This Family History traces the varied fortunes of the Smiths of West Yorkshire. It also examines their connection with other families, including: - The Absaloms of Hampshire and London - The Cardens of Brighton - The Cloughs of Sutton and Crosshills - The Fareys of Skipton - The Fosters of Waterford, Ireland and Birmingham - The Gillinsons of Leeds - The Hastings of Holderness - The Morton's of America - The Myersons of London - The Stamfords of East Yorkshire - The Wilsons of Calderdale A key theme running throughout this History has been the determined use of what could aptly be termed 'survival strategies' by successive generations of Smiths. Their aim was always to bolster a precarious 'respectability' in what was often a harsh and unstable environment. The mass of factual and bibliographical information found within its pages will prove useful to Research Students and Family, Local and Social Historians. Above all, it offers a legacy to inspire both present and future family members

Peter Caws provides a fresh and often iconoclastic treatment of some of the most vexing problems in the philosophy of science: explanation, induction, causality, evolution, discovery, artificial intelligence, and the social implications of technological rationality. Caws's work has been shaped equally by the insights of Continental philosophy and a concern with scientific practice. In these twenty-eight essays spanning more than a quarter of a century, he ranges from discussions of the work of French philosopher Gaston Bachelard, to relations between science and surrealism, to the concept of intentionality, to the limits of quantitative description. A lively mix of history, theory, speculation, and analysis, Yorick's World presents a vision of science that includes human history and social life. It will interest professional philosophers and scientists, and at the same time its directness will make it readily accessible to nontechnical readers.
