Adopted by the State of Arkansas for 2008 Once again, the State of Arkansas has adopted An Arkansas History for Young People as an official textbook for middle-level and/or junior-high-school Arkansas-history classes. This fourth edition incorporates new research done after extensive consultations with middle-level and junior-high teachers from across the state, curriculum coordinators, literacy coaches, university professors, and students themselves. It includes a multitude of new features and is now full color throughout. This edition has been completely redesigned and now features a modern format and new graphics suitable for many levels of student readers. The completely revised fourth edition includes new unit, chapter, and section divisions as well as five brand-new chapters: an introductory chapter with information on the symbols, flag, and songs of Arkansas; chapter 2, which covers the geography of Arkansas; chapter 3, on state and local government; chapter four, on economics and tourism; and a "modern" chapter on the Arkansas of today and the future, which completes the learning adventure. This edition also has two "special features": one on the Central High School crisis of 1957 and another on the William J. Clinton Presidential Library. It also has new and interesting features for students like the "Guide to Reading" (at the beginning of each chapter, there is a list of important terms, people, places and events for the student to keep in mind as he or she reads [corresponding to blue vocabulary words in the text, which are define in the margin]), "County Quest," "I Am an Arkansan," "Did You Know?" "Only in Arkansas," "A Day in the Life," "Chapter Reflection" questions and activities, over forty-five new content maps, and a comprehensive new map atlas. The book describes — How to shoot and process still image “nightscapes” – images of landscapes taken at night by the light of the Moon or stars ... and ... How to shoot and assemble time-lapse movies of the stars and Milky Way turning above Earthly scenes, all using DSLR cameras. The 400-page multi-touch book includes — 50 embedded HD videos (no internet connection required) demonstrating time-lapse techniques. 60 multi-page tutorials with step-by-step instructions of how to use software: Adobe Bridge, Adobe Camera Raw, Photoshop, Lightroom, LRTimelapse, Advanced Stacker Actions, StarStaX, Panolapse, Sequence, GBTimelapse, and more. Numerous Photo 101 sections explaining the basic concepts of photography and video production (f-stops, ISOs, file types, aspect ratios, frame rates, compression, etc.). Numerous Astronomy 101 sections explaining the basics of how the sky works (how the sky moves, where the Moon can be found, when the Milky Way can be seen, when and where to see auroras). Reviews of gear – I don’t just mention that specialized gear exists, I illustrate in detail how to use popular units such as the Time-Lapse+, Michron, and TriggerTrap intervalometers, and the All-View mount, Radian, Mandarin Astro, eMotimo, and Dynamic Perception motion-control units, with comments on what’s good – and not so good – to use. You’ll learn — What are the best cameras and lenses to buy (cropped vs. full-frame, Canon vs. Nikon, manual vs. automatic lenses, zooms vs. primes). How to set your cameras and lenses for maximum detail and minimum noise (following the mantra of “exposing to the

right” and using dark frames). How to shoot auroras, conjunctions, satellites, comets, and meteor showers. How to shoot nightscapes lit only by moonlit, and how to determine where the Moon will be to plan a shoot. How to shoot & stitch panoramas of the night sky and Milky Way, using Photoshop and PTGui software. How to shoot tracked long exposures of the Milky Way using camera trackers such as the iOptron Star Tracker and Sky-Watcher Star Adventurer. How to develop Raw files, the essential first step to great images and movies. How to process nightscape stills using techniques such as compositing multiple exposures, masking ground and sky, and using non-destructive adjustment layers and smart filters. How to shoot and stack star trail images made of hundreds of frames. How to assemble time-lapse movies from those same hundreds of frames. How to plan a time-lapse shoot and calculate the best balance of exposure time vs. frame count vs. length of shoot, and recommended apps to use. How to process hundreds of frames using Adobe Camera Raw, Bridge, Photoshop, and Lightroom. How to shoot and process advanced “Holy Grail” time-lapse transitions from day to night. How to shoot motion-control sequences using specialized dolly and pan/tilt devices. How to use time-lapse processing tools such as LRTimelapse, Panolapse, Sequence, and Advanced Stacker Actions. What can go wrong and how best to avoid problems in the field.

Exploring Economics, First Canadian Edition offers students a lively, back-to-the-basics approach designed to take the intimidation out of economics. Mental Health Nursing is an Australian text combining a theoretical approach to mental health nursing with clinical reasoning and a practical framework for real-life nursing situations. Ideal for both clinical and theory mental health units, the text was developed with input from consumers and clinicians, and includes the clinical manifestations, impacts, treatment and management of persons suffering from mental illness. Chapters on 'Suicide and non-suicidal self-injury' and 'Mental health first aid' provide detailed coverage of these contemporary mental health issues, while a chapter on Mental State Examination (MSE) comprehensively explores MSE in a style similar to a traditional psychiatry text and in the context of many different mental health conditions, giving students multiple perspectives of presentations. Critical thinking and review questions challenge students to apply theory to practice, and pharmacology is discussed in each disorder-chapter, helping students to contextualise their learning. With coverage of the Mental Health Act (2014), and criteria from the Diagnostic and Statistical Manual of Mental Disorders, Fifth Edition (DSM-5) integrated throughout, the text equips students with a working understanding of major mental health disorders, and the ability to work practically when engaging with persons suffering from mental illness. This enhanced edition now also includes discussion around mental health as it pertains to the effects that COVID-19 and the global pandemic have had on consumers and practitioners. Resources for the instructor include updated Instructor's Manual, PowerPoints and Test Bank.

Are chronic diseases such as diabetes, cardiovascular problems, and joint pains troubling you? Are anxiety, depression, and anger and other such emotions bringing you and your performance down? Are you constantly on medications for digestion and respiratory issues? If you answer "yes" to any of the above questions, you are probably suffering from an imbalance of energy in your subtle, non-physical body. So, what is the subtle body? In many spiritual traditions, the subtle body is the sacred or the immortal body. It never dies and when the physical body dies, your subtle body merges into the universe. It comprises of the intelligence, mind and ego, aspects that control the human physical body. The terms "aura" and "chakras" refer to parts of your subtle plane of existence. These are usually seen by the mind's eye and not your physical eyes. Disturbances in your auric field or imbalances in the flow of energy through the chakras manifests as physical, mental, and emotional disorders in the physical world. Mostly, when people fail to heal their physical bodies with modern medicine, the only solution is to turn towards healing the non-physical subtle body. Just by working on balancing your chakras and your energy field called aura you will notice that your chronic disorders are much under control, your emotions are much balanced, and you are spiritually more connected to the universe and your Higher Power. Don't wait until you fall ill to begin taking care of your chakras and aura. Take action now and start learning about chakras and the subtle body. This comprehensive guide is perfect to get you started on this journey. It will help you learn about what are chakras, what the 7 main chakras are, and how to strengthen your aura and radiate strong, positive and healthy energy by opening or balancing your chakras. You will also find a chakra test here that will help you find out which of your

chakras is imbalanced. There is also an exclusive section on the third eye for people interested in awakening it and promoting their intuitive and psychic abilities.

A deep shroud of mystery surrounds the book of Revelation, and it lends itself to a wide variety of interpretations. Its style and symbolism intimidate us and leave us bewildered; yet there is a thread of continuity and strength permeating its pages. Not just another book on Revelation, Dennis LaValley's "Revelation: Beyond the Cross" cuts through layers of poor translation and error to solve the problems presented by hundreds of years of misinformation. In a conversational style, LaValley writes to reveal Revelation's true purpose: the full, vivid story of Jesus's return to heaven after his ministry on Earth. Through meticulous research, LaValley places Revelation back in the Bible, endows it with the authority of Scripture, and shows its relevance to the other books of the Bible and to the first-century Christian. He breaks down Revelation chapter by chapter and interprets the visions and symbols in accordance with the principles of apocalyptic literature using Scripture, not opinion. "Revelation: Beyond the Cross" shatters the bonds of tradition and superstition and strips away the mystery to reveal the pure and simple truth of the Gospel.

The Business Guide to Privacy and Data Protection Legislation presents a collection of reports from over 16 countries. Each report provides an introductory overview of current developments in the privacy field in each country, followed by a description of the laws in this area. One of the unique features of this new, second edition is that it combines within one volume the most authoritative translations of the privacy and data protection laws in each country. Another feature is its broad coverage. Originally covering seven countries, including France, Sweden, Denmark, Germany, the Guide has been expanded to include new reports where data protection laws have been passed more recently. These include reports on Switzerland, Belgium, Japan, Canada, the United States, The Netherlands, United Kingdom, Denmark, Iceland, Finland, France, Germany, etc. The Guide contains key resource material for those seeking to navigate their way through the sometimes complex environment of privacy protection, especially in the context of transborder data flows.
