inventory. It provides detailed step-by-step information on sampling procedures, field and laboratory measurements, application of remote sensing and GIS techniques, modeling, and calculation procedures along with sources of data for carbon inventory. The book is driven by a growing need for 'carbon inventory' for land use sections such as forests.

My book is a book for people that are seeking the TRUTH concerning their Salvation which comes to man through redemption, BASED on a LIVING relationship with the Lord Jesus founded in a LIFE giving process which comes forth out of death to SELF, and a Life that comes forth from a SEED of Life sown in the Natural Life of the Natural Man born in Adam, which produces a Man in the
