With new cases and examples from headlines, MANAGERS AND THE LEGAL ENVIRONMENT: STRATEGIES FOR BUSINESS, 9E equips readers with the legal knowledge and risk management techniques for success as a business manager. Cutting-edge coverage and a strategic approach teach how to enhance realizable value, redeploy resources, and manage legal and business risk. Up-to-date coverage addresses the rights of workers at firms, like Uber, in the gig economy; the right of employers to restrict employees' social media; ethics of compensating workers who are tipped; law to protect children's safety on the Internet; Fourth Amendment concerns in searches of cell location; rules governing crowdfunding; and the ramifications of the EU's "right to be forgotten." Readers learn to use legal tools to create value, attain business objectives, resolve legal issues, and handle legal disputes. The US and its citizens are addicted to debt much as a drug addict is hooked on heroin. Unless the US achieves rehabilitation, this failing alone will ensure that the USA will continue to decline relative to many other countries. Liberals are now firmly in control in the USA. In this political climate, there is no indication that our debt will not continue to increase dramatically. The modus operandi is to give a short term fix to all problems by dramatically increasing debt. The present financial crisis, itself caused by excessive debt is being fixed by even more debt. The burden for the few who pay taxes will become increasingly onerous and increasingly unacceptable for future generations. The best and the brightest will turn away from the USA, increasing the US relative rate of decline. Much that has been achieved in the USA since the end of the Second World War has been achieved by people not born in the USA. In future, the USA increasingly will not be the destination of choice for people with the most to offer. Instead it is the destination for illegal immigrants at the other end of the social scale. The USA is considered ugly by the rest of the world because it makes no effort to control its gluttony. In the USA, 25% of the world's energy is consumed by 5% of the world population. The USA also leads the world in obesity and in debt. The USA does not pay for its insatiable consumption. Despite its great opportunities, the USA has a high percentage of free loaders who pay little or no income taxes. They have become home owners through debt that they have not worked and saved to afford, through policies of US Liberal government. The ensuing tsunami is now engulfing the less fortunate people throughout the world, who are genuinely poor and are now having to suffer the consequences of our worthless paper debt instruments, while the USA takes on huge new debt to continue to feed its addiction instead of facing up to the reality of living within its means.

Tax by Design identifies what makes a good tax system for an open developed economy in the 21st century and suggests how the UK tax system could be reformed to move in that direction. The recommendations stress the importance of neutrality and transparency in tax design. It draws on the expert evidence from the commissioned chapters and commentaries in Dimensions of Tax Design. It also acknowledges the growing importance of globalised markets and multinational corporations as well as the challenges created by changing population demographics, the growth of new technologies, and the broadened objectives of policy makers. Written by an experienced business lawyer in the technology, scientific and engineering community, this publication is for the engineer with an innovative high-tech idea or concept who needs those crucial business insights and strategies to move that idea forward. It offers key analysis on how to leave a current employer, gain access to technologies and potential talent, and considers

other issues that can reduce problems down the road. It even includes a step-by-step guide for accessing and protecting intellectual property at the earliest stages. To assist in the fundraising process, this resource explores all the available options to capitalize a business – from self-funding, to bootstrapping, to angel investors, to venture capital to government grants, to bank loans, to joint ventures. It also looks at the best ways to form a company so as to take advantage of various tax and business strategies, discusses compensation of employees with stock options or restricted stock plans, explains how an emerging company can expand internationally, and covers some key exit strategies such as an IPO or a merger/acquisition. It covers most everything a new technology business will face including hiring, firing, contracts, leases, loans, and product warranties. As you read, you will find this book is full of the stuff that engineers love: statistics, data, tools, spreadsheets, and research. But it also full of the anecdotal evidence and practical advice needed to stay the course. Now is a tremendous time for entrepreneurship. Although there have been periodic slowdowns in the economy, if you believe in a future, high-tech is the future in which to believe. This book is part of the Taylor & Francis/CRC Press series "What Every Engineer Should Know About...". Like the other books in the series, it is designed to provide you with important knowledge that will help you along your career path. This one will also help you make that path your own.
