STORMY REUNION Pulled from the waves and gasping for air, the last person Antonia Verde expects to be her rescuer is Reuben Sandoval. He may once have been the love of her life, but his drug-smuggling brother ruined their chance of happiness. Now with a storm blowing in, Rueben's island hotel is her only refuge. Soon they find themselves trapped on the island with a killer in the midst of a dangerous hurricane. Antonia's life is in Rueben's hands—can she trust him with her heart, as well? Stormswept: Finding true love in the midst of nature's fury

This guide is designed to provide direction on the monitoring of traffic characteristics. It begins with a discussion of the structure of traffic characteristics monitoring and traffic counting. The next two sections cover vehicle classification and truck weighing. The last section presents the coordinated record formats for station identification, traffic volume, vehicle classification, and truck weight data.

This volume provides an up-to-date and comprehensive coverage of second language learning. The focus throughout the book is primarily on language learning, but each chapter also discusses the implications for teaching and assessment, thus informing both understanding and practice. The book contains nine sections, which aim to organise and reflect different dimensions of the diverse and complex scope of learning English as a second or additional language. Four themes which permeate the chapters are: learning and learners; learning and language; learning and language development; learning and learning context. The 36 chapters are up-to-date and authoritative, written by experts in the field. The content is accessibly written, with questions for discussion and follow-up reading suggestions provided.

"This research and development effort, called Combined Arms Operations at Brigade Level, Realistically Achieved Through Simulation III (COBRAS III), designed simulation -based, structured training for the staffs of the conventionally-equipped brigade combat team (BCT). The effort included designing a progressive approach to presenting and utilizing training objectives. The resulting product was a set of "performance objectives" that provides techniques and procedures for command and staff performance. The performance objectives resulted from and support the purpose of the training, which is to facilitate BCT preparation for combat training center rotations and deployment. The performance objective concept was an extension of the task analysis work conducted during the two proceedings projects. -- COBRAS I and COBRAS II."--DTIC.

Spectral Theory of Guided Waves represents a distillation of the authors' (and others) efforts over several years to rigorously discuss many of the properties of guided waves. The bulk of the book deals with the properties of eigenwaves of regular waveguiding systems and relates these to a variety of physical situations and applications to illustrate their generality. The book also includes considerable discussion of the basic properties of normal waves with quadratic operator pencils. Unique in its coverage of these subjects, the book will be of interest to engineers, applied mathematicians, and physicists with a working knowledge of functional analysis and spectral theory.
